### ANNEXURES

(A) Integrated IDP & Budget Process Plan

Dr. Beyers Naudé municipality | munisipaliteit | umasipala

- (B) Dr Beyers Naudé LM Staff Establishment
- (C) Budget Summaries : Opex, Cashflow and Capex
- (D) IDP Representative Forum Stakeholders' List
- (E) Community-Based Planning Report (CBP)
- (F) Audit Action Plan
- (G) Evidence of Sector & Management Plans
  - 1. Spatial Development Framework (SDF)
  - 2. Local Economic Development Strategic Plan (LED Plan)
  - 3. Disaster Management Plan (DMP)
  - 4. Human Settlement Sector Plan (HSSP)
  - 5. Water Services Development Plan (WSDP)
  - 6. Integrated Waste Management Plan (IWMP)
  - 7. Responsible Tourism Sector Plan (RTSP)
  - 8. Area Based Planning & Land Reform (ABP)
  - 9. Comprehensive Infrastructure Plan (CIP)
  - 10. Infrastructure Master & Maintenance Plans
- (H) Service Delivery & Budget Implementation Plan (SDBIP)
  - 2017/18 Annual Performance Report
  - 2018/19 Annual Performance Report
  - 2019/20 Annual Performance Report
  - 2020/21 Mid-year SDBIP Performance Report

Most of these plans were in place at the disestablished Municipalities prior to the 2016 amalgamations. A new SDF has been developed with the assistance of MISA, and the Draft is now available for Public Inspection & Comments. The other Sector Plans are still to be, or are in the process of being, developed for Dr Beyers Naudé LM. Once available, their executive summaries will be attached. Kindly note that the IDP only provides a synopsis of each; the detail will be in the Plan.

#### Kindly note

A CD, containing the IDP and its Annexures, **plus** Sector Plans and other important documents (e.g. By-laws, Policies and Strategies) – that are in place – is available upon request.

"Christiaan Frederick **Beyers Naudé** (10 May 1915 – 7 September 2004) was a South African cleric, theologian and the leading Afrikaner anti-apartheid activist. He was known simply as **Beyers Naudé**, or more colloquially, Oom Bey (Afrikaans for Uncle Bey)."

# FOREWORD BY THE HONOURABLE MAYOR

## 2017 – 2022 IDP : 5<sup>th</sup> & final Edition (2021/22)

We have come a long way since the establishment of Dr Beyers Naudé Local Municipality in August 2016. On 23 May 2017, the new Council approved its own 5-year Integrated Development Plan, which was implemented on 1 July 2017. As per legislated requirement, the IDP is subjected to a rigorous annual review. The fourth review of the 2017 – 2022 IDP commenced last year, with the adoption of the 2021/22 IDP & Budget Process Plan on 25 August 2020. The tabling and adoption of the 2021/22 IDP today is the culmination of a consultative review process over the past 8 months, that included the following important activities :

- ✓ 3 IDP Steering Committee meetings and 3 IDP Representative Forum meetings,
- ✓ Consultation with our Ward Committees and the review of their Ward Development Priorities during interactive and participatory sessions,
- ✓ Strategic Planning Sessions that focussed on the IDP's Development Strategies,
- ✓ Several focus-group and inter-departmental meetings and consultations and, going forward, public consultations during the month of April 2021.

Local Government legislation provides that the Mayor co-ordinates, and be the champion of, the Budget preparation process and to either review or develop a new Integrated Development Plan, with the assistance of the IDP Manager, Chief Financial Officer and Municipal Manager, as well as the support staff of the Municipality.

Since the inauguration of the new Council, we committed ourselves – Councillors and Officials – to make this new Municipality the best in the District. We have listed the challenges we are facing and how we plan to overcome them. Now we want to urge all Councillors, Employees and our Communities and Stakeholders to keep up the good work. Our plan is for all of us to work together to make this the best Municipality, where everyone lives a happy life. We must form part of the new dawn in our country, even more so in the wake of the COVID-19 pandemic, that has crippled our economy and brought our lives to an abrupt standstill. Together we will overcome.

The input of all sectors into this Plan is of utmost importance to achieve the goal of having a 100% credible Integrated Development Plan. The Council will be measured, monitored and evaluated against this reviewed 5-year Plan. It is because of this that we must ensure that our IDP and Budget are credible and realistic. The poor attendance and participation by some Sector Departments is a matter that we are dealing with. We are also committed to adding value to the DDM, introduced in 2019 and being rolled out across the country. We all need to realise that by working together, we can get so much more done to benefit our citizens in the long run.

I want to express my sincere thanks to all Officials, Departments, Councillors and Stakeholders who have assisted us in successfully reviewing and amending this IDP and my hope is that its implementation will be to the betterment of our Communities. Let us all, in honour of our first democratic president, Tata Nelson Mandela, work towards a better life for all.

Thank you / Dankie / Enkosi Kakhulu,

CLLR DEON DE VOS, MAYOR OF DR BEYERS NAUDÉ LOCAL MUNICIPALITY

29 March 2021

#### Dr. Beyers Naudé MUNICIPALITY | MUNISIPALITEIT | UMASIPALA rising together for development

# STATEMENT BY THE MUNICIPAL MANAGER

## 2017 – 2022 IDP : 5<sup>th</sup> & final Edition (2021/22)

Since 1996, Integrated Development Planning (IDP) has become a tool for municipal planning and budgeting to enable municipalities to deliberate on developmental issues identified by communities. The introduction of IDP has not only affected municipal management but also improved services in communities without access to basic infrastructure. The implementation of the IDP as a subsequent phase of planning serves to unite the total efforts of the municipality behind a strategy to link the operational activities to successful execution of strategy. This necessitates senior officials to assume responsibility, improve cohesion among councillors, officials and communities, integrate planning efforts, communicate with all

stakeholders, align operational activities of the departments with the IDP as an overarching municipal plan; links the IDP to budgetary processes; and prioritising of projects and programmes. The implementation of the IDP should be seen as a conversion of Integrated Development Planning into action followed by the results that benefit poor communities.

Municipalities are, however, confronted by major challenges and choices on issues such as land management, local economic development, institutional transformation and especially finances. The Dr Beyers Naudé Local Municipality is no exception to the rule. We face severe financial challenges, infrastructure backlogs and a lack of implementable policies. The latter is in the process of being addressed as an expert on policy matters has been appointed to draft and review all relevant policies for the municipality. In addition, Council has approved a Financial Recovery Plan which is currently being implemented.

In January 2018, the Administration held a 3-day workshop to reposition the municipality by taking an honest look at the state of our administration and service delivery with the view of developing a comprehensive service delivery improvement plan, formulate strategic and operational plans that are linked to our IDP and the Budget. This was followed up by another 2-day workshop in February 2020. As an institution, we are also called upon to respond on issues such as employment equity, transformation, change management as well as a process of restructuring. All these challenges can only be addressed by a passionate, conscientious, disciplined and professional staff complement. We have to be relentless in our pursuit of good governance and service excellence.

I would like to convey a word of thanks to the Mayor, Members of the Executive Committee, Councillors, Directors, Managers, IDP staff and all other staff members for their ongoing support and commitment to the process of building a better future for all residents in the Dr Beyers Naudé Local Municipality.

DR EM RANKWANA MUNICIPAL MANAGER

29 March 2021

# IDP EXECUTIVE SUMMARY

#### VISION STATEMENT

"A responsive, developmental and unifying Local Government providing quality services to its citizens in a safe, healthy and wellmanaged environment, with equal opportunities for all."

Dr Beyers Naudé Local Municipality, spatially the third largest Local Municipality in the country, is well-positioned as a portal to the mystical Karoo, in a region renowned for its pristine natural environment, rich heritage, diverse peoples and cultures. The vast area (± 28,690 km<sup>2</sup> in extent) includes the towns of Graaff-Reinet, Willowmore, Aberdeen, Jansenville, Steytlerville, Nieu-Bethesda, Klipplaat and Rietbron; plus a number of smaller settlements and surrounding farms. It boasts several very popular tourist attractions, beautiful landscapes and a healthy climate. The town of Graaff-Reinet, 4<sup>th</sup> oldest in South-Africa and referred to as the "Gem of the Karoo", is a hub of agri-tourism activity; it is the political and administrative seat of the Municipality and is the centre where the biggest concentration of the population lives and works. The second largest town is Willowmore, also with a strong and vibrant tourism and agricultural sector. Willowmore should be viewed as a strategically well-positioned centre for managing and co-ordinating service-delivery & public participation in the southernmost part of the Municipal area.

Dr Beyers Naudé LM was established as a result of a merger between the former Municipalities of Camdeboo, Ikwezi and Baviaans – on 8 August 2016 – after the Local Government Elections held on 3 August 2016. Geographically the new Municipality makes up 49.2% of the Sarah Baartman District Municipality's landmass, with a low population density of 2.8 persons per km<sup>2</sup>, which is much lower than the District average of 7.7 persons per km<sup>2</sup>. The area is characterised by large tracts of commercial farmlands that are sparsely populated. The most densely populated areas are found in and around the established main towns. There are vast distances between main centres; some of the smaller towns and settlements can only be reached by unsurfaced (gravel) roads, not all of which are being maintained on a regular basis. The most difficult areas to access are situated within the Baviaanskloof.

The towns in the region have their own unique dynamics and attractions that draw visitors from far and wide, many of whom have made this their home. Well-known personalities that have carved a niche in our country's history and are closely associated with the Dr Beyers Naudé LM, include the likes of Robert Mangaliso Sobukwe, Dr Anton Rupert & Dr Beyers Naudé, Rev. Andrew Murray, Prof James Kitching, Athol Fugard, Anna Neethling Pohl, DF Malan, Helen Martins, Andries Pretorius... Key features of the area include :

Tourism

Unique natural and cultural heritage : pristine landscapes, Baviaanskloof World Heritage Site, the Valley of Desolation, Camdeboo and Addo Elephant National Parks, Private Game Reserves, indigenous fauna and flora; beautiful Churches, interesting Museums (e.g. Reinet House, The Owl House and Piet Fourie Museum), craft shops and initiatives in Baviaanskloof, Steytlerville, Vondeling and Rietbron; other attractions such as the old Blackstone engines and historical cemeteries in Willowmore, the Valley of the Flags in Steytlerville, the Old Fort in Jansenville and many other Heritage Sites.

Agriculture

Biggest mohair producer in South Africa, wool and redmeat production (sheep, beef, goats), poultry, game and crop farming.

Public Amenities

Libraries; sport, recreational and educational facilities; banks & post offices in the main centres.

Health Care Facilities

Primary Health Care clinics in most towns, hospitals and other medical facilities in the larger towns and mobile clinics servicing rural areas.

#### <u>Commerce & Industry</u>

Mostly small businesses in most of the towns, with some larger industry and government departments in the bigger towns, such as Graaff-Reinet.

Infrastructure & Services

Good infrastructure and basic services (water, electricity, sanitation and refuse removal) in urban areas, with free basic services and subsidized support to qualifying indigent households.

Being situated in an arid area within the Sarah Baartman District, Dr Beyers Naudé LM faces many challenges, the biggest of which is water. Aberdeen and Nieu-Bethesda are in the fortunate position of having perennial springs that supply adequate and good quality water, which is used for both domestic consumption and irrigation. Graaff-Reinet gets its supply from the Nqweba Dam; when dry, the town is dependent on borehole water ~ an unreliable source as the water table drops drastically when the rain stays away... Other towns, such as Willowmore and Steytlerville, experience critical shortages at times and water quality is a problem in other areas, such as Jansenville. The lack of a sustainable and permanent water supply is probably the most inhibiting factor in the area's economic development, as it restricts both agricultural and industrial activities.

Of particular concern is how the vast geographic spread of the new Municipal area has impacted on the delimitation of Ward boundaries, placing towns and settlements that are not only huge distances apart, but have wholly different situations and needs, in the same Ward; making Community-based planning and service delivery very challenging for the new Municipality and its Ward Councillors. Some towns and settlements in the split Wards are also spatially divided by geographic features such as mountains, rivers and farms, and are not connected to each other by direct routes; some are more than 50 kilometres apart. Even the Camdeboo National Park appears to now straddle two Wards, namely 2 and 7 and the Camdeboo National Park / Mountain Zebra National Park Protected Environment, currently 275,082 hectares in extent, is a good example of a cross-boundary partnership. The Protected Environment straddles two Local and two District Municipal areas.

During October 2016 and into November 2016, the IDP practitioners in the employ of the Municipality, embarked on a series of Community-Based Planning workshops, which was the precursor to the development of a new 5-year Integrated Development Plan (IDP) for the new Council. All 14 Wards were covered and much information was obtained about the Wards by way of a thorough SWOT Analysis conducted during each focus-group workshop, which forms part of the Municipality's public participation programme. Critical issues were identified, and from those, the Ward Development Priorities were unpacked. Vision and Mission Statements were developed for every Ward; these in turn informed the IDP's institutional Vision and Mission, Development Priorities, etc. – they are dealt with in more detail under Chapter 4. The Municipality's 5 Development Priorities are as follows :

- INFRASTRUCTURE DEVELOPMENT
- OCMMUNITY DEVELOPMENT
- **1** INSTITUTIONAL DEVELOPMENT
- **4** LOCAL ECONOMIC DEVELOPMENT
- S BACK TO BASICS (i) Good Gove
  - (i) Good Governance & Public Participation(ii) Sound Financial Management

Throughout the IDP, the Municipality has demonstrated the extent to which it embraces and applies the Back-to-Basics principles. This is further reflected in the IDP's Project Register. **The implementation of this IDP** will be one of the Municipality's greatest challenges, faced as it is with severe financial constraints, inadequate capacity and insufficient resources – mainly as a result of the amalgamation. Dr Beyers Naudé LM inherited huge outstanding debt, assets that were in a poor and unusable state, and many that remain unaccounted for. The Municipality will require a great deal of support and assistance to achieve its strategic objectives, which aim to create a better situation and a good quality of life for its Communities, as encapsulated in the IDP's Vision Statement.

In accordance with the Municipal Structures Act 117/1998, Dr Beyers Naudé has been classified as a Category B Municipality; a collective executive system combined with a Ward participatory system. A collective executive system limits the exercise of executive authority to the Municipal Council itself and a Ward participatory system allows for matters of local concern to be dealt with by Ward Committees. Dr Beyers Naudé LM is a Grade 3 Municipality and does not qualify for an Executive Mayor; all but two of the 27 Councillors serve in their part-time capacity. Only the Mayor and Speaker have been allocated full-time status. There are 14 Ward Councillors and 13 Proportional Representatives.

The functional areas of competence of the Dr Beyers Naudé Local Municipality (EC101) are indicated in the table below and is the Municipality's authoritative mandate in terms of Section 156 of the South African Constitution, Act 108/1996 :

| SCHEDULE 4 : PART B   | STATUS                    | SCHEDULE 5 : PART B   | STATUS          |

Governance

### 1.1 Planning context

Chapter

The Integrated Development Plan is the basis for the managed development of the area and will be used by the political, business and community leadership to determine activities, operational plans and guide the allocation of resources for the period 2012 - 2017. The culture and practices of a service delivery focused Municipality is no longer compatible with a new developmental approach that seeks to transform the roles and responsibilities of Local Government.

The IDP should serve as a catalyst to change and adjust the operations, systems, processes and the culture of the Municipality and in turn the IDP itself needs to be informed by this ongoing change. IDPs therefore are not static; they are dynamic by nature and must adapt to the community's changing needs, as well as those of the environment. If the IDP is to be implemented successfully, the administration needs to benchmark the timeframes with which it deals with operational items within the system.

The ability of municipalities to be financially self-sustainable has become a strong pre-requisite of a developmental local government. Stimulating investment growth, increase in revenue and savings are some of the areas that could improve the cash flow and revenue of the Municipality. Section 26 of the Municipal Systems Act (32/2000) states that an Integrated Development Plan must reflect:

- The Municipal Council's Vision for long-term development of the Municipality with special emphasis on the Municipality's most critical development and internal transformation needs;
- An assessment of the existing levels of development in the Municipality, also stating which areas do not have access to basic municipal services;
- The Council's Development Priorities and Strategic Objectives for its elected term, including its Local Economic Development aims and its internal transformation needs;
- The Council's Development Strategies which must be aligned with any national or provincial sector plans and planning requirements binding on the Municipality in terms of legislation;
- A Spatial Development Framework (SDF) that must include the provision of basic guidelines for a Land Use Management System (LUMS) for the Municipality and be linked to an Investment Framework (IF);
- The Council's Operational Strategies and applicable Management Plans;
- A Financial Plan, which must include a budget projection for at least three years, and
- Key Performance Indicators (KPIs) & Performance Targets determined under Section 41.

The purpose of this Integrated Development Plan is to ensure that the resources available to the Municipality are directed at the delivery of projects and programmes that meet agreed upon Development Priorities. A well-designed and credible Integrated Development Plan should adjust to the many aspects that may influence its strategies, objectives, programmes, projects and indicators and therefore an annual review is critical to:

- Ensure the implementation of plans,
- Measure their development impact,
- Ensure the efficient use of resources,
- Measure the Council's performance.

### 1.3 General Amendments & MEC's Comments attended to

The development of a new IDP and its annual review is an extensive process, conducted in phases, starting in July with planning and ending 12 months later in June, with its distribution. Compilation of a new or revised IDP should include considerations based on, *inter alia*, previous years' IDP Assessments, input received from various parties and most importantly, from the Community. The following was considered or included during the third review of the Municipality's 2017 – 2022 IDP (5<sup>th</sup> Edition, 2021/22) :

- All existing statistical data was updated where possible; new data and general information added. The Comparative Analysis between Census 2001 and Census 2011 has been retained and augmented with the results of the 2016 Community Survey. Provisional staffing statistics will be amended later to correspond with the new Organogram and Placements.
- The Project Register (ref. Chapter 6) consists of two sections : (i) Municipal Capital Programme and (ii) External Programme (Sector Depts & Other). The Municipal Register consists of a list of activities **proposed** for implementation during the 5-year term of this IDP. Each year the Budget will indicate which projects can be funded and implemented; these are then listed separately and totalled, to show alignment between the IDP and the Capital Budget. Activities of Repairs & Maintenance nature are referred to the Operating Budget; however, provision has been made in the Project Register for a summary of Repairs & Maintenance allocations, in order to illustrate the extent to which the Municipality is looking after its infrastructure assets. LED and SPU operational programmes have similarly been included, as a requirement. The **SDBIP**'s KPIs and Targets are included in Chapter 6.
- Ongoing Programmes, phased or roll-over projects from the former Municipal Capital Project Registers were retained. A few new project entries have been included, with dedicated IDP numbers, but these were kept to a minimum, to avoid a "Wish List" scenario. Entries consist of a project value, heading or description, which should translate into KPIs in the SDBIP.
- Both the Capital Budget Schedule and the outcomes-based SDBIP now contain the IDP numbers of projects being funded and implemented in each financial year, making crossreferencing easier. The Government's **Back-to-Basics (B2B)** programme must be linked to the PMS, with monthly reporting to COGTA.
- Same type projects, e.g. "Tarring of Streets" are aggregated, to avoid duplication of entries in the Project Registers. The main action will appear as a going concern in each year's IDP, with the necessary adjustments to implementation period & annual budget.
- The IDP process included Community-Based Planning (CBP) sessions, such as focus group workshops in all 14 Wards during October and November 2016, as part of the IDP's Public Participation Programme. The Ward Development Priorities were determined and rated by workshop participants during the programme and are reviewed annually – in consultation with Communities and Ward Committees.
- Information on *inter alia* the SDF, WSDP, Drinking Water Quality and Waste Water Treatment Monitoring – where available – was included and statistical information on Basic Services Provision (service level indicators) updated. Included also are sections dealing with annual SONA & SOPA, SOMR, the National Development Plan, the Provincial Development Plan, the SDGs (as a follow-up to MDGs) and 14 Outcomes-based Delivery Agreements, with alignments illustrated. The COVID-19 pandemic and its impact on BNLM is a new inclusion.
- MEC's Comments : The 2020/21 IDP and previous years' Assessment results with MEC's Comments were referred to the IDP Steering Committee. Each year's Assessment Report doubles up as an Action Plan, with gaps highlighted, and circulated to all Directorates & Departments for attention. A deadline is set for response / implementation. Gaps are addressed wherever possible, but assistance is required with the development or review of Sector and Master Plans. There has also been consultation with regard to the District Development Model (DDM) and ensuring that local IDPs are aligned to its requirements.

## 1.4 Alignment : National, Provincial & District

The following strategic plans and perspectives inform the strategic direction of the IDP :

#### ✤ PRESIDENTIAL STATE OF THE NATION ADDRESS (SONA)

From 2016 to 2020 the annual SONAs focussed on the following issues and priorities :

A nine-point plan to ignite growth with focus on tourism, job creation and addressing the revitalising agriculture & agri-processing beneficiation programmes, energy challenge; promoting private-sector investment and implementing a more effective industrial policy; growing SMMEs, marine economy (Operation Phakisa), etc.; State reform and boosting role of parastatals with focus on ICT and broadband roll-out; upgrading of basic services and improving service delivery, road & transport infrastructure; processing of land claims, restriction of land-ownership by foreigners, improvement of police services, relief to droughtaffected communities, roll-out of nuclear programmes, curbing of wasteful expenditure and importing scarce skills by revising the migration policy; creating a stable labour market; better health care and education facilities; fast-tracking housing delivery, black-ownership, land reform & redistribution; tackling social ills such as poverty, crime, corruption and substance abuse; expediting workplace transformation, empowerment of women, compulsory subcontracting 30% of business to black-owned enterprise, improved education and creation of internships, Investment Summits, transformation in Rail, Mining & Agriculture sectors, stimulating foreign investment and Youth employment; reconfiguration of Eskom and other SOEs; actively addressing Climate Crisis, State Capture and Gender-based Violence (amendment of Act), etc.

#### On 11/02/2021, the following key points were highlighted by President Cyril Ramaphosa

"Rising like the Fynbos"

- Primary aim will be to defeat the coronavirus pandemic with a massive vaccination rollout;
- (2) To accelerate our economic recovery through phased reopening of the economy and a stimulus programme,
- (3) To implement economic reforms to create sustainable jobs and drive inclusive growth, and
- (4) To fight corruption and strengthen the State through continued efforts to turn around law enforcement bodies and to fill critical leadership positions with capable, experienced and trustworthy professionals.

There will also be focus on land redistribution, addressing crime and violence and restoring operational and financial health at State-Owned Enterprise.

#### **STATE OF THE PROVINCE ADDRESS (SOPA)**

"To reverse the legacy of apartheid spatial planning in the Eastern Cape."

The Provincial Address takes its cue from the SONA. In his speech of 23/02/2021, Premier Oscar Mabuyane placed much emphasis on sustainable (instead of short-term) interventions as enablers to reconstruct and recover South Africa's economy. A number of strategic infrastructure programmes have been developed for this purpose and are being rolled out. The Premier mentioned various programmes that were aimed at physical infrastructure development and job creation and that major investment had already been attracted.

This was in line with the aims and objectives of the Economic Reconstruction and Recovery Plan that was unveiled by President Cyril Ramaphosa – with particular focus on reversing the impact of COVID-19.

Not all of the SONA and SOPA focus areas fall within Local Government's service delivery mandate, but below is an illustration of the extent to which Dr Beyers Naudé LM is able to align them to its five Development Priorities, with various interventions proposed in the IDP's Project Register.

| Change trajectory of energy generation.<br>Increase investment in commuter rail<br>network, port & transport infrastructure.<br>Continued investment in IT and basic<br>services infrastructure, incl. rural roads.<br>Invest in social housing & student<br>accommodation infrastructure.<br>Spatial transformation; Smart Cities.                                | Infrastructure<br>Development  | Increased infrastructure investment.<br>Develop transport Infrastructure.<br>Upgrade ICT facilities & networks.<br>Spatial integration of human settle-<br>ments.<br>Improve Municipal service delivery<br>infrastructure.   |
|--|--|--|
| Improve early childhood development.<br>Improve educational curriculums and<br>facilities, as well as accessibility.<br>Specialised units for crime prevention;<br>improved police visibility & training.<br>More focussed interventions dealing<br>with violence against women.<br>Encourage citizens to report crime.<br>Improve quality of and access to health | Community<br>Development   | Improve safety & mobility of citizens.<br>Improve access to schools, health<br>centres, etc.<br>Improve health care and educational<br>facilities; special needs facilities.<br>Youth empowerment; skills training.<br>Social protection, crime prevention<br>and anti-poverty programmes.<br>Promote social cohesion.                                     |
| care; focus on people with disabilities.<br>Effective implementation and coordi-<br>nation through DDM that will build<br>capability & capacity of the State.<br>Monitoring of and improved support to<br>Municipalities.  | Institutional<br>Development   | Improve working environment of<br>Government employees.<br>Better co-ordinated Government<br>services.<br>Improve support to Municipalities.   |
| Establish sovereign wealth fund.<br>Rationalise and restructure SOEs to<br>serve strategic economic develop-<br>mental purposes.<br>Creating operating environment<br>conducive to business growth and<br>investment; SMME development.<br>Policing of tourist attraction areas.<br>Labour-intensive job creation through  | Local Economic<br>Development  | Transform economy through SMME<br>development, tourism, land release<br>and catalytic projects.<br>Job creation and socio-economic<br>development focussed on the Youth.<br>Expand Agricultural sector and grow<br>industry in rural areas; continuation<br>of the Small Town Revitalization<br>Programme.   |
| <ul> <li>skills transfer with focus on Youth.</li> <li>More focussed training for self-<br/>employment and entrepreneurship.</li> <li>Fix public finances. Contain public<br/>wage bill and reduce wastage.</li> <li>Reduce irregular expenditure.</li> <li>Promote financially sustainable SOEs.</li> <li>Fighting corruption and state capture.</li> </ul>       | Back to Basics<br>(Good Governance and<br>Sound Financial<br>Management) | Improved functionality of IGR; more<br>effective coordination & integration<br>of plans & services through DDM.<br>Effect a Batho Pele culture change<br>in public administration; become<br>service orientated and up standard.<br>Advocating development that is<br>environmentally responsible.<br>Clean Indigent Registers and weed<br>out corruption. |

#### ✤ STATE OF THE MUNICIPALITY REPORT (SOMR 2018)

On 27/11/2018 Municipal Manager Dr Eddie Rankwana presented his State of the Municipality Report to EXCO for consideration. It was approved by Council on 13/12/2018. The Report can best be described as a practical assessment of the situation as it presently exists, with recommendations for actions to be implemented to remedy areas requiring urgent and critical intervention. Emphasis was placed on expediting the "turnaround of the Municipality and to take the required action to reintroduce discipline and ethics and to address risks facing the Municipality; to eradicate fraud and corruption.

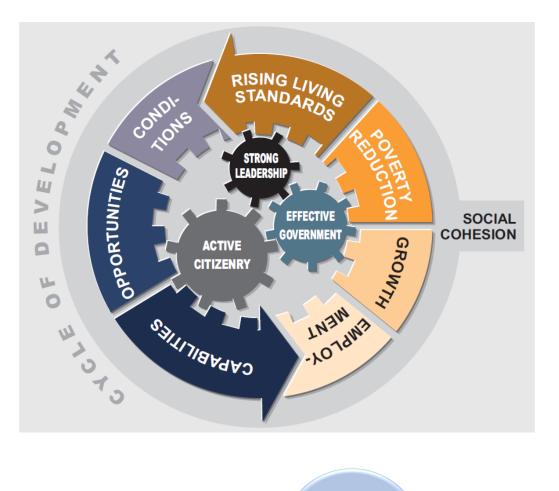

The following recommendations were made and they are linked to the IDP's 5 Development Priorities below. Implementation should go hand-in-hand with the finalization, actioning and monitoring of the Municipality's **Turnaround Strategy**, which was developed early in 2018.

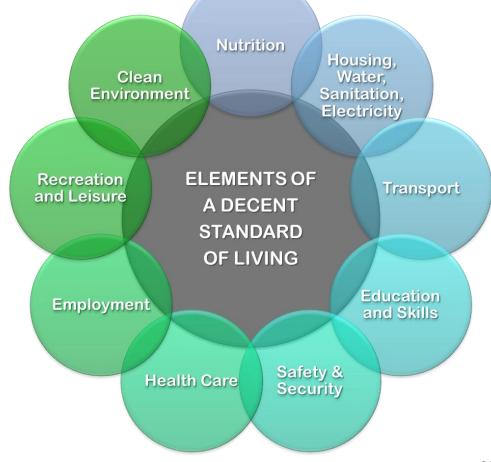

| Infrastructure<br>Development  | <ul> <li>Approach Dept Roads, Transport &amp; Public Works for support by way of plant &amp; equipment for service delivery purposes (COGTA &amp; SBDM to assist with negotiations),</li> <li>Waste Management : expedite investigation into green technologies and recycling; all landfill sites to be registered.</li> </ul>   |
|--|--|
| Community<br>Development   | <ul> <li>Libraries : DSRAC to attend to non-functioning computers and unfunded mandate (annual subsidy for service),</li> <li>Community Safety &amp; Law Enforcement : <ul> <li>Re-organizing and strengthening of Law Enforcement function through placement/recruitment/training of suitable staff,</li> <li>Establishment of pounds for stray animals,</li> <li>By-laws to be expedited (promulgation; strict and consistent application); formalization of car guards and similar operations.</li> </ul> </li> </ul>   |
| Institutional<br>Development   | <ul> <li>Invest in a biometric staff attendance &amp; monitoring clock-in system,</li> <li>ICT Policies and drastic improvement of ICT Systems are required,</li> <li>All incidents of abuse of Municipal assets be investigated and the necessary disciplinary measures to be applied,</li> <li>Development and application of Staff Policies and Strategies, such as Anti-Fraud &amp; Corruption, Ethics, Risk Management, Transfer of Skills, etc. and that staff be workshopped in all these aspects,</li> <li>Improving Emotional Intelligence within the Institution by empowering staff, to improve their Customer Service and all other operations – i.e. Ease, Effectiveness and Emotion – with Management leading by example.</li> </ul> |
| Local Economic<br>Development  | <ul> <li>Restructuring of and alignment between Municipal Planning (Urban-,<br/>Spatial- &amp; Human Settlement Planning; Land Use &amp; Management),<br/>LED and the Integrated Urban Development Framework (IUDF) to<br/>effect coherent development and stimulate socio-economic growth.</li> </ul>   |
| Back to Basics<br>(Good Governance and<br>Sound Financial<br>Management) | <ul> <li>Improve Risk Management throughout the Municipality, including risk mitigation,</li> <li>Evaluate and improve records management systems to improve accountability and retrieval of documents for audit purposes,</li> <li>Increase focus on Debt Collection, especially from Private &amp; Public Sector, and expand the Revenue Base,</li> <li>Selling of un- or underutilized land and other assets not required for service delivery,</li> <li>Other cost-cutting measures to be implemented, including placement and relocation of staff, cancelling of contracts for services no longer required.</li> </ul>  |

#### ✤ NATIONAL DEVELOPMENT PLAN 2030

#### ...AN APPROACH TO CHANGE

#### **SYNOPSIS**

#### THE PLAN IN BRIEF

#### By 2030

- Eliminate income poverty Reduce the proportion of households with a monthly income below R419 per person (in 2009 prices) from 39 percent to zero.
- Reduce inequality The Gini coefficient should fall from 0.69 to 0.6.

#### **Enabling milestones**

- Increase employment from 13 million in 2010 to 24 million in 2030.
- Raise per capita income from R50 000 in 2010 to R120 000 by 2030.
- Increase the share of national income of the bottom
   40 percent from 6 percent to 10 percent.
- Establish a competitive base of infrastructure, human resources and regulatory frameworks.
- Ensure that skilled, technical, professional and managerial posts better reflect the country's racial, gender and disability makeup.
- Broaden ownership of assets to historically disadvantaged groups.
- Increase the quality of education so that all children have at least two years of preschool education and all children in grade 3 can read and write.
- Provide affordable access to quality health care while promoting health and wellbeing.
- Establish effective, safe and affordable public transport.
- Produce sufficient energy to support industry at competitive prices, ensuring access for poor households, while reducing carbon emissions per unit of power by about one-third.
- Ensure that all South Africans have access to clean running water in their homes.
- Make high-speed broadband internet universally available at competitive prices.
- Realise a food trade surplus, with one-third produced by small-scale farmers or households.
- Ensure household food and nutrition security.
- Entrench a social security system covering all working people, with social protection for the poor and other

- groups in need, such as children and people with disabilities.
- Realise a developmental, capable and ethical state that treats citizens with dignity.
- Ensure that all people live safely, with an independent and fair criminal justice system.
- Broaden social cohesion and unity while redressing the inequities of the past.
- Play a leading role in continental development, economic integration and human rights.

#### **Critical actions**

- A social compact to reduce poverty and inequality, and raise employment and investment.
- A strategy to address poverty and its impacts by broadening access to employment, strengthening the social wage, improving public transport and raising rural incomes.
- Steps by the state to professionalise the public service, strengthen accountability, improve coordination and prosecute corruption.
- Boost private investment in labour-intensive areas, competitiveness and exports, with adjustments to lower the risk of hiring younger workers.
- An education accountability chain, with lines of responsibility from state to classroom.
- Phase in national health insurance, with a focus on upgrading public health facilities, producing more health professionals and reducing the relative cost of private health care.
- Public infrastructure investment at 10 percent of gross domestic product (GDP), financed through tariffs, public-private partnerships, taxes and loans and focused on transport, energy and water.
- Interventions to ensure environmental sustainability and resilience to future shocks.
- New spatial norms and standards densifying cities, improving transport, locating jobs where people live, upgrading informal settlements and fixing housing market gaps.
- Reduce crime by strengthening criminal justice and improving community environments.

#### Poverty and Inequality must be converted into Prosperity and Equity.

#### NDP VISION STATEMENT

We, the people of South Africa, have journeyed far since the long lines of our first democratic election on 27 April 1994, when we elected a government for us all.

*Now* in 2030 we live in a country which we have remade.

**Therefore**, in 2030, we experience daily how we participate fully in efforts to liberate ourselves from conditions that hinder the flowering of our talents.

We all see to it and assist to that all life's enablers are available in a humane way.

We all have actively set out to change our lives in ways which also benefit the broader community.

**We** all assist the institutions we have creatively redesigned to meet our varied needs; we reach out across communities to strengthen our resolve to live with honesty, to be set against corruption and dehumanising actions.

**We** know that those to whom we have given the privilege to govern our land, do so on our behalf and for the benefit of all the people.

**We** say to one another "I cannot be without you, without you this South African community is an incomplete community, without one single person, without one single group, without the region or the continent, we are not the best that we can be".

**We** acknowledge that each and every one of us is intimately and inextricably of this earth with its beauty and life-giving sources; that our lives on earth are both enriched and complicated by what we have contributed to its condition.

**South Africa** belongs to all its peoples. Now, in 2030, our story keeps growing as if spring is always with us. Once, we uttered the dream of a rainbow. Now we see it, living it. It does not curve over the sky. It is refracted in each one of us at home, in the community, in the city, and across the land, in an abundance of colour.

**When** we see it in the faces of our children, we know: there will always be, for us, a worthy future.

#### ちみ

On 16 November 2011, the Draft National Development Plan was introduced to the former Camdeboo IDP Representative Forum; similarly the Municipalities of Baviaans and Ikwezi sensitised their stakeholders about the Plan. There was a distinct correlation between the issues that had emanated from Community-Based Planning Workshops held in 2011, and the NDP's diagnostic results. (Please refer the schematic illustration in Chapter 6.)

Dr Beyers Naudé Municipality, Sector Departments and other Developmental Partners should all strive to contribute towards achieving the milestones set out in the National Development Plan, by aligning their programmes and projects accordingly. At the same time the relevance of the **MILLENNIUM DEVELOPMENT GOALS (2015)**, succeeded by the **SUSTAINABLE DEVELOPMENT GOALS**, must be taken into account.

The MDGs were implemented with varying degrees of success. The programme was never properly rolled out amongst the Provincial Departments (or monitored) and also not institutionalised within Local Government, going on to say that not all were the responsibility of Municipalities.

# Millennium Development Goals

The MDGs originated from a Declaration issued by the United Nations and were established at a Millennium Summit held in 2000. The Declaration asserts that "every individual has the right to dignity, freedom, equality, a basic standard of living that includes freedom from hunger and violence, and encourages tolerance and solidarity". All 193 United Nations member states and at least 23 international organizations were party to the Agreement which aims to "encourage development by improving social and economic conditions in the world's poorest countries". Eight anti-poverty goals have to be achieved by 2015. **ERADICATE EXTREME POVERTY & HUNGER** ACHIEVE UNIVERSAL PRIMARY EDUCATION PROMOTE GENDER EQUALITY AND EMPOWER Q³ WOMEN Ĩ U **REDUCE CHILD MORTALITY RATES** ĥ **IMPROVE MATERNAL HEALTH** Ŧ COMBAT HIV/AIDS, MALARIA & OTHER DISEASES ENSURE ENVIRONMENTAL SUSTAINABILITY **DEVELOP A GLOBAL PARTNERSHIP FOR** DEVELOPMENT

As a signatory to the Agreement, South Africa made a commitment to achieve these goals. In this instance Municipalities had an important role to play by ensuring that their social and economic infrastructure was adequate and properly maintained; that communities lived in clean and healthy environments, with well-managed natural resources; had access to basic services and that these services were of a good quality; that IGR and IDP fora, as well as other important structures, were not only in place, but fully functional and that the EPWP, CWP and other job creation or poverty-alleviation programmes and initiatives were actively supported and ongoing.

#### ♦ SUSTAINABLE DEVELOPMENT GOALS $\rightarrow$ 2030

As the deadline for the MDG Agreement approached, and taking into account the monitoring results that were released, it became clear that many countries, including South Africa, would not attain the desired outcomes of the 8 anti-poverty goals they set out to achieve. During the course of 2014, again at the initiative of the United Nations, a set of 17 Sustainable Development Goals (SDGs) were developed; some a continuation of the MDGs post 2015 – aimed at Provincial and

National level interventions, with others more appropriately designed for implementation at a Local Government level. Being a progressive Municipality, Dr Beyers Naudé was in a position to align itself with the principles of the SDGs :

#### ✤ PROVINCIAL DEVELOPMENT PLAN

...A VISION FOR 2030

### **PDP VISION STATEMENT**

*In 2030* we will see the fruits of careful and collective hard work towards this commitment in :

- \* An Eastern Cape with a proliferation of innovation and industry, and citizens who can feed themselves.
- \* All Children and Youth manifesting our shared belief that they are the cornerstone of the future.
- \* Participatory local development action-driven by committed, capable citizens and conscientious institutional agents.

**The journey** continues, as we sustain what we have worked for and gained, and continue to innovate and build beyond 2030.

## **Social Cohesion**

Active Citizenry + Effective Government + Strong Leadership

Dr Beyers Naudé Municipality has aligned itself with the aims and objectives of the PDP by providing strong administrative and political Leadership that is committed to effective and transparent Government; continuously promoting and supporting an active and participatory Citizenry.

The Eastern Cape's Provincial Development Plan has 5 clear Goals, hinged on a rural development bias until spatial equity has been established :

The PDP aims to develop a growing, inclusive and equitable economy. This includes a larger and more efficient provincial economy that optimally exploits the competitive advantages of the Eastern Cape, increased employment and reduced inequalities of income and wealth.

The PDP seeks to ensure that people define their identity, sustain their livelihoods, live healthy lives and raise healthy families; develop a just society and economy and play an effective role in the development of their communities, as well as the politics and governance of the state at all levels.

In 2030 the people of the Eastern Cape live long and healthy lives, with a life expectancy of 70 years and an AIDS-free under-20 generation. This will be achieved through a health system that provides quality healthcare to people in need, values patients, cares for communities, provides reliable service and values partnerships. The system should rest on a primary healthcare platform, integrated across primary, secondary and tertiary levels.

The PDP seeks to ensure that by 2030, the Eastern Cape is characterised by vibrant communities in which people can responsibly exercise their growing freedoms. The Plan aims to address spatial disparities across the province, and seeks to guide the development and use of instruments to achieve this.

The PDP seeks to build capable, conscientious and accountable institutions that engender and sustain development partnerships across the public, civic and private sectors. It aims to construct and mobilise multi-agency partnerships for development, encouraging the emergence of a strong, capable, independent and responsible civil society committed to the province's development.

# THE FOLLOWING KEY BUILDING BLOCKS HAVE BEEN IDENTIFIED FOR THE LONG-TERM DEVELOPMENT OF THE EASTERN CAPE PROVINCE :

#### ILIMA LABANTU

Multi-faceted agriculture-driven development to promote consciousness and participation in agricultural activity and production across scale.

#### EMATHOLENI ! CHILDREN FIRST !

Multi-institutional collaboration to ensure that all children are provided an equal start to quality development and growth.

#### INFRASTRUCTURE FOR AN EQUITABLE SOCIAL AND ECONOMIC DEVELOPMENT

Fundamental to social stability, vibrant, cohesive communities & economic inclusion.

#### **CAPABILITIES FOR LOCAL ACTION**

3 key elements : (i) participatory development action, (ii) joined-up local action co-ordinated via strengthened local government, and (iii) citizen capabilities – consciousness, skills, organisation.

#### Dr. Beyers Naudé MUNICIPALITY | MUNISIPALITEIT | UMASIPALA rising together for development

#### ♦ OUTCOME 9

During 2010, Government drew up 12 Outcomes-based Delivery Agreements that, combined, reflect its Delivery & Implementation Plans for the top priorities that must be addressed by 2014. This is illustrated with more detail in Chapter 6. Outcome 9 is one of these Agreements, and applies specifically to Municipalities. This commitment remains in place.

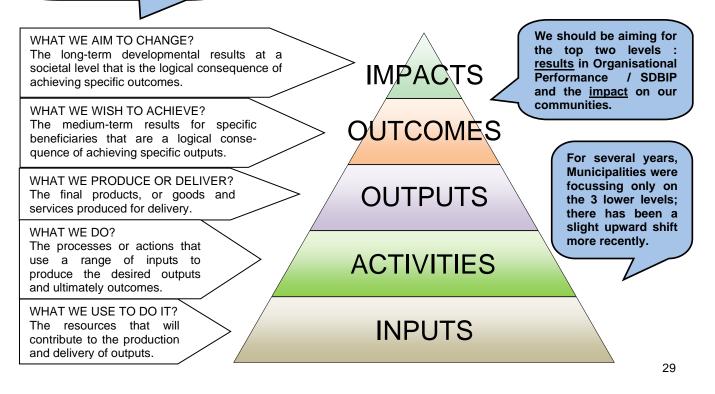

#### "A responsive, accountable, effective and efficient Local Government System"

In accordance with the above Vision Statement, Outcome 9 is aimed at turning around the current weak and disorganized status of most Municipalities, by focusing on 7 critical areas that in turn are linked to 7 corresponding outputs :

|   | CRITICAL ISSUE  | CRITICAL OUTPUT  |  |  |
|---|---|--|--|--|
| 1 | Developing a more rigorous, data driven and detailed<br>segmentation of Municipalities that better reflect the varied<br>capacities and contexts within Municipalities and lays the<br>basis for a differentiated approach to Municipal financing,<br>planning and support. | <ul> <li>Implement a differentiated approach to</li> <li>Municipal financing, planning and support.</li> </ul> |  |  |
| 2 | Ensuring improved access to essential services.   | Improving access to basic services.  |  |  |
| 3 | Initiating ward-based programmes to sustain livelihoods.  | ➔ Implementation of the Community<br>Works Programme (CWP).  |  |  |
| 4 | Contributing to the achievement of sustainable human settlements and quality neighbourhoods.  | • Actions supportive of the human settlement outcomes.   |  |  |
| 5 | Strengthening participatory governance.   | <ul> <li>Deepen democracy through a refined<br/>Ward Committee model.</li> </ul>                               |  |  |
| 6 | Strengthening the administrative and financial capability of Municipalities.  | Administrative and financial capability.   |  |  |
| 7 | Addressing co-ordination problems and strengthening<br>cross-departmental initiatives   | Single window of co-ordination.  |  |  |

These are our Indicators

The Outcomes-based approach can best be illustrated as follows :

#### ✤ MEDIUM TERM STRATEGIC FRAMEWORK (MTSF)

The MTSF was first issued in July 2009 by the Minister in the Presidency (Planning) and is a Framework that guided the Government's programme in its Electoral Mandate Period from 2009 to 2014. Its basic thrust was to "Improve the conditions of life of all South Africans and to contribute to building a better Africa and a better world". The original MTSF consisted of 10 Strategic Priorities, based on the development challenges identified in South Africa, and all spheres of Government are required to align themselves with the MTSF in terms of their planning and resource allocation. The priorities were :

- 1. Speeding up growth and transforming the economy to create decent work and sustainable livelihoods,
- 2. Massive programme to build economic and social infrastructure,
- 3. Comprehensive rural development strategy linked to land and agrarian reform and food security,
- 4. Strengthen the skills and human resource base,
- 5. Improve the health profile of all South Africans,
- 6. Intensify the fight against crime,
- 7. Build cohesive, caring and sustainable communities,
- 8. Pursuing African advancement and enhanced international co-operation,
- 9. Sustainable resource management and use,
- 10. Building a developmental state, including improvement of public services and strengthening democratic institutions.

Alignment with the MTSF's Strategic Priorities is further illustrated in Chapter 6 : Project Register & Implementation, which was subsequently updated with the 8 Priorities of the 2014 – 2019 MTSF and more recently with the 7 Priorities of the 2019 – 2024 MTSF.

#### ✤ LOCAL GOVERNMENT TURNAROUND STRATEGY (LGTAS)

In 2009 COGTA conducted provincial assessments of all Municipalities. Analysis of the results obtained through this exercise set the foundation for what is now widely known as the Turnaround Strategy. In accordance with National directive, each and every Municipality had to develop its own Turnaround Strategy (MTAS), that would elevate the functioning of that Municipality beyond mere compliance to a level of performance excellence aimed at making a meaningful contribution towards building the Developmental State of South Africa; creating an *Ideal Municipality.* 

In order to achieve this, the former Camdeboo, Ikwezi and Baviaans Municipalities had to align themselves with the LGTAS' five strategic Objectives, which were :

- Ensure that municipalities meet the *basic service needs* of communities,
- **9** Build clean, effective, efficient, *responsive and accountable* local government,
- Improve performance and *professionalism* in municipalities,
- Improve national and provincial policy, oversight and support,
- Strengthen *partnerships* between local government, communities and civil society.

During 2010 in-depth assessments were conducted of Municipalities' capacity in 10 predetermined Focus Areas. Based on the results, the applicable Municipalities had to implement appropriate interventions and report quarterly on progress to COGTA, as well as the District. Prior to the amalgamations in August 2016, the annual IDP Assessments showed a year-on-year improvement in the three former Municipalities' IDPs, indicative of an improvement in their credibility, **but not necessarily in their implementation, nor the Municipality's performance**.

| KEY PERFORMANCE<br>AREA (KPA)                                     | AVERAGE<br>RATING OF<br>2016/17 IDPs | RATING OF<br>2017/18 IDP   | RATING OF<br>2018/19 IDP   | RATING OF<br>2019/20 IDP   | RATING OF<br>2020/21 IDP | COLOUR<br>CODE |  |
|---|--------------------------------------|----------------------------|----------------------------|----------------------------|--------------------------|----------------|--|
| Organizational<br>Transformation & Insti-<br>tutional Development | High                                 | Medium                     | Medium                     | High                       | High                     | Low            |  |

Dr Beyers Naudé LM is committed to attending to the gaps identified in its IDP and will address the shortcomings as speedily as it is able to do, given the financial constraints and other challenges it is facing. A **Financial Recovery Plan** was developed in 2017 and implemented. A reviewed version was adopted by Council in November 2020. A **Municipal Turnaround Strategy** was developed in January 2018 – the product of a 3-day Strategic Planning Workshop. The Draft MTAS was workshopped with EXCO in February 2020; its Action Plans were updated and the completed document adopted by Council on 27/05/2020. Progress is being tracked.

#### ✤ FIVE YEAR LOCAL GOVERNMENT STRATEGIC AGENDA (LGSA)

This 5-year programme stemmed from Project Consolidate and was implemented during 2006. It had three main Objectives :

- → Mainstreaming hands-on support to Local Government to improve municipal governance, performance and accountability;
- → Addressing the structure and governance arrangements of the State in order to better strengthen, support and monitor Local Government; and
- → Refining and strengthening the policy, regulatory and fiscal environment for Local Government and giving greater attention to the enforcement measures.

To achieve this, Municipalities were required to align themselves with the LGSA's five Key Performance Areas, namely :

- **0** MUNICIPAL TRANSFORMATION AND ORGANIZATIONAL DEVELOPMENT
- **2** BASIC SERVICE DELIVERY
- **6** LOCAL ECONOMIC DEVELOPMENT
- MUNICIPAL FINANCIAL VIABILITY AND MANAGEMENT
- **G** GOOD GOVERNANCE AND PUBLIC PARTICIPATION

Afore-mentioned KPAs remain in place and performance in each can be tracked through the Municipality's Section 46 Annual Performance Report.

Similarly the IDP is assessed annually, but with KPAs structured slightly differently :

- **0** ORGANIZATIONAL TRANSFORMATION & INSTITUTIONAL DEVELOPMENT
- **2** SERVICE DELIVERY & INFRASTRUCTURE PLANNING
- **6** LOCAL ECONOMIC DEVELOPMENT
- **G** FINANCIAL VIABILITY
- **GOOD GOVERNANCE & PUBLIC PARTICIPATION**

(KPA 2 includes Human Settlement & Spatial Planning, as well as an Environmental Analysis.)

#### ✤ COMPULSORY KEY PERFORMANCE INDICATORS (REGULATION 10)

In accordance with Section 43 of the Municipal Systems Act 32/2000, the following General KPIs were prescribed by the Minister and gazetted on 24/08/2001 (Gov. Gazette No. 22605) :

- 1. The percentage of households with access to basic level of water, sanitation, electricity and solid waste removal,
- 2. The percentage of households earning less than R1,100 per month with access to free basic services,
- 3. The percentage of a municipality's Capital Budget actually spent on Capital Projects identified for a particular Financial Year in terms of the Municipality's Integrated Development Plan,
- 4. The number of jobs created through the Municipality's Local Economic Development initiatives, including Capital Projects,
- 5. The number of people from employment equity target groups employed in the three highest levels of management in compliance with the Municipality's approved Employment Equity Plan,
- 6. The percentage of a Municipality's Budget actually spent on implementing its Workplace Skills Plan, and
- 7. Financial viability as expressed by applying specific ratios (of which there are three).

**NB** : The Municipality must report on its achievements in afore-mentioned regard in its Annual Report, however some of these indicators are provided in Chapter 3 of the IDP, under the respective Key Performance Areas.

The Municipality's Institutional KPIs are contained within the Service Delivery and Budget Implementation Plan (SDBIP), which has been inserted with the IDP's Project Register.

#### ✤ NATIONAL SPATIAL DEVELOPMENT PERSPECTIVE (NSDP)

The NSDP gives an indication from a National and Presidential level of how the Government sees public investment being distributed. The NSDP is considered to be Government's vision of South Africa's spatial development. A number of principles were formulated to guide decision making about infrastructure and investment. It is not a plan, but a perspective.

The thinking that informs the NSDP includes :

- The resource constraints of government and appropriate use of resources.
- The allocation of funds for the best impact.
- The NSDP assists in making choices by providing spatial criteria.
- Potential of a place develops over a long time and it is difficult to change these patterns.
- Different regions have different economic and development potential.
- Strong and effective institutions are critical for growth and development.
- A paradigm shift is required where people are seen as resources instead of consumers of resources.
- Investment must be made in people and not in places.
- Distinguish between an under developed area versus an area with low development potential.
- People will move to places where they find a sustainable livelihood.
- Look at what is our potential versus what are our needs.
- New areas of potential are developed and discovered. Potential is dynamic over time.

Growth and Development objectives :

- Focus economic growth in areas where the investment will be effective and sustainable.
- Develop on the basis of local potential
- Provide for the basic needs throughout the country.

#### NSDP principles :

- Economic growth is a prerequisite.
- Infrastructure investment beyond basic service delivery in areas of high potential.
- Invest in people and not places.
- Focus on areas with high levels of poverty and high development potential.
- Focus on provision of basic services in areas with low development potential.
- For future settlement patterns, focus on corridors, nodes, growth centres and densification.
- Compliance (one way) with NSDP is not possible, but a two-way alignment is possible.
- Potential is not about a wish or an idea. It must exist e.g. in the form of resources etc.

#### ✤ PROVINCIAL SPATIAL DEVELOPMENT PLAN (PSDP)

The PSDP is guided by District and Local Municipal SDFs and Area Based Plans, and focuses on 7 Key Development Issues, each with its own set of Values, namely :

- → Environment,
- → Social Development and Human Settlement,
- → Rural Development,
- → Infrastructure,
- → Economic Development,
- → Human Resources Development, and
- → Governance.

The PSDP's Philosophy is supported by the description of what its conceptual Vision aspires to achieve :

The future spatial perspective of the Province over the next 15 to 20 years could be conceptualized in the context of the Provincial Growth and Development Plan vision of a "Poverty free Eastern Cape". Understanding that such a vision would be founded upon a concept of a "Modern, ecologically sustainable economy based in agriculture, tourism and industry". It is believed the future spatial perspective would comprise a *Spatial Development Framework of Managed Human Settlements clustered in settlement regions and corridors, alongside productive regions, managed ecological natural resource areas and connected to a network of strategic transportation routes, open to the global, national and provincial economy.* 

Its core values are underpinned by the following Spatial Development Principles :

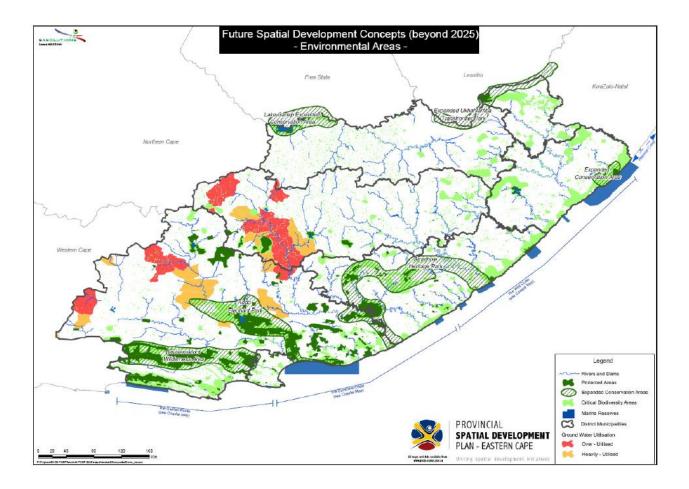

- → Conserving Natural Resource Areas,
- → Embracing Settlement Regions,
- → The Importance of all Human Settlements,
- ➔ Integration through Focus Areas, and
- → Focused Development along Strategic Transport Routes.

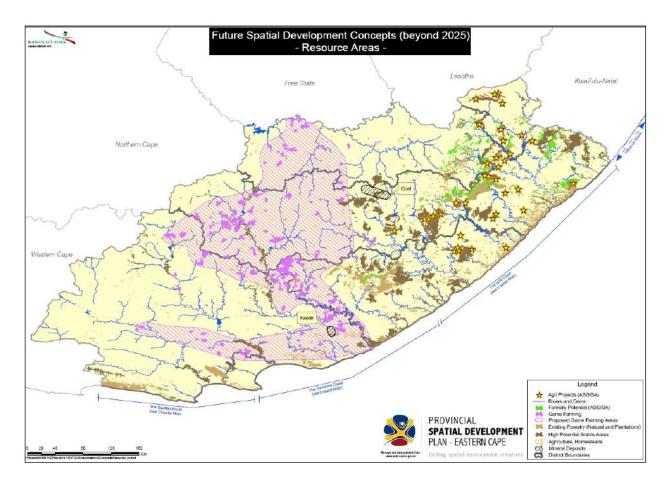

In the Chapter dealing with Dr Beyers Naudé's SDF (KPA 2), it is emphasized that the NSDP and PSDP must be brought into consideration to ensure better integration of plans, as well as alignment and compliance with National and Provincial directives and strategies ~ including the PGDP. Maps appearing on the following two pages were sourced from the PSDP, and depict the following Future Spatial Development Concepts in the Province (beyond 2025):

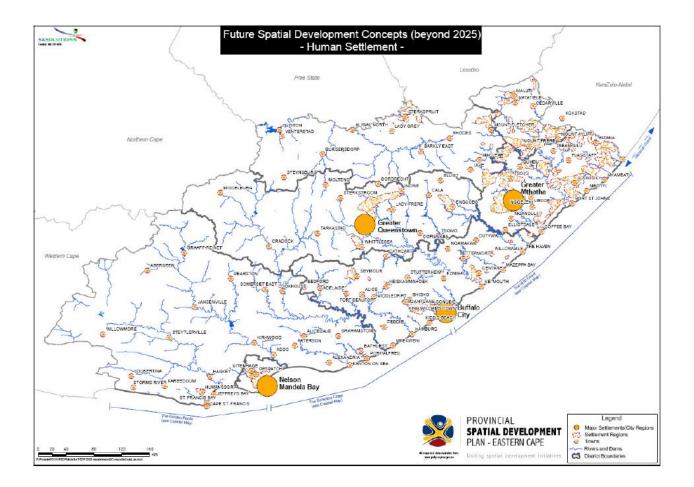

- Environmental Areas
- Resource Areas
- Human Settlement
- Infrastructure

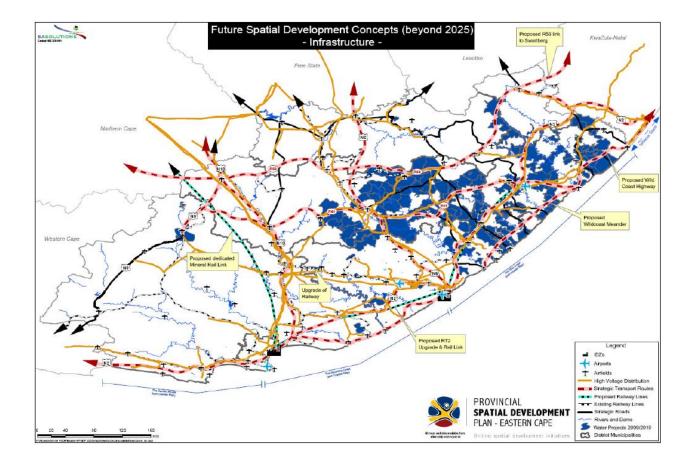

(NB : At the time of completing Council's new 5-year Integrated Development Plan and subsequent reviews thereof, the SDF for Dr Beyers Naudé LM had not yet been developed. However, the process was initiated in February 2020, with the publication of a notice, calling for stakeholders to register. Unfortunately implementation was delayed due to the National State of Disaster declaration early in March 2020, and the resultant nationwide COVID-19 pandemic Lockdown – effective from 27 March 2020. Regulations promulgated in this regard prohibited public meetings and gatherings, which are essential to the Public Participation aspect of developing a new SDF. As at March 2021, the Lockdown remains in place, but with relaxed regulations on Level 1. Subsequently the SDF process has progressed and a Draft document is currently available for Public Inspection & Comments, for a period of 60 days. A synopsis of the Municipality's SDF will be provided in Chapter 3, under KPA 2, as soon as the process is concluded.)

#### ✤ SARAH BAARTMAN DISTRICT MUNICIPALITY : INTEGRATED DEVELOPMENT PLAN 2017 - 2022

## <u>VISION</u>

An innovative and dynamic Municipality striving to improve the quality of life for all communities in the District.

### <u>MISSION</u>

Co-ordinate, support and provide sustainable services and promote socio-economic development.

The five Development Priority areas identified in the 2017 - 2022 Sarah Baartman DM IDP are :

| 1. | BASIC S  | ERVICE DELIVERY AND INFRASTRUCTURE DEVELOPMENT  |
|----|--|---|
|    | Objective 1  | To provide support to LMs on planning and implementation of bulk water supply projects, contributing to the reduction of the backlog. |
|    | Objective 2  | Ensure that WSA/WSP functions have been reviewed and concluded.   |
|    | Objective 3  | To assist LMs that they all receive a blue drop and green drop status.  |
|    | Objective 4  | To support LMs in ensuring that all communities have access to decent sanitation.   |
|    | Objective 5  | To ensure that all transport plans for all LMs are in place and reviewed.   |
|    | Objective 6  | To promote integration between spatial planning and transportation planning to achieve sustainable human settlements.                 |
|    | Objective 7  | To ensure that the IDPs of the LMs are in place and are annually reviewed.  |
|    | To provide capacity to LMs on town and regional planning, as well as environmental management. |   |
|    | Objective 9  | To provide roads infrastructure from basic service to a higher level in key strategic areas.  |
|    | Objective 10   | To provide support on cleanliness of towns and townships and to mitigate health risks posed by each landfill site in all the 7 LMs.   |
|    | Objective 11   | To reduce the effects of stormwater in prone areas in the District.   |
|    | Objective 12   | To provide costed infrastructure plans.   |
|    | Objective 13   | To promote and co-ordinate integrated Spatial Planning in the District.   |
|    | Objective 14   | To provide effective fire-fighting to all LMs in the District.  |
|    | Objective 15   | To effectively monitor and jointly manage Environmental Health Services (EHS) in all of the LMs.                                      |
|    | Objective 16   | To mitigate disaster events in all LMs.   |
| 2. |  | GOOD GOVERNANCE AND PUBLIC PARTICIPATION  |
|    | Objective 1  | To reduce the impact of HIV/AIDS in the District.   |
|    | Objective 2  | To ensure effective Public Participation at District and Local level takes place.   |
| 3. |  | LOCAL ECONOMIC DEVELOPMENT  |
|    | Objective 1  | Increase agricultural income to achieve a year-on-year growth in the agriculture and agri-processing sectors.                         |

|    | Objective 2   | Facilitate investment in natural capital to contribute to Government's target of creating "green" and "blue" jobs by 2020.   |
|----|---|--|
|    | Objective 3   | Broaden economic participation and inclusion by increasing the number and support to small enterprises.  |
|    | Objective 4   | Developing skills and education base by increasing the number of semi-skilled and skilled.   |
|    | Objective 5   | Regenerating at least one core town as a service and economic hub.   |
|    | Objective 6   | Building local and regional networks and collaboration through the creation of partnerships with (a) Government, (b) the Private Sector, and (c) Education & Research.   |
|    | Objective 7   | To grow the Tourism Sector's absolute contribution to the District Economy.  |
|    | Objective 8   | To position the District as a nationally-recognized tourism brand.   |
| 4. | N   | IUNICIPAL FINANCIAL VIABILITY AND MANAGEMENT   |
|    | Objective 1   | To achieve and sustain unqualified audit reports for the District and LMs.   |
|    | Objective 2   | Improve financial sustainability of the District and LMs.  |
|    |   |  |
| 5. | •   | L TRANSFORMATION AND ORGANIZATIONAL DEVELOPMENT  |
| 5. | •   | L TRANSFORMATION AND ORGANIZATIONAL DEVELOPMENT<br>Build capacity of all LMs for effective mainstreaming of youth, women and people with<br>disabilities' development in policies and programmes.  |
| 5. | MUNICIPA  | L TRANSFORMATION AND ORGANIZATIONAL DEVELOPMENT<br>Build capacity of all LMs for effective mainstreaming of youth, women and people with   |

To create an environment of productive and healthy employees annually. |

# Origin of the name Sarah Baartman

A young Khoikhoi slave in the early 1800s, Sarah Baartman suffered immeasurable indignity at the hands of callous men who put her on display for the entertainment of the crowds in Britain and France. Her remains were eventually returned to South Africa, where she was buried at Hankey, in the Gamtoos River Valley, on 9 August 2002. Her grave is a National Heritage Site.

## 2.1 Legislation

The IDP is given legal status by the following primary and secondary legislation and regulations:

- The Municipal Systems Act 32 of 2000 (referred to as MSA)
- The Municipal Finance Management Act No. 56 of 2003 (referred to as MFMA)
- Municipal Planning and Performance Management Regulations, 2001: Department of Provincial & Local Government (dplg, now COGTA)

**The Municipal Systems Act 32 of 2000** requires that all Municipalities must prepare and adopt an Integrated Development Plan (IDP) and must subject it to an annual review. In terms of Chapter 5, Section 25, all Municipalities must, within a prescribed period after the start of its elected term, adopt a single, inclusive and strategic plan for the development of the Municipality. Section 34 of the same chapter requires a Municipality to review the IDP annually and, where necessary, to amend the plan in accordance with a prescribed process.

In addition to the requirement for every Municipality to compile such an Integrated Development Plan, the Municipality is also required to monitor and evaluate its performance. Section 34 of the MSA deals with the review and amendment of the IDP:

#### A Municipal Council must review its Integrated Development Plan annually in accordance with an assessment of its performance measurements in terms of Section 41; and to the extent that changing circumstances so demand; and may amend its Integrated Development Plan in accordance with prescribed processes.

The IDP has to be reviewed annually in order to:

- Ensure its relevance as the Municipality's strategic plan;
- Inform other components of the Municipal business process including institutional and financial planning and budgeting;
- Inform the cyclical inter-governmental planning and budget cycle.

**The Local Government: Municipal Planning and Performance Management Regulations, 2001** states in Chapter 2 that the IDP review and amendment process must adhere to the public participation requirements as outlined in Chapter 4 of the MSA.

Section 16(1) of the MSA requires that a Municipality must develop a culture of Municipal governance that complements formal representative government with a system of participatory governance, and must for this purpose encourage, and create conditions for, the local community to participate in the affairs of the Municipality.

Regulation 2(4) of the Local Government Municipal Planning and Performance Management Regulations, 2001 requires that:

- only a member or committee of a municipal council may propose an amendment to the IDP;
- the proposal to amend must be accompanied by a reason and be aligned with the district IDP;

- the amendment is adopted by a decision of the Municipal Council;
- all the members of the council be given reasonable notice;
- the proposed amendment/s be published for public comment for a period of at least 21 days in a manner which enables the public to make representations in this regard; and
- the applicable district Municipality be consulted.

During 2003 the **Municipal Financial Management Act (MFMA)** was enacted which specifies a number of time frames for the tabling and adoption of the Municipal Budget and amendments to the IDP. In terms of Section 16 and 17, the Mayor must, at a Council meeting not later than the 31st of March each year, table any draft and proposed amendments to the IDP with the draft budget. In terms of Section 24 of the MFMA, the municipal council must at least 30 days before the start of the budget year consider the approval of the annual budget.

Both pieces of legislation (Municipal Systems Act and the Municipal Financial Management Act) emphasize the close relationship between the Budget and IDP and the requirement to have these municipal processes aligned and integrated.

## 2.2 Process Plan & Public Participation

The IDP Development and annual Review Process consists of the following activities:

- (a) The adoption of an integrated IDP & Budget Process Plan (inclusive of a Public Participation Strategy and Programme) – indicating institutional arrangements (roles and responsibilities) and preparations to ensure that the IDP and Budget process is undertaken concurrently and efficiently;
- (b) The monitoring of performance and the input of new information :
  - (i) Performance monitoring refers to the progress made with the implementation of projects and programmes through a series of indicators the introduction of a Performance Management System will provide the required outcomes.
  - (ii) New information reflects changes in the municipal milieu that impact on the effectiveness and appropriateness of the IDP and may include:
    - Amended situation analysis information,
    - Changes to legislation and policy,
    - Budget input from sector departments,
    - Changes to needs and priorities,
    - Input from stakeholders,
    - Unexpected events e.g. natural disasters,
    - MEC's (or Assessing Committee) comments.
- (c) The information gathered in (ii) is evaluated to determine its relevance to the IDP and recommendations made regarding possible amendments;
- (d) Amendment of the IDP document and alignment with the budget;
- (e) Advertisement for public comment (21 days minimum);
- (f) Adoption of the IDP (and the Budget) by Council.

A copy of Dr Beyers Naudé Local Municipality's integrated 2021/22 IDP & Budget Process Plan is attached as ANNEXURE A.

# SUMMARY OF THE 2017 – 2022 IDP 4<sup>TH</sup> REVIEW PROCESS

| July 2020                | Planning for the IDP & Budget processes commences.<br>IDP Manager, Mayor, MM, CFO & CA consult and co-ordinate dates.<br>Integrated 2020/21 IDP and Budget Process Plan is developed.  |
|--------------------------|--|
| 12 July 2020             | Forwarded draft Process Plan to SBDM for purpose of alignment.<br>SBDM produces draft 2020/21 IDP Framework Plan.  |
| 07 August 2020           | Notice in regional newspaper : Launch of $4^{th}$ & final Review of 2017 – 2022 IDP and 2021/22 Budget Process; call for public participation and for interested parties to register on or update IDP Stakeholder database. Also posted on social media platforms and notice boards.   |
| 25 August 2020           | Special Council Meeting : Adoption of Dr Beyers Naudé LM 2021/22<br>IDP & Budget Process Plan, inclusive of SBDM Draft 2021/22 IDP<br>Framework Plan and Dr Beyers Naudé LM 2021/22 Budget Time<br>Schedule (Resolution SCOUN-070.1/20). Council was sensitized about<br>key activities, including alternative measures in the event of COVID-19<br>impacting on the normal public participation programmes.   |
| 17 August – 17 Sept 2020 | Consultations with Committees of all 14 Wards – in preparation of IDP Review and to determine / update status of Ward Development Priorities. CBP Report updated.  |
| 2 & 9 September 2020     | 1 <sup>st</sup> Rep. Forum Meeting : Launch of IDP Review & Budget Process.<br>Presentations by Sector Depts on their projects & programmes – in<br>response to Ward Development Priorities (CBP Report).  |
| 30 September 2020        | IDP Steering Committee Meeting : Submission & discussion of prelim CBP Report, status of Ward Development Priorities. Sensitized Officials about the Strategic Planning Session 24 – 26 November and to what extent they had to prepare for this, to be followed by Project identification & design for 1 <sup>st</sup> Draft IDP Project Register.  |
| 18 November 2020         | IDP Representative Forum Meeting : Presentations by Sector Depts & SOEs on their plans for Dr BNLM – demonstrating response to Ward & Institutional Development Priorities. Status of projects and programmes current and still to be implemented – aligned with updated CBP Report.   |
| 1 & 2 December 2020      | IDP Review 2-day Strategic Planning Session (dates rescheduled), with focus on developing SMARTGoal project plans for short-, medium- and long-term planning. Revision of IDP's Project Register. Completion of mSCOA template.  |
| 03 December 2020         | IDP Steering Committee Meeting : Presentation of 2-day Strategic Planning workshop outcomes. Results of Institutional Weaknesses review; preparation of 1 <sup>st</sup> Draft Project Register. Officials reminded about the District Development Model (DDM), which is being piloted at Alfred Nzo DM and being rolled out in other Districts, with LM profiles already developed. Crucial for catalytic projects to be identified and taken up in the DDM – from local IDPs. |
| 04 December 2020         | Distribute Draft IDP Project Register template and consult with Officials regarding their project plans. To utilize SMARTGoal template. MTAS Action Plans also sent out for updating.  |
| 18 December 2020         | IDP's Development Strategies were updated and 1 <sup>st</sup> Draft IDP Capital Project Register completed and distributed.  |

| January - February 2021 | Continued populating and refining the IDP Project Register. Integration of all data in Draft 2021/22 IDP; finalized document for tabling in March. Notices to all Sector Departments, SOE, etc. calling for the submission of their 2021/22 & outer year Projects & Programmes. |  |  |  |
|-------------------------|---|--|--|--|
| 08 February 2021        | Management Meeting which focussed on Capex and Opex Budget preparation.   |  |  |  |
| 03 March 2021           | IDP Steering Committee Meeting : Presentations. Comprehensive report on IDP Review and state of readiness of Draft 2021/22 IDP for consideration by EXCO before tabling to Council.   |  |  |  |
| 10 March 2021           | IDP Representative Forum Meeting : Presentations by Sector Depts of SOEs. Progress of IDP review; submissions for Draft Project Register and checklist of process completed to date.  |  |  |  |

| 1 July 2021             | Implement 2021/22 IDP, Budget, Rates & Tariffs.<br>Commence with planning for development of new 5-year IDP.  |  |  |  |
|                         |   |  |  |  |

- Please note that, in addition to general day-to-day activities and meetings, the IDP Development & Review Process also includes the attendance of District Level Meetings and other IDP-related activities (such as Community-based Planning, DDM, StatsSA and other workshops).
- During the COVID-19 Lockdown period, virtual meetings were held whenever possible. Public
  meetings were prohibited under the hard lockdown. The more relaxed Level 1 regulations that came
  into effect during February 2021, do allow public meetings, but subject to strict health and safety
  protocols and a limitation on the number of people allowed in the venue, i.e. 50% of capacity and no
  more than 100 persons.

## SNAPSHOT OF 2017 - 2022 IDP : 1<sup>ST</sup> REVIEW

# **SNAPSHOT OF APRIL 2018 MAYORAL OUTREACH**

Public meetings were held in all 14 Wards, starting in Aberdeen on 04/04/2018 and being concluded in Umasizakhe on 23/04/2018. Remote settlements – such as the Baviaanskloof and Vondeling – were also visited. There was active engagement between the Mayor and members of the public and valuable input was received at all of the meetings.

## 2.3 Framework for Credible IDPs

The Department of Co-operative Governance & Traditional Affairs (COGTA) supplies all Municipalities with a Framework for a credible IDP. The Framework must serve as an enabling tool during the drafting process and should facilitate compliance with the Municipal Systems Act by Municipalities. The Framework (also referred to as the IDP Assessment Tool) was revised in 2017 and will undergo a more rigorous review in 2020/21.

SEVEN FOCUS AREAS were identified for a credible framework. These are:

#### → Service Delivery

(including delivery of civil infrastructure, implementation of the Expanded Public Works Programme / EPWP and Sector Plans)

→ Institutional Arrangements

(including Human Resources Strategy, Skills Development and Performance Management System)

→ Economic Development

(Alignment with NSDP and PGDP, special groups etc.)

Financial Management and Corporate Governance (Financial Statements Audits Financial Plan Municipal Financial M

(Financial Statements, Audits, Financial Plan, Municipal Financial Management Act / MFMA Compliance and Service Delivery and Budget Implementation Plan / SDBIP, alignment with Division of Revenue Act / DORA, community participation and anti-corruption)

#### → Governance

(Public participation, code of conduct for councillors and municipal staff, communication)

#### → Inter-governmental Relations

(Cooperative governance, Inter-governmental Relations / IGR Forums, Sector involvement, assignment of Powers and Functions)

#### → Spatial Development Framework

(Housing policy on Sustainable Human Settlements, National Spatial Development Perspective / NSDP, Provincial Development Plan (PDP), Economic, Geographic and Demographic Profiles)

#### DISTRICT DEVELOPMENT MODEL (DDM)

This is a new concept which was introduced during the latter half of 2019 and is currently being piloted at Alfred Nzo DM. It is being rolled out in other Districts and Local Municipalities have already been requested to ensure that gaps identified in their IDPs (by way of MEC's Comments and Assessment Reports) be addressed in order to ensure that they are of a standard that will meet the DDM's requirements. Profiles of Local Municipalities have already been developed.

"When we are no longer able to change a situation ~ we are challenged to change ourselves."

Quote : Viktor E Frankl

# THE SITUATION

## 3.1 Introduction and Purpose

The purpose of the analysis of the Municipality is to determine the existing level of development in the Municipality; the most critical needs of the people living in this Municipal area; the problems the Municipality is facing as well as the development potential of the Municipal area. From this range of problems and potentials, priority issues ~ confirmed through consultation and political ratification ~ are extracted and become the focus for planning.

#### 3.1.1 Amalgamation of Camdeboo, Baviaans & Ikwezi Local Municipalities

In December 2014, the Municipal Demarcation Board (MDB) issued Circular 4/2014, giving notice of public consultation meetings being held in respect of Ward Delimitations, ahead of the 2016 Local Elections. A month later, MDB Circular 1/2015 was issued, announcing a request by Pravin Gordhan, Minister of Co-operative Governance and Traditional Affairs, for the redetermination of some Municipal boundaries, Camdeboo, Baviaans and Ikwezi were among these.

In MDB Circular 2/2015 (dated 04/02/2015), it was confirmed that Camdeboo EC101, Ikwezi EC103 and Baviaans EC107 were being proposed for amalgamation "with the view to optimizing the financial viability of the new Municipality". On 27 August 2015, the Demarcation Board issued a notice in the Provincial Gazette of the intention to re-determine the municipal boundaries of Baviaans, Camdeboo and Ikwezi by amalgamating their municipal areas and to determine the municipal boundary of a new category B municipality.

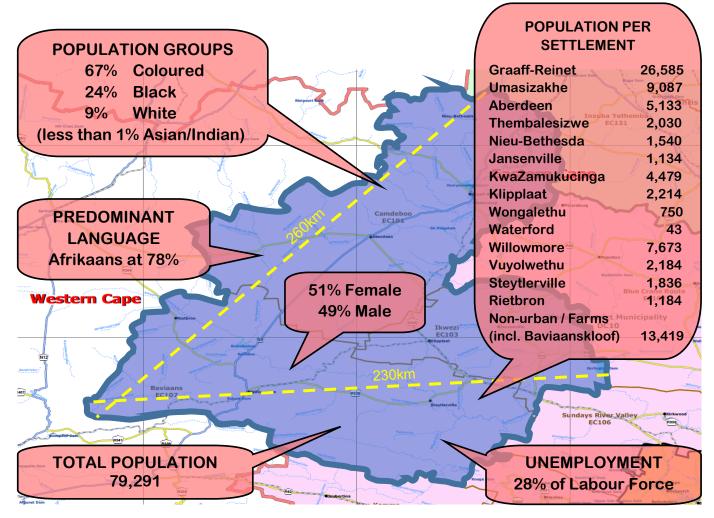

On 10 October 2015, the MDB confirmed the re-determination of the boundaries of Camdeboo, Ikwezi and Baviaans. The Municipalities were informed through MDB Circular 20/2015 dated 13 October 2015. The section 21(5) Notice was published on 21 October 2015 (Gazette No. 3526). The MEC responsible for Local Government determined that the new Municipality would have 27 Councillors and 14 Wards.

Geographically Dr Beyers Naudé LM makes up approximately 49% of the Sarah Baartman District Municipality's landmass (58,242 km<sup>2</sup>), with a population density of 2.8 persons per km<sup>2</sup>, which is much lower than the District average of 7.7 persons per km<sup>2</sup>. The area is characterised by large tracts of commercial farmlands that are sparsely populated. The most densely populated areas are found in and around the established main towns. There are vast distances between main centres; some of the smaller towns and settlements can only be reached by unsurfaced (gravel) roads, not all of which are being maintained on a regular basis. The most difficult areas to access are situated within the Baviaanskloof.

Willowmore, the second largest town, is strategically well-positioned to manage and coordinate service delivery and public participation in the southern part of the Municipal region.

## 3.2 Demographic Analysis, Population and Ward Statistical Data

A brief overview of the demographics of the Municipal area is addressed in this section. The results of the StatsSA 2011 Census proved, beyond a doubt, that Dr Beyers Naudé's population has shown growth and improvement in most areas, as evidenced in the Comparative Analysis given on the next few pages.

| 35 - 64                                     | 21,297                 | 50       | 23,293                 | 47       | 1,996                  | 0       |

There is a clear indication that the level of education and persons completing their schooling improved substantially from 2001 to 2011. Overall conditions have improved, as can be seen on the next page.

The combined population which totalled 79,291 in 2011 increased from 2001 by 10,424 people over a 10-year period. This is reflective of an 15% average population growth rate from 2001 to 2011, which is higher than the Provincial growth, but much lower than the growth rate accrued for Sarah Baartman District Municipal area over the same period. Statistical information shows that Camdeboo had the highest annual growth rate p.a. of 1.1% from 2001, followed by Baviaans with 0.5% and then 0.2% p.a. for Ikwezi – an average of 0.6% per annum.

Dr Beyers Naudé's population is relatively young; ages 0 – 34 make up 63% of total population.

Details at a glance of the newly established Dr Beyers Naudé Municipality :

| Biggest challenges in population     | <ul> <li>Slow growth rate due to migration to larger urban areas for job opportunities.</li> <li>High welfare dependency &amp; serious social problems (e.g. substance abuse).</li> <li>Inadequate care of and provision for people with disabilities and the elderly.</li> <li>High unemployment rate, especially amongst the Youth, resulting in poverty-<br/>stricken areas and high household density (resulting in health issues).</li> </ul>                             |
|--------------------------------------|--|
| Biggest challenges in basic needs    | <ul> <li>Access to skills development &amp; training; employment opportunities.</li> <li>Social upliftment (fragmented) and focussed interventions (insufficient).</li> <li>Education, Social Welfare and Health Care (departments are dysfunctional).</li> </ul>  |
| Biggest challenges in basic services | <ul> <li>Shortage of manpower. Inadequate infrastructure. Severe budget constraints.</li> <li>Streets &amp; Stormwater : critical problems in all Wards.</li> <li>Electricity : Bulk Infrastructure upgrades are needed. Policy RDP housing.</li> <li>Water : sustainable supply and quality.</li> <li>Housing : Policy change also required in terms of funding for new RDP units.</li> <li>Rural road maintenance is too irregular : some areas are inaccessible.</li> </ul> |

\* Provisional Grading. There was an indication that the grading of the new Dr Beyers Naudé Municipality will be reviewed. \*\* Although not in the employ of the Municipality, the CDWs are a very important link between the Ward Councillor and the Community. It is vitally important for each Ward to have a suitable CDW appointed by COGTA. This aspect requires focussed attention after the Local Elections, as some of the Wards have been functioning without a CDW for several years and this has created some critical gaps in effective communication, information gathering and dissemination, and referring issues from grass roots level to the relevant spheres of Government.

\*\*\* Provisional totals consolidated from Staff Establishment of the three former, disestablished Municipalities. A new Organogram has to be developed and approved by the new Municipal Council and a formal Placement Process has to be implemented. There is an issue with temporary employees that also needs to be resolved.

| STATSSA GENERAL CONCEPTS AND DEFINITIONS   |   |  |  |  |  |
|--|---|--|--|--|--|
| DEFINITION OF DISABILITY<br>(as approved by SA Cabinet)  | Disability is the loss or elimination of opportunities to take part in the life of the community equitably with others that is encountered by persons having physical, sensory, psychological, developmental, learning, neurological or other impairments, which may be permanent, temporary or episodic in nature, thereby causing activity limitations and participation restriction with the mainstream society. These barriers may be due to economic, physical, social, attitudinal and/or cultural factors.   |  |  |  |  |
| DEFINITION OF DISABILITY<br>(as defined by UN Convention)  | Disability is an evolving concept and that disability results from the inter-action between persons with impairments and attitudinal and environ-mental barriers that hinders their full and effective participation in society on an equal basis with others.  |  |  |  |  |
| CATEGORIES AND DEGREES<br>OF DISABILITY<br>(as used by StatsSA in 2011 Census)   | <ul> <li>Seeing</li> <li>Hearing</li> <li>Communicating</li> <li>Walking or climbing stairs</li> <li>Remembering or Concentrating</li> <li>Self-Care (such as washing, dressing or feeding)</li> <li>Above categories were enumerated according to 4 grades, namely :         <ul> <li>No difficulty</li> <li>Some difficulty</li> <li>A lot of difficulty</li> <li>Cannot do at all</li> </ul> </li> <li>The 3<sup>rd</sup> and 4<sup>th</sup> grades were used for the purpose of this Comparative Analysis, as they are indicative of substantial or severe degree of impairment, causing a person to be classified as disabled. Self-Care is a new category and was not part of the Census 2001 questionnaire.</li> <li>Self-Care is a new category and was not part of the Census 2001 questionnaire.</li> </ul> |  |  |  |  |
| DEFINITION OF A HOUSEHOLD, FORMAL & INFORMAL ACCOMMODATION   |   |  |  |  |  |
| HOUSEHOLD = A group of people who live together for at least four nights a week, eat together and share resources, or a single person living alone.<br>FORMAL ACCOM. = A structure built according to approved plans, e.g. a house, flat, town houses & other built complexes.<br>INFORMAL ACCOM. = Makeshift structure not approved by a local authority and not intended as a permanent dwelling (e.g. |   |  |  |  |  |

shacks, caravans, tents and other rudimentary shelters). Typically built with found materials (such as corrugated iron, cardboard, plastic, plywood). Contrasted with formal & traditional dwellings.

NB : BASIC SERVICES INCLUDE THOSE BEING PROVIDED BY THE MUNICIPALITY IN THE URBAN AREAS, AS WELL AS SERVICES BEING PROVIDED BY PRIVATE PERSONS / LANDOWNERS TO FARM DWELLINGS IN NON-URBAN AREAS.

#### STATSSA KEY LABOUR MARKET CONCEPTS AND DEFINITIONS

| WORKING-AGE POPULATION          | Persons aged 15–64 years.  |  |  |  |  |
|---------------------------------|--|--|--|--|--|
| NOT ECONOMICALLY ACTIVE         | Persons who are not available for work such as full-time scholars and students full-time homemakers, those who are retired and those who are unable o unwilling to work (including discouraged work seekers and seasonal workers).   |  |  |  |  |
| EMPLOYED                        | Persons who work for pay, profit, or family gain, in the reference period.   |  |  |  |  |
| UNEMPLOYED                      | <ul> <li>Persons within the economically active population who :</li> <li>(a) Did not work during the seven days prior to the interview,</li> <li>(b) Want to work and are available to start work within a week of the interview, and</li> <li>(c) Have taken active steps to look for work or to start some form of self-employment in the four weeks prior to the interview.</li> </ul> |  |  |  |  |
| LABOUR FORCE                    | Employed persons plus unemployed persons.<br>(Also defined as the Economically Active Population.)   |  |  |  |  |
| OFFICIAL UNEMPLOYMENT RATE      | Unemployed persons as a percentage of the labour force.  |  |  |  |  |
| EXPANDED UNEMPLOYMENT RATE      | Official Unemployment Rate with Discouraged Job Seekers added to equation.   |  |  |  |  |
| LABOUR FORCE PARTICIPATION RATE | Labour force as a percentage of the working age population.  |  |  |  |  |
| LABOUR ABSORPTION RATE          | Employed persons as a percentage of the working age population.  |  |  |  |  |

| FORMAL AND INFORMAL SECTOR | An objective measure is used in the QLFS based on VAT/income tax registration<br>and establishment size, while a subjective measure was used in Census 2011.<br>Also, in line with ILO guidelines, persons employed in agriculture and private<br>households are not usually included in the formal and informal sectors, but are<br>identified as separate categories. It is not currently possible to identify agricultural<br>employment in Census 2011 since the coding of industry and occupation had not<br>yet been completed. Sectoral distributions therefore include persons employed in<br>agriculture. And with regard to persons employed in private households, the<br>results were not based on the relevant questions that determine the international<br>classification for industry, but instead were based on the question which<br>determines the sector in which respondents were employed. |
|----------------------------|--|
| DEPENDENCY RATIO           | The dependency ratio is an age-population ratio of those typically not in the labour force (the dependent part ages 0 to 14 and 65+) and those typically in the labour force (the productive part ages 15 to 64). It is used to measure the pressure on productive population.   |

#### 3.2.1 Population and Voter distribution

According to the StatsSA 2011 Census Statistics (combination of statistics for former Camdeboo, Ikwezi and Baviaans municipalities after amalgamation), Dr Beyers Naudé Municipality had a population of **79,291** and approximately 19,925 households, giving an average of 3.9 people per household and a density of 2.8 persons per km<sup>2</sup>. The 2016 Community Survey estimated our population at **82,197**, with 20,748 households. Annual growth projections are made for planning purposes under KPA 2 of this Chapter. The table below provides the total number of Registered Voters per Ward, as recorded during the Voter Registration periods ahead of and after the 2016 Municipal Elections. Wards are not linked to the list of Settlements provided under section 3.2.

Estimated figures per Ward have been sourced from <u>www.wazimap.co.za</u> for the purpose of populating the profiles in section 3.2.3 – in the absence of a more recent Census. The figures will be updated as soon as the next Census is conducted by StatsSA in 2021, and results released.

\* IMPORTANT : Statistical data appearing in the tables of above 14 Ward profiles was sourced from the site <u>www.wazimap.co.za</u> and accuracy of information cannot be guaranteed or verified. The expanded unemployment rate has been provided, i.e. % unemployed + % discouraged job seekers. The unemployment figures given on this site appear to be lower than our estimates, calculated on the combined StatsSA results for Census 2011 and the Provincial trend, that has been included under section 3.3.9.

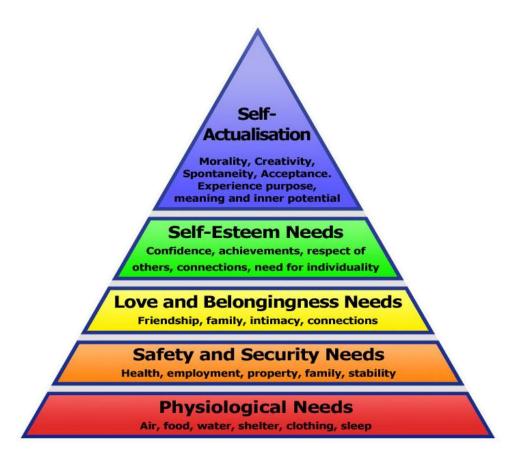

### 3.3 Socio-Economic Analysis

The Population Policy for South Africa lists 10 major issues influencing Human Development :

- + Housing, Electricity supply, Water and Sanitation
- The situation of Women and Gender Disparities
- The Environment and Natural Resources
- The situation of Children
- The Economic situation
- Health Services
- Employment
- Occupation
- Education
- Literacy

Definition of Human Development Index (HDI) "A composite index measuring average achievement in three basic dimensions of human development : a long and healthy life, knowledge and a decent standard of living."

Above perspectives align perfectly with Maslow's Hierarchy of Needs, illustrated below :

The socio-economic characteristics of any localised population are fundamental to the overall performance, not only of the economy within which they are active, but also the larger regional economy. Characteristics associated with the socio-economic profile of a community include, but are not limited to, various indicators that have direct bearing on employability, disposable income and access to amenities. This section provides an overview of the socio-economic perspective of the Dr Beyers Naudé Municipality for the purposes of exploring the underlying fundamentals of the socio-economic and demographic characteristics of the population and integrating the identified issues into economic considerations. Critical population issues are identified in this section, and more specifically highlighted in the Community-based Plans.

The 2011 Census has already indicated a vast improvement in Quality-of-Life levels compared to those of 2001. According to the Community Survey conducted by StatsSA in 2016, there has been further improvement, by way of the following examples :

- There has been a reduction in critical poverty levels,
- There was an overall increase in life expectancy (55.2 to 62.4 years) and a decline in infant (48.2 to 33.7 deaths per 1,000 live births) and under 5 mortality rates (70.8 to 44.1 deaths per 1,000 live births),
- There has been an increase in the number of persons with secondary schooling and those achieving a higher education,
- Household density has decreased indicative of housing delivery taking place,
- Formal dwellings have increased indicative of improved living conditions,
- Access to piped water and flush toilets has increased dramatically,
- There is increased usage of electricity for cooking, heating and lighting, and
- There is increased usage of cellphones, electric and electronic appliances.

On the downside, however, there is an indication that people have grown more concerned about :

- Lack of or inadequate employment opportunities,
- The rising cost of electricity,
- Inadequate housing, and
- Violence and crime in their neighbourhoods.

Many households in the Municipal area are heavily dependent on Social Support, e.g. Old Age Pensions, Disability Grants, Foster Care and Child Support Grants. Often a pension or a grant is the only source of income and such households then fall within the threshold of Indigent Support, whereby Municipal rates and taxes are then subsidized from the Intergovernmental Grant which is allocated to Local Municipalities from National Government in terms of the Division of Revenue Act (DORA) – on an annual basis.

There are pockets of abject poverty in some of the Wards and in areas where there is a housing backlog, a number of families live together in one small dwelling. This creates all sorts of social problems, including health issues and it has been noted that the ratio of people with serious disabilities increases in areas that are so densely populated. The high level of unemployment, low levels of literacy and lack of skills are all contributing factors.

Substance abuse has reached crisis proportions and the prevalence of Foetal Alcohol Syndrome (FAS) is on the rise. The common denominator in the more violent and serious crimes is alcohol, first and foremost, followed by drugs. Parents who are caught up in these addictions are incapable of looking after their children properly; they are often left to their own devices and fall into the same pattern as their parents. Many children of school-going age are not attending any form of educational facility and are seen roaming the streets, getting up to mischief. Teenage pregnancies and school drop-outs are a reality and the numbers are growing.

There is an urgent need for the Departments of Social Development and Education to step up to the plate in addressing these issues, and for SAPS to be more visible and show no mercy to those who trade in drugs and sell cheap and illegal alcohol to under-aged children and persons who are known to be alcoholics. The magnitude of this problem, which is destroying the social and moral fabric of our society, cannot be over-emphasized.

Statistics related to drug-related crimes, as well as safety and security aspects in general, are dealt with more comprehensively under section 3.3.10.

### 3.3.1 General state of Community Health

There are certain aspects of our Community Health situation that require some attention, some of its Health Care facilities are not functioning well, either due to being understaffed, too small or illequipped. Some of the poorer communities do not have access to affordable transport to access these facilities. The Department of Health confirmed that sufferers of illnesses such Diabetes Mellitus and hypertension are ever increasing and anticipated that the prevalence of diabetes and heart diseases would increase dramatically as the population becomes more overweight and obese.

Mental health caseloads have seen a steady incline and are a concern, as there are no proper facilities in the Dr Beyers Naudé LM for treating these and other handicapped patients.

No serious cases of malnutrition have been reported or treated in the Dr Beyers Naudé LM in the past few years.

Some challenges being faced by the Provincial Health Care Service are :

- Most Clinics do not have a qualified pharmacist in their dispensaries,
- Disposal or storage of medical waste,
- Shortage of space, necessitating certain services to share the same room or area,
- Actual staffing does not meet the critical institutional need,
- Lack of transport inhibits the regularity of some of the services that need to be rendered.

| DIABETES                               | 2015 | 2016 | 2017 | 2019 |
|--|------|------|------|------|
| Cases Treated (new)                    | 109  | 184  | 149  |      |
| Average annual % increase / (decrease) |      | 69   | (19) |      |

Statistics provided by Dept. of Health indicate that sufferers of Diabetes Mellitus increased by 69% from 2015 to 2016, with a 19% decline from 2016 to 2017. The incidence rate is estimated at an average of 1.29 per annum. It is estimated that the incidence of hypertension increased on average by 22.3% per annum (according to figures obtained from the Department of Health over a 3-year period). Educational programmes in following a healthy diet and lifestyle should be introduced at all schools and health care facilities.

| ACUTE MALNUTRITION                     | 2015 | 2016 | 2017 | 2019 |
|--|------|------|------|------|
| Cases diagnosed and treated            | 39   | 44   | 12   |      |
| Average annual % increase / (decrease) |      | 13   | (73) |      |

The number of acute malnutrition cases recorded increased with 13% between 2015 and 2016, but showed a sharp decline of 73% in 2017. Only 64 new cases of diarrhoea with dehydration in children under 5 years were recorded in 2017. This constitutes a 55% decrease from the previous year's 143 cases.

### 3.3.2 COMMUNICABLE DISEASES

According to statistics from the Department of Health, there has been a steady decline in the prevalence of **Tuberculosis** cases in the Municipality. Positive tests declined by 20% from 2015 to 2016 and a further 36% decline was noted in 2017. However, there was a sharp increase of 26% between 2017 and 2019. Currently, all positively tested patients are receiving treatment.

| ТВ  | 2015 | 2016 | 2017 | 2019 |
|---|------|------|------|------|
| TB symptomatic client 5 years and<br>older test positive      | 721  | 576  | 365  | 459  |
| Average annual % increase /<br>(decrease) – 5 years and older |      | (20) | (36) | 26   |
| Cases Treated   | 693  | 567  | 365  | 514  |

| HIV/AIDS   | 2015 | 2016 | 2017 | 2019  |
|--|------|------|------|-------|
| HIV positive cases : Infants 19-59 months diagnosed            | 0    | 2    | 1    | 1     |
| HIV positive cases : children under 5 years diagnosed          | 7    | 10   | 2    |       |
| HIV positive cases : children 5-14 years diagnosed             | 7    | 18   | 6    | 9     |
| HIV positive cases : 15 years and older (adults) diagnosed     |      |      |      | 316   |
| Antenatal HIV positive cases diagnosed                         | 45   | 35   | 37   | 44    |
| HIV/AIDS positive cases children under 15 yrs treated with ART | 22   | 14   | 18   |       |
| HIV/AIDS positive cases adults started on ART during the year  | 493  | 392  | 375  | 421   |
| HIV/AIDS positive cases monthly average remaining on ART       |      |      |      | 2,503 |

Improved access and uptake of ARVs over time in the public and private sector in South Africa has enabled HIV positive people to live longer and healthy lives, resulting in gradual decline in AIDS related deaths between 2006 (48%) and 2016 (28%). Despite the gains recently made in the fight against the **HIV/AIDS** pandemic i.e. reduced AIDS related deaths and declining HIV incidence rates, South Africa has paid a large price.

In conjunction with losing economically active adults due to HIV/ AIDS deaths which impacts negatively on the demographic dividend, older people are burdened with caring for younger people who are sick or dying of AIDS, burying their children and breadwinners whilst caring for grandchildren. It is estimated that 7 million people were HIV positive by 2016. A large proportion of South Africans are growing old either infected or affected by HIV and AIDS. Future considerations regarding the provision of health care for a growing HIV population across all ages is paramount.

In Dr Beyers Naudé Municipality HIV/AIDS positive cases in children under 5 years showed an increase of 43% from 2015 to 2016, but an 80% decrease in 2017. On average, 57% of these cases have received treatment over a 3-year period. 316 new HIV cases were diagnosed in 2019 and 421 new ART cases were recorded. An average of 2,503 adults were treated with ART monthly, during 2019.

The **Coronavirus / COVID-19** pandemic took the world by storm early in 2020. A National State of Disaster was declared in South Africa and a Lockdown with stringent regulations took effect from 00:00 on 27<sup>th</sup> March 2020. Dr Beyers Naudé Municipality implemented several measures to mitigate the impact of the disease; Technical and Political Joint Operations Committees (JOC) were established and have been meeting regularly. Budgets were adjusted to make provision for COVID-related expenditure, e.g. measures taken to mitigate it's spread and impact. The cumulative statistics for the period 01/03/2020 - 28/02/2021, as released by the National Department of Health, are as follows :

| DESCRIPTION     | BNLM        | SBDM         | E. CAPE       | NATIONAL        |
|-----------------|-------------|--------------|---------------|-----------------|
| Confirmed Cases | 3,889       | 21,603       | 193,895       | 1,513,393       |
| Recoveries      | 3,733 (96%) | 20,836 (97%) | 182,194 (94%) | 1,430,259 (95%) |
| Active Cases    | 0           | 17           | 411           | 33,141          |
| Deaths          | 156         | 728          | 11,290        | 49,993          |

### 3.3.3 People with Disabilities

9% of the people in Dr Beyers Naudé have a disability that is substantial or severe, and most require the assistance of a person, device or medication to function at a reasonable level.

| DESCRIPTION (StatsSA Census 2011)                 | NUMBER OF<br>PEOPLE | % OF<br>POPULATION |
|---|---------------------|--------------------|
| No Disability                                     | 60,100              | 76                 |
| Slight Disability (not incapacitated or impaired) | 11,774              | 15                 |
| Seeing  | 838                 | 1                  |
| Hearing   | 429                 | 0.5                |
| Communicating                                     | 598                 | 0.8                |
| Walking or climbing stairs                        | 1,492               | 2                  |
| Remembering or concentrating                      | 913                 | 1                  |
| Self-Care (e.g. washing, dressing, feeding)       | 3,147               | 4                  |
| CONTROL TOTALS                                    | 79,291              | 100                |
| TOTAL DISABLED PERSONS                            | 7,417               | 9                  |

NB : Provision must be made for physically disabled people in all aspects of planning, including facilities, provision of services, skills development, economic development and employment.

### 3.3.4 Medical Facilities

Dr Beyers Naudé boasts the recently upgraded Midlands Provincial Hospital (situated in Graaff-Reinet) and offers the following range of Medical Facilities :

| CATEGORY                                  | GRAAFF-REINET | ABERDEEN | NIEU-BETHESDA | JANSENVILLE | KLIPPLAAT | WILLOWMORE | STEYTLERVILLE | RIETBRON | TOTAL |
|---|---------------|----------|---------------|-------------|-----------|------------|---------------|----------|-------|
| Primary Health Care Clinics               | 3             | 1        | 1             | 2           | 1         | 1          | 1             | 1        | 11    |
| Mobile Clinics                            | 2             | 1        | 0             | 1           | 0         | 1          | 1             | 1        | 7     |
| Community Health Centre<br>(Day Hospital) | 1             | 0        | 0             | 0           | 0         | 0          | 0             | 0        | 1     |
| TB Hospital                               | 1             | 0        | 0             | 0           | 0         | 0          | 0             | 0        | 1     |
| Provincial Hospitals                      | 1             | 0        | 0             | 0           | 0         | 0          | 0             | 0        | 1     |
| Provincially-aided Hospitals              | 0             | 1        | 0             | 1           | 0         | 1          | 0             | 0        | 3     |
|   |               |          |               |             |           |            |               |          | 24    |

The Primary Health Care Service was provincialized from 1 January 2011.

There is at least one Primary Health Care Clinic in each town, with an even distribution in the large suburbs of Graaff-Reinet (Horseshoe, Umasizakhe and Kroonvale).

Critical staff and medical supply shortages are being experienced at some PHC Clinics in the Dr Beyers Naudé Municipal area.

- The Provincial Department of Health did in recent years allocate funds for the upgrading of its PHC facilities and some clinics in Graaff-Reinet were spruced up, but the one at Alex Laing Hall in Kroonvale is simply not suitable for use as a PHC facility. A site has been identified for a new facility and the communities have been pleading for one to be built. The clinic in Willowmore is too small and is in urgent need of upgrading. There are disused facilities in Klipplaat and Baviaanskloof, with no furniture or equipment.
- There are several General Practitioners (GP) in Graaff-Reinet and one in Aberdeen, but none in the smaller towns, such as Klipplaat and Nieu-Bethesda, which rely on doctors travelling through from the larger centres, oftentimes only sporadically. There is a GP in Willowmore and two doctors at the provincially-aided hospital in this town. The other towns are in desperate need of doctors.

### 3.3.5 Sportsfields, Recreational & Community Facilities

Dr Beyers Naudé offers a number of facilities and caters for many sporting codes, i.e. soccer, rugby, netball, cricket and tennis. Some of the more specialist codes, such as squash, golf, bowls and swimming, are limited mainly to Graaff-Reinet and Willowmore. All of the towns have Community Halls and Libraries. The more remote settlements utilize Church or School Halls (in some instances, even School classrooms) for public meetings and gatherings.

There are caravan parks in four towns; as well as established hiking trails and picnic spots ~ those in the Camdeboo National Park are accessible to all. Mountain Drive in Graaff-Reinet offers solitude and natural surroundings to people who favour horse-riding, jogging, cycling or walking their dogs. The Baviaanskloof World Heritage site is situated in the Dr Beyers Naudé Municipal area and offers 4x4 tours, hiking trails and picnic spots as well as many game species.

| MUNICIPAL-OWNED<br>FACILITIES | <b>GRAAFF-REINET</b> | ABERDEEN | NIEU-BETHESDA | JANSENVILLE | KLIPPLAAT | WATERFORD | WILLOWMORE | STEYTLERVILLE | RIETBRON | BAVIAANSKLOOF | TOTAL |

| Swimming Pools                | 0                    | 1        | -             | -           | -         | -         | -          | -             | -        | 0             | 1     |
| Play Parks                    | 7                    | 2        | 1             | -           | -         | -         | -          | -             | -        | 1             | 11    |
| Caravan Parks                 | 1                    | 1        | 1             | 1           |           | -         | 1          |               |          |               | 5     |
|                               |                      |          |               |             |           |           |            |               |          |               | 80    |

Some facilities are non-functional and in a state of disrepair; others are undergoing extensive repairs and upgrading. The Municipality is in the process of planning more sports & recreational facilities where suitable land has been identified, in order to address the needs of the Communities, as identified during Ward consultations.

### 3.3.6 Education & Skills

| CATEGORY                  | <b>GRAAFF-REINET</b> | ABERDEEN | NIEU-BETHESDA | JANSENVILLE | KLIPPLAAT | WATERFORD | WOLWEFONTEIN | WILLOWMORE | STEYTLERVILLE | RIETBRON | KLEINPOORT | ZAAIMANSHOEK | TOTAL<br>NO. OF<br>SCHOOLS<br>IN BNLM<br>REGION |

Dr Beyers Naudé Municipal region has 41 schools registered with the Department of Education :

As well as the following tertiary institutions, based in Graaff-Reinet :

• Eastcape Midlands College • SAPS Training Institution • SA College for Tourism.

Many schools are in a poor condition, with inadequate security, furniture and equipment and substandard ablutions. There is an urgent need for renovations and upgrades.

| LEVEL OF EDUCATION : BASIC STATS | TOTAL   |
|----------------------------------|---------|
| No schooling                     | 4,907   |
| Matric / Grade 12                | 8,947   |
| Tertiary : University / College  | 1,711   |
|                                  | 15, 565 |

The table below will be updated as soon as the relevant data becomes available.

| EDUCATIONAL ATTENDANCE (< 20 YRS) | TOTAL | EDUCATIONAL LEVELS (> 20 YRS)    | TOTAL |
|-----------------------------------|-------|----------------------------------|-------|
| Not attending (school-going age)  |       | No Schooling                     | 8%    |
| Pre-school                        |       | Only Primary Schooling           | 19%   |

| Adult Education Centre & Other    |       | Tertiary (Degree)                | 1%    |
|                                   |       |                                  | 100%  |

- Approximately 27% of population are semi- or completely illiterate, whilst the other 73% do have secondary, matric or a higher qualification. This is a vast improvement on 2001, when approximately 50% of persons were found to be semi- or completely illiterate.
- Only about 9% of persons have a tertiary education.
- A large number of persons are employed as general labourers, and have to perform menial tasks with limited responsibility, due to lack of skills and education.
- Dr Beyers Naudé LM needs to pay special attention to Youth Development.

### 3.3.7 Household Income vs Poverty Line

The Department of Social Welfare classifies a household as indigent and living below the poverty line if it has an income of up to R9,600 per year, which is R800 per month.

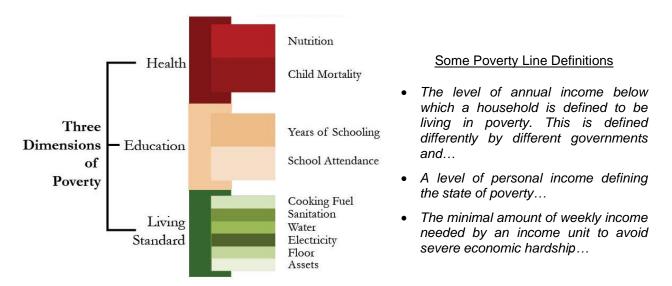

**ECSECC** and other surveys indicate that there has been a decrease in the percentage of people living in poverty in the Dr Beyers Naudé Municipal area over the past 10 - 15 years. According to ECSECC, in 2016, the population group with the highest percentage increase of people living in poverty was the White population group, whilst there was a decrease in both Black and Coloured population groups. Also in 2016, the Poverty Gap stood at 26.9%, which was an improvement of 11% between 2006 and 2016. It is foreseen that the 2020/21 COVID-19 pandemic lockdown and resultant job losses will have widened this gap substantially.

According to Census 2011, there has been a good improvement in the distribution of middle to higher level monthly income of Dr Beyers Naudé LM's households →

| Monthly income | Number of<br>Households | % of Total |
|----------------|-------------------------|------------|
| 0 - R800       | 3,985                   | 20%        |
| R801 - R3,200  | 8,765                   | 46%        |
| R3,200 plus    | 6,775                   | 34%        |
| TOTAL          | 19,525                  | 100%       |

Dr Beyers Naudé Municipality uses a threshold of two State Pensions (from 01/04/2020 R1,860 x 2 = R3,720) as its Indigent Index; a household with a monthly income of less than R3,720 therefore qualifies for subsidization through the Government's Equitable Share contribution (commonly referred to as the IGG or Intergovernmental Grant) in terms of the Municipality's Indigent Policy). In 2019 the Municipality indicated that it will not disqualify households who are earning a small income from temporary CWP or EPWP job creation / poverty alleviation programmes. 51% of the Municipality's Domestic Consumers are listed as Indigent Households. The Municipality maintains an Indigent Register; it was subjected to a 100% review in 2019/20 and is regularly updated. Impoverished households are continually encouraged to apply for Indigent Support.

The Municipality does make provision for pauper burials, where a deceased was classified as indigent and there are no surviving family members to assist in his or her burial. A Pauper Burial Policy must be developed for BNLM.

Poverty Indicators for Dr Beyers Naudé Local Municipality have been calculated by combining the data for the former Camdeboo, Ikwezi and Baviaans LMs – using data released by ECSECC in 2016. Please consult the tables on the following page.

| COVID-19 RELIEF FUND          | Number of Beneficiaries p              | baid in January 2 | 021 = 2,856  | Average of R1 mi | llion per month |

A very large portion of the population derives its income from Social Support (Welfare) :

The tremendous increase in Welfare Dependency is a cause for concern. According to the latest statistics released by SASSA (Feb. 2021), Child Support Grants make up 66% of pensions and grants being paid out in the Dr Beyers Naudé Municipal area. It is foreseen that this dependency will increase, as a result of the negative impact of the COVID-19 lockdown on our economy. Care Dependency Grants (for children with severe mental and/or physical disabilities, requiring full-time home care) can be applied for from birth to 17 years, subject to conditions. SASSA is also providing school uniforms to qualifying households, to the value of R2,000 per month.

### 3.3.9 Employment and Unemployment

According to the 2011 National Census, 28% of our Labour Force is unemployed and 48% of Working Age Population (Employable Sector aged 15 – 64 years) is not economically active. Of the Working Age Population, 37% is employed.

| Status based on 2011 StatsSA Census data | TOTAL  |
|--|--------|
| Employed                                 | 19,013 |
| Unemployed                               | 7,624  |
| Not Economically Active                  | 24,538 |

There has been a decrease in the number of Unemployed persons in the Dr Beyers Naudé since the national Census in 2001, however, based on projections and the possibility that there may have been a miscalculation of unemployed persons in former Ikwezi LM for Census 2011, it is estimated that the figure for 2020/21 is closer to 30%, possibly as high as 35%.

- The National Unemployment rate for the 4<sup>th</sup> Quarter of 2020 was 32.5%
- The Provincial Unemployment rate for the 4<sup>th</sup> Quarter of 2020 was 47.9%
- The National Unemployment rate for the 1<sup>st</sup> Quarter of 2021 was .....%
- The Provincial Unemployment rate for the 1<sup>st</sup> Quarter of 2021 was .....%

According to StatsSA, the number of unemployed persons in the Eastern Cape continues to rise and it remains the province with the highest unemployment rate, worsened by COVID-19 impact.

The latest Ward-based Employment & Unemployment statistics as released by StatsSA are :

### 3.3.10 Safety and Security

BNLM does not have a Municipal Police Force; it is a Provincial function. There are ten Police Stations in the Municipal area; one in each town (Graaff-Reinet, Nieu-Bethesda, Aberdeen, Willowmore, Steytlerville, Rietbron, Jansenville, Klipplaat, Wolwefontein) and one in Baviaanskloof. The Cluster Headquarters is in Graaff-Reinet, with Detective Branches based in Graaff-Reinet and Willowmore. Community Police Forums (CPFs) are functioning well in Graaff-Reinet, Aberdeen, Nieu-Bethesda, Willowmore and Baviaanskloof. The Community Safety Forums, on the other hand, have not been so successful and the Municipality has directed an application to SBDM for assistance in re-establishing the CSFs which are to be co-ordinated by Municipal Managers, in conjunction with SPU. COGTA has been approached to assist with the development of a Community Safety Plan and establishment of a Community Safety Forum.

26 Cases of murder and 83 cases of rape were reported to SAPS in the Municipal area during 2019/20. They are both serious and violent crimes. There is a high incidence of assault, whilst domestic violence (especially woman and child abuse) continues to escalate. Graaff-Reinet and Steytlerville have shown a disturbing increase in cases of Rape being investigated. Most of the aggressive crimes are ascribed to the abuse of alcohol (primary reason) and drugs, whilst poverty and poor social conditions are blamed for incidents of theft and burglary. Alcoholism is a critical issue and drastic measures must be taken to curb it. In an article published by the Sunday Times during 2009, it was reported that "South Africa has the highest rate of foetal alcohol syndrome and the second-highest rate of alcoholism after the Ukraine".

During IDP Ward Consultations and Workshops held in recent years, it was repeatedly reported by the Communities that they are gravely concerned about the ever-increasing drug and alcohol abuse in their areas, blaming ineffective policing, lax law-enforcement and poor land-use control for the problem, which has now spiralled out of control, with shebeens and taverns springing up everywhere.

The most densely populated areas, such as Asherville, Geluksdal, Santaville, Eunice Kekana Village and Haggenheim are more prone to violent crime and have been identified by the Communities as hot spots, requiring more effective law-enforcement and police visibility. There have been requests for SAPS satellite stations in some of these areas, as well as more specialized Social Services.

The main challenges faced by living areas in the smaller towns (i.e. Rietbron, Willowmore, Jansenville, etc.) are drug and alcohol abuse leading to violent crime, which is fuelled by unemployment, low morale and lack of recreational facilities. Communities in these areas feel that sector departments are absent, in particular the Department of Social Development.

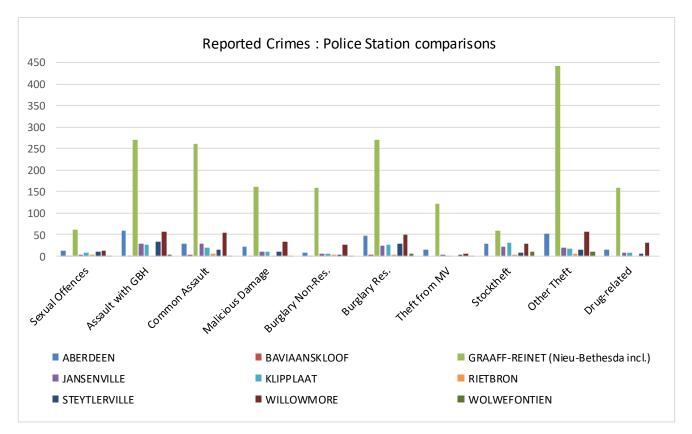

In 2010, the Department of Social Development experienced critical staff shortages. In 2020, the Department reported an improvement in that it was well staffed with Social Workers (SW) and Support Staff (SS) : Graaff-Reinet 13 SW with 11 SS; Willowmore 4 SW with 5 SS; Aberdeen 3 SW with 5 SS; Jansenville 8 SW with 4 SS; Steytlerville 3 SW with 4 SS. Support Staff consist of Auxiliary Social Workers, Social Worker Supervisors, Probation Officers, Community Development Practitioners and Interns. In addition, each Service Centre has an Office Manager, bringing the total of persons employed by the Department in afore-mentioned capacity to 65. Their main challenge is inadequate office accommodation and infrastructure for effective rendering of services.

The table below contains the statistics (sourced from the SAPS's official website) of the 10 most frequently reported crimes in the Dr Beyers Naudé region, from April 2019 to March 2020.

| CATEGORY OF<br>REPORTED CRIME<br>AND LOCALITY<br>(April 2019 to March<br>2020) | SEXUAL OFFENCES<br>(incl. rape & sexual assault) | ASSAULT WITH THE INTENT<br>TO INFLICT GRIEVOUS<br>BODILY HARM | COMMON ASSAULT | MALICIOUS DAMAGE<br>TO PROPERTY | BURGLARY AT<br>NON- RESIDENTIAL PREMISES | BURGLARY AT<br>RESIDENTIAL PREMISES | THEFT OUT OF OR FROM<br>A MOTOR VEHICLE | STOCK-THEFT | ALL THEFT NOT MENTIONED<br>ELSEWHERE | DRUG RELATED CRIME |

| TOTAL  | 113  | 484   | 421            | 251                             | 215                                      | 461                                 | 155                                     | 192         | 622                                  | 229                |

[The Crime Statistics for 2020/21 will only become available during the latter half of 2021.]

### DR BEYERS NAUDÉ CRIME STATISTICS APRIL 2019 TO MARCH 2020

- Graaff-Reinet and Willowmore as the two largest towns represent the highest numbers in all crime categories. Graaff-Reinet and Jansenville show a marked increase in Assault with GBH, while Graaff-Reinet has shown a worrying increase in cases of Common Assault; Malicious Damage to Property and Burglary at Residential and non-Residential premises. The category All Theft not mentioned Elsewhere remains high. Stocktheft has spiked in Willowmore.
- Murder : 26 cases of were investigated in the Municipal area, of which 13 were from Graaff-Reinet. Zero cases were reported in Baviaanskloof and Wolwefontein.
- Drug-related crime has shown a marked decline in most of the towns. Klipplaat shows an encouraging decrease in the number of cases in most of the crime categories.

### 3.3.11 Mobility & Migration (including non-motorized transport)

The majority of people have to travel by foot or on bicycle in order to get to school or place of work. Vast distances need to be covered in the rural areas, where the use of donkey or horse carts by low-income families is still a regular occurrence. There is no state-owned public transport service (plane, train or bus) in the Dr Beyers Naudé and some communities have indicated that the fees being charged by private taxi operators are too high and therefore unaffordable to many. The lack of regular and affordable public transport remains a challenge.

Much progress has been made in recent years with the provision of paved pedestrian walkways between townships, such as Umasizakhe, the CBD and southern areas of Graaff-Reinet. These walkways are making it safer and easier for persons without motorized transport or those in wheelchairs, to travel between the areas where they live and the areas where they work or have to conduct other business. There are approximately 24 km pavements and 5 km walkways in the Municipal area, with more under construction.

The installation of streetlights along the Makwethu road that links Lower Umasizakhe with Upper Kroonvale a few years ago, did address visibility and safety issues. This route is used by many pedestrians and cyclists, especially children on their way to school or sport and recreation facilities. More pedestrian crossings and traffic calming measures, such as circles and speedhumps, are being installed where needed, to enhance pedestrian safety. Future plans include constructing pavements in areas that do not have them.

There are 2 formal taxi ranks in the Graaff-Reinet area, namely one each at Goedhals Square (next to Umasizakhe entrance) and Market Square (Graaff-Reinet CBD). 13 Shelters were originally constructed to serve as pick-up/drop-off points in the areas mentioned, however a few have been vandalised and subsequently removed. Taxi ranks in Aberdeen must be formalized. The phased construction of a main-line bus terminal and taxi rank at Goedhals Square is underway. There are formal taxi ranks in Jansenville, Steytlerville and Willowmore, but no shelters in any of these areas.

A category 3 airport with an all-weather, tarred runway is situated just outside Graaff-Reinet. It is used mainly by small commercial aircraft, some running chartered flights between Graaff-Reinet, Cape Town and Johannesburg. Air traffic to be regulated, due to the airport's close proximity to a National Park. There is a landing strip just outside Willowmore, which is used for commercial purposes and emergency landings.

It will be a major boost to Dr Beyers Naudé's economy, should the railway line between Port Elizabeth and Rosmead / Middelburg be repaired and taken into use again. Industry in Graaff-Reinet especially will benefit if their raw materials and manufactured goods could be transported by rail, instead of road, which is very expensive. A passenger train service between Graaff-Reinet and Port Elizabeth will be a much cheaper and more reliable transport option for students and the poorer members of Dr Beyers Naudé's community. A few years ago, some major repairs and maintenance were done to the line, but currently its future remains unclear.

The most important transportation distributor in terms of the former Baviaans area is the R329 that links Steytlerville in the east to Willowmore in the west. It is also the shortest road between Cape Town and Addo. This route links with the R75 through Noorspoort enabling access to Port Elizabeth, Jansenville and Graaff-Reinet. In the west it runs into the N9, which is an important transport link between the Western and Eastern Cape. These roads are particularly important for the development of agriculture and tourism in the area. The MR411 (secondary road) links Willowmore to Rietbron (Ward 8). There are approximately 3,000 km of unsurfaced roads and 520 km of surfaced roads within the Municipal area, resorting under Municipal, Provincial and National roads infrastructure competencies respectively.

The upgrading of the cement road portion between Steytlerville and Willowmore has been highlighted as a critical spatial intervention that will enable increased economic development. It will cost approximately R250 million to upgrade.

Statistics indicative of trends in the migratory patterns of the Dr Beyers Naudé's population are not available. Many farm workers have moved to the respective towns, due to the change from conventional livestock farming to game farming, which is less labour intensive. There is also an indication that people who leave to find work in cities, return to the Dr Beyers Naudé after a few years. It therefore appears to be more of an internal and rotational migratory pattern, rather than only outward or inward bound.

There has been a tremendous spike in applications for departure and consent of use (i.e. operating spazas or shebeens on residential premises) and the indication is that most of these small businesses are being run by foreign nationals. The Municipality's Town Planning and Building Control Officials are currently investigating complaints in this regard, as it has come to light that many are operating illegally. A Spaza Shop / Informal Trading Policy was developed during 2018/19, and approved by Council in January 2020, along with applicable by-laws that will augment the policy by regulating land-use and operations of spaza shops and similar enterprise.

### 3.3.12 Cemeteries & Crematoria

There are no cremation facilities in the Dr Beyers Naudé region; the closest one is situated in Uitenhage. There are cemeteries in all of the towns; some are owned, managed and maintained by Churches; a few are owned by the Municipality but are being managed and partially maintained by Churches.

Below is a listing of 13 cemeteries that are fully the responsibility of the Municipality, of which some have reached full capacity and most are non-compliant :

| TOWN          | DETAILS   | QTY |
|---------------|---|-----|
| GRAAFF-REINET | Santaville Cemetery : being used & maintained by several Churches.<br>Has reached full capacity and graves are being dug in<br>unauthorized/non-demarcated areas.<br>New Cemetery (opposite Adendorp) : still to be taken into use.   | 2   |
| NIEU-BETHESDA | Pienaarsig : old, not well-maintained. Lime-stone layer is making it difficult to dig graves; machinery required to loosen ground. Will reach full capacity in 2019/20.   | 1   |
| ABERDEEN      | Town : Almost full and graves are being dug in unauthorized/non-<br>demarcated areas. Permission was granted by DEDEAT for<br>extensions, subject to certain conditions.<br>Thembalesizwe : Poorly maintained and managed. Graves are being<br>dug on wrong side of cemetery in unauthorized/non-demarcated<br>areas.<br>Lotusville : Poorly maintained; being used as a dump site. Lime-<br>stone / rocky layer is making it difficult to dig graves. Machinery is<br>required to loosen the ground. | 3   |
| JANSENVILLE   | Town Cemetery in very poor condition. Requires urgent intervention.   | 1   |
| KLIPPLAAT     | Better managed but rocky layer is making digging of graves very difficult.  | 1   |
| WILLOWMORE    | Town : has reached full capacity. Non-compliant. Urgent attention required.<br>N9 Cemetery : close to full capacity. Non-complaint. Urgent attention required.  | 2   |
| STEYTLERVILLE | Town: there is still space but planning needs to start for its extension<br>or a new one.<br>Golden Valley : has been extended without due process being<br>followed; non-compliant.<br>Vuyolwethu : Requires urgent attention; must be extended through<br>proper procedures.  | 3   |

### 3.3.13 Animal Care Facilities and Pounds

The Municipality does not render animal care services and is reliant on organizations such as the SPCA and CSI in Graaff-Reinet, and CARE in Aberdeen, to provide shelter and care for domestic animals and, at times, small livestock. The only veterinary services for the region are situated in Graaff-Reinet (two private animal clinics and one State Vet). There are no appointed Municipal Animal Control Officers or Pound Masters, neither are there animal care or pound facilities in most of the towns. Graaff-Reinet, Willowmore and Nieu-Bethesda have pounds – that are either non-compliant or not functioning and are not being managed or maintained properly.

Organizations rendering these services on behalf of the Municipality require better support.

Existing pounds must be upgraded and properly managed.

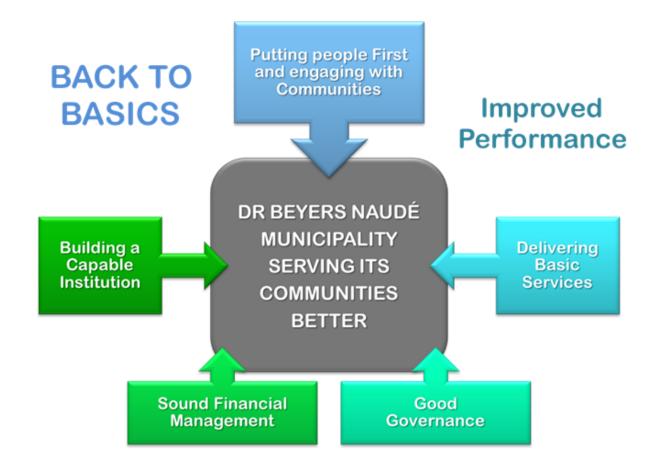

### 3.4 Analysis of Municipal Key Performance Areas

On the following pages we deal with each one of the IDP's five Key Performance Areas, namely

| KPA 1 | Organizational Transformation & Institutional Development   |
|-------|---|
| KPA 2 | Service Delivery & Infrastructure Planning<br>(incl. Human Settlement & Spatial Planning, Environmental Analysis, Disaster<br>Management) |
| KPA 3 | Local Economic Development  |
| KPA 4 | Financial Viability   |
| KPA 5 | Good Governance & Public Participation (incl. IGR & SPU)  |
|       |   |

In each instance an overview is given of the situation, some critical indicators are provided, as well as an indication of progress made or steps being taken in improving or addressing the weaknesses and gaps identified.

In line with COGTA's **Back to Basics** drive, initiated during September 2014, the Municipal focus is best illustrated as follows :

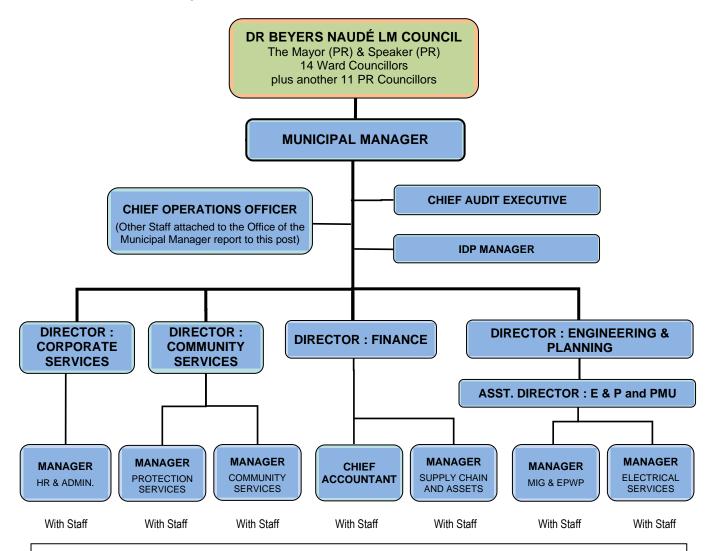

### KPA 1 ORGANIZATIONAL TRANSFORMATION & INSTITUTIONAL DEVELOPMENT

### **ORGANIZATIONAL RESTRUCTURING : POST AUGUST 2016**

To achieve the objectives set out in the IDP, it is vital that the capacity and the transformation needs of the Municipality be clearly defined and understood to ensure that the IDP remains a realistic planning tool. With the inauguration of the newly elected Mayor and Councillors on 18 August 2016, a provisional Organizational Structure was put in place, pending the development of a new one. Sarah Baartman DM provided assistance with the finalization of a new Staff Establishment, through the services of a specialist HR Service Provider.

- Condensed version of temporary staff establishment, showing top structure and posts reporting directly to the Municipal Manager. Each Department falls within one of the four Directorates and has its own sub-structure Organogram.
- A new Staff Establishment was adopted by Council on 20/09/2017 (Resolution SCOUNCIL-065/17). It was reviewed in 2018 (approved by Council on 13/12/2018, Resolution COUNCIL-086.2/18) and will take effect with the Placement Process, which commenced during the latter half of 2019 and is in the process of being finalized after Objections have been considered.
- The Area Co-ordinators based at the Area Offices (Willowmore, Jansenville, Aberdeen & Nieu-Bethesda) are reporting to the Director of Corporate Services and specific functions are being co-ordinated by the relevant Directorates and/or Department Managers in Graaff-Reinet. Area Co-ordinators are responsible for managing the Satellite Offices within their region.

The new Organogram (being populated through Placement) is attached as ANNEXURE B.

### **INSTITUTIONAL TRANSFORMATION : POST AUGUST 2016**

Dr Beyers Naudé Local Municipality is committed to the principles of Employment Equity and will be making a conscious effort to appoint historically and previously disadvantaged individuals in the top four tiers of its Staff Establishment. The Municipality will also be looking at appointing more females in its general workforce, which is still overwhelmingly male-dominated, mainly due to the physical requirements attached to many of these posts. The tables below provide a summarized version of the provisional staffing situation as at February 2020.

| TOP FOUR TIERS    |              | POSTS | FILLED | MALE | FEMALE | BLACK | COLOURED | WHITE |
|-------------------|--------------|-------|--------|------|--------|-------|----------|-------|
| Municipal Manager | (Section 57) | 1     | 1      | 1    |        |       | 1        |       |
| Director          | (Section 56) | 4     | 1      | 2    | 2      | 1     | 2        | 1     |
| COO, CAE          | (Permanent)  | 2     | 2      | 2    |        |       | 2        |       |
| HODs / Managers   | (Permanent)  | 14    | 12     | 7    | 5      | 5     | 2        | 5     |

| SECTION OR<br>DEPARTMENT             | TOTAL<br>POSTS                   | FILLED<br>(funded) | VACANT<br>(funded ><br>3 months) | FROZEN<br>(unfunded) | MALE     | FEMALE                   | BLACK      | COLOURED | WHITE | DISABLED      |

There are currently 6 extended contract Finance Interns and 3 IT Interns with the Municipality, whilst 16 temporary personnel are employed on a month-to-month contractual basis.

In line with the Municipality's Succession Planning, opportunities are created for employees to advance within the ranks of the Institution, through vacant posts first advertised internally, and only if no suitable internal candidate can be found, will the post be advertised externally. The Municipality's Workplace Skills Plan is reviewed annually; the most recent one was submitted to LGSETA along with the Municipality's annual Training Report in April 2020. 2% of the Municipality's annual Operating Budget is applied towards implementing the WSP. Section 10 of the WSP addresses the issue of Critical & Scarce Skills, and the Municipality fully supports its staff being trained in Capacity Building and Scarce Skills, which consist of the following categories :

- Civil engineers & Electricians
- Chartered Accountants
- Financial Managers
- IT Specialists

- Project & Programme Managers
- > Town Planners & GIS Specialists
- Environmental Management Practitioners
- Protection Services & Disaster Management

(PS : Sarah Baartman DM has a list of more specialized skills at a District level.)

### **ORGANIZATIONAL PERFORMANCE MANAGEMENT, M&E**

### Performance Management Policy Framework

(Revised and adopted by Council on 02/07/2019, resolution COUN-034.2/19)

Performance management includes a range of processes, techniques and methods that facilitate the identification of key performance indicators (KPIs), targets and measurement of progress towards achieving these. Effective performance management is a key ingredient of Good Governance and is increasingly playing an important role in the management of service delivery. The Municipality is currently making use of a manual performance management system (PMS), which includes quarterly in-year performance evaluation, thereby ensuring that performance is monitored, measured, evaluated and reported on. An automated system is available, but still needs to be utilized, however, this is dependent on the finalization of the Placement Process.

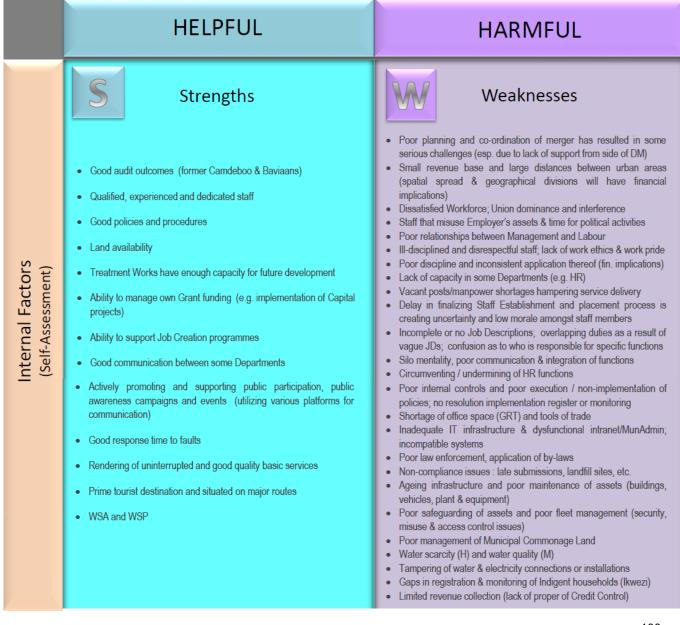

Individual performance is monitored through the development of Performance Contracts & Plans for the Municipal Manager & Directors (fixed term contracts). The Municipal Manager and Directors have entered into performance agreements and plans for the 2020/21 financial year. Employees' performance is evaluated quarterly in terms of the SDBIP's high level Key Performance Indicators and Targets, based on the Balanced Scorecard system. The intention is to cascade the PMS down to lower tiers of management and eventually all other positions within the institution, to create a culture of performance management within the Municipality.

### **INSTITUTIONAL SWOT ANALYSIS 2016/17**

As part of the development of its new 5-Year IDP, the Municipality conducted a very thorough Institutional SWOT Analysis during December 2016, of which the results were discussed at subsequent Management Meetings, as well as at IDP Steering Committee and IDP Representative Forum Meetings held in March 2017. The following weaknesses were identified as the top problematic areas and deserving of focused and urgent attention or intervention :

- Small revenue base and large distances between urban areas (enormous spatial spread)
- Poor planning and co-ordination of merger has resulted in serious challenges
- Delay in finalizing staff establishment and placement process
- Poor safeguarding of assets and poor fleet management
- Ageing infrastructure and poor maintenance of assets
- Limited revenue collection, poor Credit Control
- Poor law enforcement, application of by-laws
- Lack of capacity in some Departments

A thorough exercise was conducted in analysing the Institutional Weaknesses. They were listed on a template and then circulated to all Municipal Directorates, Departments and Satellite Offices of Dr Beyers Naudé LM, and each Senior Manager, HOD or Area Manager had to rate them. The results were consolidated (see table on next page) and this will serve as a monitoring tool for the next few years, when a similar exercise will be conducted during each year's IDP review. The objective would be to improve the situation year-on-year. The latest analysis appears on the next page. These results formed the basis of a 3-day Strategic Planning Workshop that was held in January 2018 and from which a Turnaround Strategy with Action Plan was the outcome.

It is of utmost importance that the Placement Process be completed, Objections be dealt with and the new Staff Establishment not only be populated, but also be subjected to a rigorous review. Pay parity will be a challenge, as it is foreseen that there will have to be some post level and salary adjustments, once job evaluations have been completed and the matter surrounding the Municipality's grading has been resolved. This will hold severe financial implications for the severely cash-strapped Municipality; the Staff Establishment is going to have to be a rational and affordable one. Attention must also be paid to the low staff morale and elements that are creating labour unrest or dissatisfaction within the institution. The situation needs to be brought under control and stabilised, with focus on areas experiencing inadequate supervision and insubordination, poor discipline and the inconsistent application thereof.

Another big challenge is the one of centralization of functions. With such a vast area to service, it would be unwise to pool all resources and expertise in one centre. Taking into consideration the distance between the main centre of Graaff-Reinet (the seat of Dr Beyers Naudé LM) and Willowmore (the second largest town), it would be prudent to strengthen the skills base and capacity of Willowmore and provide that centre with suitably competent staff and sufficient resources with which to efficiently manage and co-ordinate service delivery in the lower region of the Municipal area.

| ANALYSIS OF INSTITUTIONAL WEAKNESSES : OCT. 2019   | HIGH | MED | LOW |
|--|------|-----|-----|
| Continued negative impact of poor planning and co-ordination of merger and resultant critical challenges (including lack of support)   | 8    | 11  | 1   |
| Small revenue base and large distances between urban areas (spatial spread & geo-<br>graphical divisions will have financial implications)   | 18   | 1   | 1   |
| Dissatisfied Workforce; Union dominance and interference   | 5    | 11  | 4   |
| Staff that misuse Employer's assets & time for political activities  | 6    | 8   | 6   |
| Poor relationships between Management and Labour   | 0    | 8   | 12  |
| III-disciplined and disrespectful staff; lack of work ethics and work pride  | 11   | 6   | 3   |
| Poor discipline and inconsistent application thereof (financial implications)  | 8    | 9   | 3   |
| Lack of capacity in some Departments   | 6    | 11  | 3   |
| Vacant posts/manpower shortages hampering service delivery   | 12   | 6   | 2   |
| Poor or lack of proper consultation in finalizing & implementing new Staff Establishment<br>and the delay in placement process is creating uncertainty and low morale amongst<br>staff members | 12   | 6   | 2   |
| Incomplete or no Job Descriptions; overlapping duties as a result of vague JDs, causing confusion as to who is responsible for specific functions (i.e. clear segregation of duties)           | 16   | 3   | 1   |
| Silo mentality, poor communication & integration of functions  | 9    | 7   | 4   |
| Circumventing/undermining of HR functions (incorrect channels)   | 6    | 9   | 5   |
| Poor internal controls and poor execution / non-implementation of policies; no<br>resolution implementation register or monitoring   | 4    | 11  | 5   |
| Shortage of office space (in some Directorates/Depts) and tools of trade   | 8    | 6   | 6   |
| Inadequate IT infrastructure & dysfunctional intranet/MunAdmin; incompatible systems   | 15   | 4   | 1   |
| Poor law enforcement, application of by-laws / outdated  | 18   | 2   | 0   |
| Non-compliance issues : late submissions, landfill sites, etc.   | 12   | 7   | 1   |
| Ageing infrastructure and poor maintenance of assets (buildings, vehicles, plant & equip)  | 17   | 3   | 0   |
| Poor safeguarding of assets and poor fleet management (security, misuse & access control issues)   | 8    | 12  | 0   |
| Poor management of Municipal Commonage Land  | 6    | 11  | 3   |
| Water scarcity and water quality   | 17   | 1   | 2   |
| Tampering of water & electricity connections or installations  | 6    | 9   | 5   |
| Gaps in registration & monitoring of Indigent households   | 2    | 12  | 6   |
| Limited revenue collection (lack of proper of Credit Control)  | 10   | 7   | 3   |
| Water & electricity losses (as a result of ageing infrastructure, defective meters or<br>unmetered provision)  | 10   | 9   | 1   |
| Non-responsiveness of HR on staff issues   | 1    | 13  | 6   |
|  | 46%  | 38% | 16% |
| CONTROL TOTALS (20 out of 24 respondents; 540 out of 648 responses)  | 251  | 203 | 86  |

We're in trouble - red lights are flashing if score is 10 and higher

Borderline – not good if score is higher than 8 (leaning to RED)

Looking good – if score is higher than 10

 Above results indicate a slight improvement on previous years' performance, but much still needs to be done to show a meaningful and positive change in the situation.

### KPA 2

## SERVICE DELIVERY & INFRASTRUCTURE PLANNING

The information in this section was obtained from various sources, including the following :

- National Census and Community Surveys conducted periodically by Statistics SA,
- Basic Services Publication by COGTA : Comparative Information on Basic Services 2009,
- IDPs and Sector Plans that were in place at the Camdeboo, Baviaans and Ikwezi LMs,
- Municipal Debtors' database latest figures are transferred annually.
- A Water Summit held in Graaff-Reinet in December 2019, that involved stakeholders from all spheres of Government, cross-border Municipalities and the Private Sector.

Guidance is also taken from the annual SONA, SOPA and other Government directives, in which much emphasis is placed each year on the development of adequate infrastructure for the effective provision of basic services.

### **BASIC SERVICES ANALYSIS**

The following information was supplied by Dr Beyers Naudé Municipality's Treasury Department, in respect of current consumer accounts on its billing system for the 2020/21 Financial Year :

| CATEGORY OF SERVICE 2020/21<br>(Current Consumer Accounts) | TOTAL POINTS<br>BEING SERVICED | CONSUMER<br>ACCOUNTS |  |  |  |  |  |  |  |
|--|--------------------------------|----------------------|--|--|--|--|--|--|--|
| 1. METERED WATER   |                                |                      |  |  |  |  |  |  |  |
| Domestic Consumers   | 15,654                         | Residential          |  |  |  |  |  |  |  |
| Business Consumers   | 935                            | Businesses           |  |  |  |  |  |  |  |
| Government Consumers                                       | 71                             | Departments          |  |  |  |  |  |  |  |
| TOTAL  | 16,660                         | CONSUMERS            |  |  |  |  |  |  |  |
| 2. 6   | LECTRICITY                     |                      |  |  |  |  |  |  |  |

| Domestic Consumers   | 13,524 + 15                    | Residential          |  |  |  |  |  |  |  |
| Business Consumers   | 381                            | Businesses           |  |  |  |  |  |  |  |
| Government Consumers                                       | 112                            | Departments          |  |  |  |  |  |  |  |
| TOTAL  | 14,032                         | CONSUMERS            |  |  |  |  |  |  |  |
| 4. REFUSE REMOVAL  |                                |                      |  |  |  |  |  |  |  |
| Domestic Consumers   | 16,164                         | Residential          |  |  |  |  |  |  |  |
| Business Consumers   | 767                            | Businesses &         |  |  |  |  |  |  |  |
| Government Consumers                                       | 101                            | Departments          |  |  |  |  |  |  |  |
| TOTAL  | 16,931                         | CONSUMERS            |  |  |  |  |  |  |  |

- Information provided in the table on the previous page relates only to the number of consumer points (erven) being serviced by Dr Beyers Naudé Municipality in its built-up areas (urban, including smallholdings); Farms / farm dwellings (non-urban) are not being serviced by the Municipality and those households are therefore not included.
- Many households receive electricity directly from Eskom and a number of urban households are not connected to Municipal water or sewerage services; for instance some Nieu-Bethesda and Adendorp properties have septic tanks (sewage disposal) and boreholes (for potable water). 15 Informal Households in the Graaff-Reinet area (Sunnyside and De Draai) are being billed for Sanitation: Communal Facility.
- Ring-fencing of these services will be transacted once the Municipality's accounting systems have been standardized and mSCOA has been fully institutionalized.
- Non-Revenue Water (NRW loss) currently stands at an average of 47% (measured over a 7-month period, July 2020 January 2021). A recent water meter audit indicated that a large percentage of serviced properties had defective meters, or no meters at all. The Municipality is in the process of addressing this and aims to reduce NRW loss by 2% p.a. with proper maintenance and upgrading of the reticulation systems, which will include installation of meters in areas such as Klipplaat, where consumers have not been connected.
- Non-Revenue Electricity (NRE loss) currently stands at an average of 17% (measured over a 6-month period, July – December 2020). The Municipality has been investigating areas where illegal connections were allegedly taking place and is closely monitoring its distribution system for irregularities and defects, which are addressed as and when they are identified.

### Indigent households currently make up 51% of all Domestic Consumer Accounts :

\* Approximate number of urban residential sites being serviced by the Municipality. Average number of households receiving direct/indirect benefit from the Municipal Basic Services = 17,050 (Excluding rural or farm dwellings.) An audit of Indigent Households is being conducted, in conjunction with a full review of the Municipality's Indigent Register, to ensure that all qualifying households are registered on the billing system and are being subsidized. Eskom = estimated.

The table below contains the service level indicators for both the total number of households in the Municipal area (urban + non-urban), as well as those that are only being serviced by the Municipality (i.e. connected to Municipal reticulation or distribution systems) :

<u>NB</u> Consumer Accounts (A/C) represent the number of Municipal properties being serviced (as per Debtors' database) and are not indicative of the number of households receiving the benefit of the service. There could be more than one household on a property.

- StatsSA's Census 2001 & 2011, as well as their 2016 Community Survey results, are a combination of urban and non-urban households. The total number of households within urban areas of Dr Beyers Naudé LM is estimated at 17,950 in 2021 the majority of which are receiving the benefit from Municipal services. This would be inclusive of formal and informal settlements, formal dwellings and backyard shacks. About 3,350 non-urban households (farm dwellings) brings the total number of households to an estimated 21,300 based on an average ratio of 4 persons per household.
- Eskom's prepaid Domestic Consumer stats include a number of farm dwellings being serviced by them. However, most of the farms are receiving metered electricity from Eskom.

The table below summarises the number of households with access to basic services in the whole of the Dr Beyers Naudé Municipal area (urban and non-urban), but with anomalies :

According to the Municipality's Valuation Roll, there are 23,215 properties on the database, of which 15,848 are classified as residential, 708 business; 2,373 Government (incl. public benefit) and 4, 286 Agricultural (farms & smallholdings). Updated February 2021.

Dr Beyers Naudé is not an industrialized area, with only some light to medium industry being situated mainly in the Industrial Areas of Graaff-Reinet and Willowmore. The Municipality provides and maintains bulk services to its commercial and industrial areas, as well as to all government institutions.

Bulk infrastructure for new developments (housing and higher level) forms part of the Municipality's forward planning, based on population and industry growth trends and projections.

# **SERVICES & INFRASTRUCTURE : STREETS & STORMWATER**

Road infrastructure affects development in sectors such as tourism, agriculture and general migration. Whilst streets in previously disadvantaged areas have been receiving much attention, the upgrading has been of a poor standard and communities are dissatisfied. The road network within previously advantaged centres has deteriorated drastically over the past few years and in some areas, road markings are no longer visible. The communities have urged the Municipality to pay urgent attention to the afore-mentioned, as well as to road traffic signs and traffic calming measures. Tourism is one of Dr Beyers Naudé LM's main economic drivers and it is therefore crucial that roads, signage & markings be of a good standard and properly maintained.

There are two categories of Roads, namely those that are classified as "internal" streets or roads; those that are situated within the urban areas and the direct responsibility of the Municipality, and the other "external" roads that are the responsibility of either the Provincial Department of Roads and Public Works, or SANRAL. Gravel roads connecting towns with rural farming communities are usually referred to as District Roads and their maintenance is the responsibility of DRPW.

A recent Environmental Scan indicated that most of the access roads to some of the smaller and more remote towns and settlements were in a reasonable to good condition, but these roads do deteriorate rapidly as a result of heavy seasonal rains, causing flooding in some areas, or lack of proper maintenance.

In general, the surfaced Provincial and National Roads (MR, R and N routes) are in a reasonably good condition, but the R75 between Graaff-Reinet and Port Elizabeth has been worked on for several years and major inconvenience is being caused to motorists as a result of the work lagging far behind schedule, due to insufficient funds being allocated to the Provincial Department. More detail is provided in the tables below.

Because of its vast geographic spread, and huge distances between some of the towns and smaller settlements, it is important that the roads networks in the Dr Beyers Naudé Municipal area be maintained regularly and the work be of a high standard. The region is heavily dependent on agriculture and tourism to sustain its economy, and therefore requires primary and secondary routes to be in a good condition at all times.

| MUNICIPAL F  | ROADS INFRAS                            | TRUCTURE   | CAMDEBOO                 | IKWEZI                   | BAVIAANS                 | DR BNLM                  |

(NB : Camdeboo's internal roads stats were sourced from a recent audit of Municipal Roads Infrastructure, whilst those of Ikwezi were sourced from Sarah Baartman District Municipality's IDP and Baviaans from Baviaans' IDP. Other data was sourced from either the respective Municipal IDPs or from the District's IDP. \* The figure given for Ikwezi's road infrastructure appears to be totally inaccurate. \*\* To be verified)

#### **GRAAFF-REINET AND ENVIRONS**

The former Camdeboo Municipality, consisting of 7 Wards, was unable to address the critical issue of Streets & Stormwater (the No. 1 Development Priority in terms of its Ward-based Planning outcomes), due to the magnitude of the problem and insufficient budget. All areas – Graaff-Reinet Aberdeen and Nieu-Bethesda; their townships and suburbs – are experiencing serious problems with unsurfaced roads and inadequate stormwater drainage.

Many of the surfaced streets are potholed and unsurfaced streets are not being maintained properly. There is a huge problem with stormwater run-off on the sloped areas. Some homes are periodically flooded. Traffic calming measures are a critical need in certain areas. It has been suggested on a number of occasions that these unsurfaced internal streets be paved, and lined with stormwater channels, which would be a labour-intensive project for job creation during construction, and create some opportunities during periodic maintenance.

The southern section of the MR605 to Nieu-Bethesda was tarred a few years ago, but the work stopped about 3 kilometres outside Nieu-Bethesda, leaving a stretch of gravel road that is in a poor condition. The surfacing of this last section of the MR605, which was categorized as a T1 route, must be completed as soon as possible. Nieu-Bethesda is a major tourist destination in the region, with up to 15,000 tourists visiting the Owl House each year. This route is a Provincial competency. It was announced late in 2019 that this work will commence early in 2020.

#### WILLOWMORE AND ENVIRONS

The streets in the urban areas of Willowmore, Steytlerville and Rietbron are generally in a good condition, although there are potholes on some of the tarred sections and not all streets have been provided with stormwater drainage. Many of the township streets have been surfaced (cement pavers) in recent years, with stormwater channelling. Bicycle lanes, speed humps and other traffic calming measures are needed in some areas.

The R329, which connects Willowmore and Steytlerville, and is also the shortest route for those towns to Port Elizabeth, is partially surfaced with a narrow cement strip. This section, of about 37 km, requires maintenance and upgrading. The R332 (T1 & T2) to the Baviaanskloof has deteriorated to the extent that some parts have made access to the more remote communities and settlements very difficult, if not impossible.

The MR411, access road to Rietbron, is in urgent need of upgrading. This road causes many fatalities and sector departments are wary of using this road, hence social and health services are being neglected. All these routes are Provincial competencies.

#### JANSENVILLE AND ENVIRONS

The streets in the urban areas of Jansenville and Klipplaat are in a very poor state of repair, due to ageing and lack of proper maintenance. Some of the tarred sections have virtually disintegrated and there is inadequate provision for stormwater drainage – in some areas none. The same situation exists in Waterford and Wolwefontein, where streets are receiving no attention at all.

Many of the township streets in Jansenville have been surfaced (cement pavers) in recent years, with stormwater channelling, but the paving project in Phumlani came to a halt due to funding issues. Streets in Klipplaat are mostly unsurfaced, without stormwater drainage.

The R339 between Jansenville and Klipplaat was tarred in recent years, which has made travelling a whole lot easier, especially for people commuting between the two centres on a daily basis. The R400 to Waterford, however, is unsurfaced and is not being maintained regularly. Both these routes are Provincial competencies.

- Some residential areas in the Dr Beyers Naudé Municipal region are experiencing severe problems with flooding as a result of inadequate stormwater drainage. Municipal streets are in serious need of proper maintenance and require surfacing or resurfacing. Potholes must be fixed properly, and not just filled up as a quick-fix short-term solution. The Infrastructure Plan that had been commissioned by the former Camdeboo Municipality to address, *inter alia*, the streets and stormwater problem, should be revised to include the whole of the new Municipal area. Funding must be lobbied for from National Government. Pavements also need to be looked at; some areas have no pedestrian walkways and in others, existing ones are in a poor and even dangerous state.
- A Roads & Transport Forum is in place and is functioning well. A Service Level Agreement is in place with the Dept. of Transport. An Urban Design Plan for Graaff-Reinet – to improve transport services & infrastructure, which will include a weighbridge – was developed a few years ago. BNLM utilizes the District RRAMS.
- There is a Grade A Municipal Vehicle Testing Station in Graaff-Reinet and Willowmore, as well as a Grade A Driving License Centre in Graaff-Reinet and a Grade B Centre in Willowmore all are housed in the facility responsible for driver testing, vehicle and driver licensing, and traffic law enforcement.
- > Section 3.3.11 of the IDP deals with mobility, non-motorized and general transport issues.
- Traffic safety measures must be stepped up, as speeding and reckless driving are a big problem, exacerbated by non-payment of fines and/or the withdrawal of Section 56 notices by the local National Prosecuting Authority; thus creating a situation where violators are not brought to book. The high volume of freight traffic using the N9, N75 and R63 through Graaff-Reinet is a major concern and appears to be the result of a weighbridge installed close to Paterson, causing large and often overloaded trucks and buses to divert from their normal route and proceed to Port Elizabeth on the R75 in order to bypass the weighbridge.
- The issue of freight traffic has been addressed in Sarah Baartman DM's Integrated Transport Plan (adopted by the former Municipalities); this and other aspects (such as traffic-calming measures and provision for nonmotorized transport) will receive attention during its review and the development of Dr Beyers Naudé Municipality's own ITP.
- Some Wards are experiencing critical problems with stormwater flooding (mostly related to poor road construction), which will be systematically addressed in the annual IDP Review and Budget Planning.

Additional grant funding is urgently required to address Dr Beyers Naudé's Roads & Stormwater backlogs. Staffing is adequate, but service delivery can be improved by filling the vacant posts in the Department; this is receiving attention.

#### (NERSA REGISTRATION NER/D/EC101)

According to the 2016 Community Survey, 95% of households in the Dr Beyers Naudé Municipal area had access to a minimum level of electricity. Within the urban areas, the Municipality and Eskom maintain a service level of 96%.

Historically, Camdeboo and Baviaans shared the function of electricity provision with Eskom; i.e. in some areas the Municipality is the provider and in others, Eskom (mainly through prepaid meters). Ikwezi bought in bulk from Eskom and then sold the electricity to its consumers. Electrical infrastructure in the region is generally good, and only a couple of small and remote settlements do not have access to an electrical supply. There have been requests that the Municipality take over the full function of electricity provision, but that will entail purchasing all infrastructure (capital assets) from Eskom, which simply is not an affordable option at this time.

In the Spatial planning of the former Municipalities, provision was made for bulk and reticulation installations, in areas being earmarked for new Housing developments (Lowcost, Middle-income & Social); Commercial and Industrial development. These projects will be implemented in phases. Provision is made for the upgrading & maintenance of existing infrastructure and staffing in this department is being improved through the gradual filling of vacant posts.

An Electricity Delivery & Maintenance Master Plan must still be developed for the Municipality. Due to its dire financial situation, the Municipality is unable to make sufficient budgetary provision for maintenance of infrastructure; for instance, there are no back-up generators at present.

Dr Beyers Naudé is not only investigating, but implementing alternative & renewable energy options. For instance, a recent project (2019/20), was the replacement of standard street lights and high mast lights with energy-efficient LED ones – a R10 million initiative in partnership with GIZ. Some private initiatives are gaining momentum and the Municipality is assisting in land release in support of these initiatives. EIAs for proposed Wind and Solar Energy Farms close to Aberdeen were conducted and a piece of land has been allocated within the Graaff-Reinet area for the construction of a Solar Energy Facility. Another initiative ~ the Giant Flag ~ incorporates a Solar Energy Facility as part of its sustainability design. More information can be found in the section dealing with Alternative & Renewable Energy Proposals.

Potential damage to roads and other infrastructure by some of the renewable (wind & solar) and alternative energy initiatives (such as shale gas and uranium mining), and their strain on the region's scarce water resources, is a concern. Abnormal Load vehicular traffic has increased drastically as a result of the transportation of wind turbine components.

#### GRAAFF-REINET AND ENVIRONS

The Municipality buys bulk electricity from Eskom, which it then sells to consumers in Graaff-Reinet CBD and the Horseshoe residential area, as well as the southern suburbs up to Adendorp; also Aberdeen CBD and residential area, plus Thembalesizwe. Umasizakhe, Lotusville and Nieu-Bethesda consumers buy directly from Eskom. Some network upgrades are required, for instance old MVE infrastructure and switch gear in the northern part of Kroonvale.

#### WILLOWMORE AND ENVIRONS

The Municipality buys bulk electricity from Eskom, which it then sells to consumers in Willowmore and Steytlerville. Eskom's maximum demand for Willowmore was upgraded during 2017/18, and has addressed the issue of penalties being charged as a result of consumption exceeding the allotted demand – especially during the winter months. This upgrade should see an improvement in the socio- economic growth of Willowmore, where the problem was particularly severe and some projects were put on hold. Steytlerville, on the other hand, remains in need of a maximum demand upgrade. There is an indication that this will receive attention in 2021/22.

Rietbron and Vuyolwethu buy directly from Eskom. However, the vendors selling prepaid electricity to Eskom consumers become the Municipality's responsibility, and there are challenges with this arrangement. Vondeling has no access to electricity, whilst the small, remote settlement of Miller is some distance away from the nearest prepaid vendor.

#### JANSENVILLE AND ENVIRONS

The Municipality buys bulk electricity from Eskom, which it then sells to consumers in Jansenville. The maximum demand being provided by Eskom is inadequate and needs to be upgraded as a matter of urgency. Currently the consumption during winter months exceeds the allotted demand, resulting in heavy penalties from the side of Eskom, which the Municipality cannot afford. There is an indication that this will receive attention in 2021/22.

Klipplaat, Wolwefontein and some households in Waterford buy directly from Eskom. A housing project in Waterford has been put on hold due to insufficient electrical infrastructure, which has to be installed by Eskom.

The Municipality's Electrical Department in Jansenville is seriously understaffed and proper attention cannot be given to the maintenance of electrical infrastructure (where some upgrades are required) – due to the lack of manpower, expertise, materials and financial resources. Illegal installations also pose a problem.

Renewable energy sources, such as solar power, should be further investigated for basic energy-provision to the more remote settlements in the Municipal area.

# **SERVICES & INFRASTRUCTURE : WATER**

| IN DR BEYE | USEHOLDS<br>ERS NAUDÉ<br>Non-urban) | TOTAL HO<br>With access<br>level of |         | TOTAL RESIDENTIAL<br>CONSUMER ACCOUNTS | NO. OF HOUSEHOLDS<br>Receiving benefit of<br>Municipal service, based |
|------------|-------------------------------------|-------------------------------------|---------|--|---|
| 2011       | 2021 est.                           | 2011 C                              | 2016 CS | Municipal Database 2021                | on 2021 growth estimate   |
| 19,925     | 21,300                              | 19,859                              | 20,383  | 15,654 out of 16,164                   | 17,410 out of 17,950  |

According to Census 2011, 98% of households in the Dr Beyers Naudé Municipal area had access to piped water on their premises or within 200m from their dwelling. Within its urban areas, the Municipality maintains a service level of 97%. RDP Housing Projects have basic services installed (including metered water with tap in dwelling) during construction.

There are no sprawling Informal Settlements (only small pockets, the largest of which are situated in Graaff-Reinet) and most households in these areas do have access to private or communal water points. Rainwater tanks and more communal taps are being installed in all towns, as part of the 2019/20 Drought Relief and COVID-19 programmes.

The whole of the Dr Beyers Naudé Municipal area falls within a water scarce region. The largest part of the Municipality is situated in the Karoo, a semi-arid area with extremely high summer temperatures and very cold, dry winters. Low annual rainfall with extended dry spells create water shortages and there is a dependency on underground water, to a very large degree. The Municipal water supply is augmented by borehole water in most of the region; in some areas it is the only source of water. In recent years, provision has been made to equip RDP houses with gutters and rainwater tanks, but there are still many households without and this is putting a severe strain on the region's limited water supply. The whole region has experienced an unprecedented drought over the past 5 years, which has also impacted severely on aquifers.

The former Camdeboo, Ikwezi and Baviaans Municipalities were WSAs and WSPs; these functions were transferred to the new Municipality. The District Municipality has appointed a Service Provider to assist with the development of a new WSDP for BNLM and DWS is assisting with the development of new Master & Maintenance Plans.

Additional grant funding is urgently required to systematically upgrade / replace the Municipality's Bulk Water Supply reticulation, storage and treatment systems.

#### GRAAFF-REINET AND ENVIRONS

Water is obtained from two different sources:

- → Surface sources (i.e. Nqweba Dam as the main supply of water to Graaff-Reinet and its suburbs; and spring-fed waterfurrows in Aberdeen and Nieu Bethesda);
- ➔ Groundwater extraction sources (i.e. 35 boreholes at Graaff-Reinet, 10 boreholes at Aberdeen and 2 boreholes at Nieu-Bethesda). In addition, several new boreholes were sunk during 2019 by Gift of the Givers, as well as the Municipality as part of the Drought Relief programme funded by National Government. This is an ongoing project.

There is one main domestic water supply dam, namely the Nqweba Dam, in Graaff-Reinet. The dam does run dry during severe drought periods, and measures have been put in place to upgrade the town's emergency water supply, which is sourced from boreholes situated in the Northern well field and Mimosadale well field. Aberdeen and Nieu-Bethesda are dependent on underground water, of which there are two sources, namely perennial springs situated close to each of the two towns, and boreholes.

Two of the boreholes in Aberdeen are not in working order; another three have subsequently been drilled and equipped; 9 in Graaff-Reinet are operational and 5 are for monitoring. BNLM is in the process of having the other 16 Graaff-Reinet boreholes rehabilitated and a new pipeline installed to provide adequate Emergency Water Supply to the town. A 1.8ML steel reservoir was also constructed as part of the project (replacement of old dilapidated concrete reservoir).

The former Camdeboo Municipality handed over the Nqweba Dam to the Department of Water & Sanitation, subject to the conditions of a Contractual Agreement, as it requires extensive attention in terms of its current condition, safety and capacity. However, to date, no remedial construction has commenced on the dam, and its safety status and potential risk to the community remains a big concern.

The Water Treatment Works are operating well, with regular testing taking place, but there is concern about the ageing infrastructure and problems are being experienced with leakages in underground reticulation networks and old pipes that are bursting. Water quality problems will be experienced during drought conditions. The Municipality conducted a water meter audit, and defective meters are in the process of being replaced; bulk meters are also being installed. All consumer points being serviced by the Municipality are metered and billed on a monthly basis.

#### WILLOWMORE AND ENVIRONS

Willowmore is experiencing severe water shortages. The town sources its domestic water supply from underground boreholes situated on Wanhoop, a privately-owned farm. There are servitude issues that have resulted in litigation and require urgent attention, *inter alia* acquiring the farm by means of expropriation, as a last resort. There are 11 operational boreholes and 4 that are for monitoring. Another two boreholes were drilled some time ago to increase the bulk water supply to the town; they were recently equipped, with the pipeline also receiving attention.

Steytlerville sources its domestic water supply from underground boreholes, in addition to the abstraction of water from the Erasmuskloof River that is tributary to Groot River. The Steytlerville Bulk Water Supply : Conjunctive Scheme project, which is utilizing surface water from Erasmuskloof via the Groot River, was implemented to increase the capacity of water supply and to provide water to the treatment works in Steytlerville. The total cost of the project was R116.5 million. It was funded by DWS and DTI and will address the water problem as a medium-term solution. Maintenance of the installations is currently an issue that requires urgent attention.

Rietbron, Baviaanskloof and other settlements are dependent on underground water, by way of boreholes, some of which are being maintained by the Municipality. There is concern about ageing infrastructure in the Municipality and problems are being experienced with leakages in underground reticulation networks and old pipes that are bursting.

All consumer points being serviced by the Municipality are metered and billed on a monthly basis.

#### JANSENVILLE AND ENVIRONS

Jansenville sources its water from boreholes, whereas Klipplaat receives water from the Klipfontein Dam. Most RDP houses have been provided with gutters and rainwater tanks to augment the Municipal water supply. During the hot summer months, the increased water usage becomes problematic as a result of the limited storage facilities.

The Water Treatment Works are understaffed and there are serious issues with the water quality that requires some focussed intervention, proper monitoring and testing. The Municipality is implementing a project to increase the water supply to Jansenville, by equipping two sulphurwater boreholes and installing a bio-filter package water treatment unit for purification.

There is concern about the ageing infrastructure and high water losses are being experienced as a result of leakages in underground reticulation networks and old pipes that are disintegrating. Domestic consumers are also not attending to water leaks on their properties.

Waterford and Wolwefontein are dependent on boreholes and rainwater tanks. The boreholes in Waterford are maintained by the Municipality, but the boreholes in Wolwefontein are maintained by Transnet.

All households being serviced by the Municipality in Jansenville are connected to water meters, but the consumers are not being billed per metered consumption – only a flat rate is being charged; a similar situation exists in Klipplaat, where areas are still to be connected to meters, and/or added to the Municipal Debtors' database.

The Municipality is actively encouraging communities to be water smart and to save on usage wherever possible. Several campaigns have been implemented to create public awareness, and stringent water restrictions have been implemented in areas that were worst affected by the recent drought. A Drought Relief allocation of R468,000 was received in 2018 and was utilized towards investigations into securing a sustainable potable water supply for the remote settlements of Vondeling, Fullarton and Miller. Another R30 million was availed in 2019.

Campaigns are ongoing and regularly advertised in the local newspapers, social media and Municipal newsletters.

# **IRIS WATER QUALITY MANAGEMENT**

Throughout the country, Water Services Authorities (WSA) are required to report monthly on their drinking water analysis and results. DWS has over the past few years rolled out water monitoring and management systems, which the Municipality has been utilizing as a tool for the provision of useful information on water quality, trends and other data.

Dr Beyers Naudé's drinking water is tested on a regular basis and the treatment of water is monitored. Microbiological testing & analysis is conducted monthly by the National Health Laboratory and chemical testing & analysis is conducted quarterly by the Nelson Mandela Metro Municipality.

On average tests show that there is a 0 in 100 e-coli count. Exceptions occur only when there has been a break in the reticulation, or if there has been illegal tampering with the system and its reservoirs.

Due to critical staff shortages and severe financial constraints over the past few years, the Municipality was not always able to comply with the monthly reporting requirement.

The next page contains the Institutional Compliance results for January to December 2020 and the breakdown of results for the Microbiological Compliance, as at December 2020, sourced from the DWS IRIS website. More recent data not yet available.

### Sanitation : Sewerage Disposal & Treatment

According to the 2016 Community Survey, 96% of households in the Dr Beyers Naudé Municipal area had access to a flush toilet or a minimum of a VIP pit latrine or chemical toilet. Within its urban areas, the Municipality maintains a service level of 84%. In some urban areas, a number of households have their own septic tanks and are not connected to the Municipal sewer system. Very good progress has been made in the whole region during the last 10 years in eradicating the Bucket System and connecting households to water-borne sewerage systems. This does, however, place enormous pressure on the Municipality's scarce water resources. Communities require more education on how to manage their sewage disposal systems and to ensure that leaking cisterns or pipes are repaired as soon as possible and properly maintained. Sewer blockages are problematic in some areas, where newspaper and other foreign objects are disposed of in toilets.

Sewerage spills being experienced in some parts of the Municipal area are being addressed through a MIG project, that will include the upgrading of all 9 sewer pump stations.

Dr Beyers Naudé LM is not an industrialized area; industrial effluent or discharge is therefore minimal. Municipal By-laws control effluent discharge into Sewerage or Stormwater systems.

#### GRAAFF-REINET AND ENVIRONS

Most households are connected to the Municipality's water-borne system. Up until just a few years ago there were still 215 VIP pit latrines in Pienaarsig (Nieu-Bethesda); these were all replaced with flush toilets, connected to the Municipal sewer system. A small percentage of households in Nieu-Bethesda and Adendorp are not connected to the Municipal system and have their own septic tanks with French drains. There are occasions when the holding tanks reach full capacity and they are then emptied by the Municipality (with the dreaded Honey Sucker).

The WWTW in Nieu-Bethesda was extended and upgraded in recent years. There is no bulk or reticulation in Adendorp. All bucket toilets have been eradicated, but there is a small percentage of households that have to make use of communal flush toilets that were installed at informal settlements in Graaff-Reinet and Nieu-Bethesda. State of these facilities to be investigated.

All three WWTW (Graaff-Reinet, Aberdeen and Nieu-Bethesda) are well-managed and monitored. However, sewage spills in Graaff-Reinet have reached critical proportions.

#### WILLOWMORE AND ENVIRONS

All households in the formal areas in Willowmore, Steytlerville and Rietbron are connected to water-borne sewerage systems, either the Municipal network, or a septic / conservancy tank. Conservancy tanks are emptied by the Municipality on a regular basis. The more remote settlements have their own septic tanks with French drains, and a small percentage of households still make use of the VIP pit latrines. All bucket toilets have been eradicated.

The WWTW in Willowmore and Steytlerville are well-managed, but there is a concern with the one in Rietbron, which does not comply with DWS standards, for instance only one oxidation pond is in use and the others still have to be lined. There are other issues requiring attention too.

#### JANSENVILLE AND ENVIRONS

All households in Jansenville and Klipplaat are connected to the Municipality's water-borne sewerage system. The two WWTW are operating satisfactorily, but the upgrading of the one in Klipplaat, which was halted due to cashflow constraints, needs to be completed as a matter of urgency. The oxidation pond for the existing WWTW at Klipplaat is situated too close to a residential area. Waterford and Wolwefontein make use of septic tanks with French drains or VIP pit latrines.

There is a need for improved sanitation facilities in the more remote settlements. More economical water usage for water-borne systems needs to be encouraged.

# **GREEN DROP / WASTE WATER QUALITY MANAGEMENT**

Throughout the country, Water Services Authorities (WSA) are required to report monthly on their waste water treatment analysis and results. DWS has over the past few years rolled out waste water monitoring and management systems, which the Municipality has been utilizing as a tool for the provision of useful information on waste water quality, trends and other data. A number of Projects listed in the IDP are indicative of ongoing upgrades to the Municipality's WWTW.

Due to critical staff shortages, in the process of being addressed, the Municipality was not previously in a position to participate fully in the Green Drop programme dealing with Waste Water Quality Management. This has subsequently been addressed and there has been extensive upgrading to the Municipality's WWTW; chemical testing and analysis is conducted quarterly by the Nelson Mandela Metro Municipality.

Below are the Green Drop monitoring results, sourced from the DWS website, for the Municipality from October to December 2020. More recent data not yet available.

For more effective service delivery and management, Dr Beyers Naudé Local Municipality has adopted the Best Practice model that was used by former Camdeboo Municipality and will endeavour to maintain the same service standards.

### Sanitation : Solid Waste Management & Refuse Collection

According to the 2016 Community Survey, 98% of households in the Dr Beyers Naudé Municipal area had access to refuse removal or a minimum refuse disposal facility (own or communal). Within its urban areas, the Municipality maintains a service level of 100% and renders a removal service to all households and businesses in in its urban centres at least once a week.

**Only 4 of the 8 Landfill Sites in the Dr Beyers Naudé Municipal area are licensed.** Most are in a very poor state and are not being managed effectively. The Municipality has only one Transfer Station, situated just outside Graaff-Reinet. The Transfer Station had to be closed, due to defective design and management and is not functioning at present. High volumes of waste are being off-loaded at the various landfill sites, with very little recycling taking place. Some do not have cells and are not properly fenced, signposted, supervised or access controlled. The Municipality needs to pay serious and urgent attention the upgrading and management of these sites. Presently the Transfer Station and ALL of the region's Landfills are non-compliant.

- The Transfer Station at Graaff-Reinet and the Landfill Sites of Graaff-Reinet, Aberdeen, Jansenville, Klipplaat, Willowmore, Steytlerville and Rietbron are in critical need of upgrades and proper management. Additional Grant Funding is required for this.
- A new IWMP, as well as applicable by-laws, that are NEMA compliant, must still be developed for Dr Beyers Naudé Municipality. COGTA has been approached for assistance.
- At present, there is no effective weighing facility or accurate record keeping of waste volumes at the landfills. Figures, where provided below, are based on estimates.
- Waste management and recycling should start at source. All communities need to be educated about the sorting, storing (in separate containers) and disposal of their waste. Illegal dumping and littering are a serious problem, that should be addressed as a matter of urgency. The Municipality must ensure that optimal recycling takes place, in order to reduce the volume of waste going to the landfills. It is further recommended that composting be implemented.

#### **GRAAFF-REINET AND ENVIRONS**

The Graaff-Reinet, Aberdeen and Nieu-Bethesda landfills are licensed. The Transfer Station, for sorting solid waste going to the Graaff-Reinet landfill, had to be closed early in 2019, as a result of design and construction defects. The facility did not have adequate capacity to handle the huge volumes of waste that need to be sorted there on a daily basis. Large quantities of recyclables are still ending up at the landfill. Some funding has been earmarked for the expansion of the facility, but it will most likely require further upgrades in order to function properly.

The Graaff-Reinet landfill, which was taken into use not all that long ago, after the old one at Munnik's Pass was decommissioned and rehabilitated, has already reached full capacity and it has become impossible to manage it properly; the same conditions exist at Aberdeen's landfill. Assistance to address this critical situation is urgently required. The site at Nieu-Bethesda is currently operating in a satisfactory manner, with sufficient space still available, but the necessary machinery needs to be provided to cover the waste on a regular basis.

A lot of illegal dumping is taking place, outside the landfills, as well as along riverbeds, stormwater furrows and public open spaces within the urban areas. Littering is a critical problem in all areas.

Average waste quantities handled on a monthly basis are listed below for the following towns :

| GRAAFF-REINET | Refuse collected : | 874 tons | Recyclables : | tons | Refuse to landfill : | tons |
|---------------|--------------------|----------|---------------|------|----------------------|------|
| ABERDEEN      | Refuse collected : | 18 tons  | Recyclables : | tons | Refuse to landfill : | tons |
| NIEU-BETHESDA | Refuse collected : | 14 tons  | Recyclables : | tons | Refuse to landfill : | tons |

#### WILLOWMORE AND ENVIRONS

The Steytlerville Municipal Landfill Site is licensed, whilst those for Willowmore and Rietbron are not. None of them are being managed properly. There are no cells, and solid waste is being offloaded, with minimal or no sorting for recycling, and then burnt. Burning of solid waste releases toxins into the atmosphere and is hazardous to human and animal health. The landfills for Willowmore and Steytlerville are situated too close to residential areas. The Steytlerville landfill is scheduled for upgrading in 2021/22, which will include new cells and a recycling facility.

In order to curb the problem of illegal dumping and littering, the Municipality has provided small holding camps where people can dispose of their waste within the built-up areas, but the problem persists, despite the Municipality's efforts.

The small landfills at Miller and Vondeling are not managed by the Municipality and are illegal. Proper waste disposal facilities or arrangements for regular removal of solid waste at these remote settlements require urgent attention.

Average waste quantities handled on a monthly basis are listed below for the following towns :

| WILLOWMORE    | Refuse collected : | tons | Recyclables : | tons | Refuse to landfill : | tons |
|---------------|--------------------|------|---------------|------|----------------------|------|
| STEYTLERVILLE | Refuse collected : | tons | Recyclables : | tons | Refuse to landfill : | tons |
| RIETBRON      | Refuse collected : | tons | Recyclables : | tons | Refuse to landfill : | tons |

#### JANSENVILLE AND ENVIRONS

Both Municipal Landfill Sites (Jansenville and Klipplaat) are unlicensed and are not managed properly. Jansenville's landfill is situated adjacent to a cemetery and signs of illegal dumping are visible from the R75 right up to the site. The surrounding veld is covered with litter. There is a lot of illegal dumping and littering taking place within the built-up areas as well, and during a recent Environmental Scan conducted in the area, residents indicated that their refuse was not being collected regularly (about once a month, according to one source); as a result they were taking their waste to a spot next to the river and disposing of it there. Burning of waste within residential areas has also become a problem and is a health hazard.

The small landfills at Waterford and Wolwefontein are not managed by the Municipality and are illegal. Proper waste disposal facilities or arrangements for regular removal of solid waste at these remote settlements require urgent attention.

Average waste quantities handled on a monthly basis are listed below for the following towns :

| JANSENVILLE | Refuse collected : | tons | Recyclables : | tons | Refuse to landfill : | tons |
|-------------|--------------------|------|---------------|------|----------------------|------|
| KLIPPLAAT   | Refuse collected : | tons | Recyclables : | tons | Refuse to landfill : | tons |

During recent years, the Municipality has made much progress in terms of initiating anti-littering and illegal dumping awareness programmes; flyers were designed and distributed widely and there was engagement with the Graaff-Reinet Chamber of Commerce and the Camdeboo National Park (SANParks) for the purpose of developing strategies to encourage residents as well as visitors to the town to keep their environment clean and tidy. No Dumping & Littering signs were ordered and installed at problem spots, but law enforcement is inadequate or absent. During 2018/19, NGOs (such as The Graaff-Reinet Ratepayers Association), churches and local businesses initiated clean-up campaigns to assist the Municipality, for instance at Nqweba Dam.

Municipal By-laws control air pollution, illegal dumping, discharge of substances and littering.

#### BASIC SERVICE DELIVERY IN GENERAL

- The majority of residents in the Dr Beyers Naudé have access to a reliable, high level of services (such as good quality piped water into their dwellings); very few households are on a minimum level. Free Basic Services are available to the poor by way of an Indigent Subsidy.
- In some areas there is a need for improved maintenance or replacement of ageing infrastructure. O & M Plans are in place at all Water & Sanitation plants and pump-stations. General Infrastructure Repair & Maintenance Plan still to be developed. Annual budget allocations are unfortunately not sufficient to ensure proper and ongoing maintenance and systematic implementation of projects.
- Socio-economic, Quality of Life and Service Delivery Satisfaction Surveys have been conducted during the past few years.
- A Complaints & Fault Management system (Vodacom Link App) is in place. A dedicated Customer Care Unit was established by former Camdeboo Municipality; it has remained in place and in 2018 it was expanded with a Call Centre based in Graaff-Reinet, with Officials appointed in the Area / Satellite Offices to augment the service. A new Customer Care Policy has been developed and is due to be referred to Council for adoption soon.
- The Municipality's Public Participation programmes are to be stepped up and this will include more regular Customer Satisfaction Surveys – in line with the Back-to-Basics Diagnostic Assessment conducted on 14/05/2015.
- In recent years the Municipality has also made good progress in establishing partnerships with the public and private sector as a means of encouraging investment in social and economic infrastructure, such as WWTW (Bio-digester system), Social Housing, Urban Design, Dam Safety, Sport & Recreation facilities, etc.

Additional grant funding is urgently required to systematically upgrade / replace the Municipality's Bulk Sewerage reticulation, storage, waste water treatment and solid waste / refuse disposal systems. The respective Departments have experienced serious staffing and other resource shortages during the past few years. Staffing will be addressed during the Placement Process, whereafter any remaining critical vacancies will be advertised and filled.

# SPATIAL SYNOPSIS

Graaff-Reinet, the seat of Dr Beyers Naudé Local Municipality, is situated approximately 270km from Port Elizabeth (CBD), with the N9 national road being the major access route bisecting the study area. Dr Beyers Naudé LM is part of an area known as the "Karoo Heartland" which defines a scenic route through the Karoo.

The far northern and far southern regions of the Municipal area are characterised by mountainous terrain or high lying hinterland, with vast plains and some beautiful valleys inbetween. The rural areas have low densities and is characterised by farming activities. The urban nodes include:

- **GRAAFF-REINET** (HQ), including Umasizakhe, 7de Laan, Chris Hani Village, Eunice Kekana Village, Hillside, Cyprus Grove, Umnyama Park, Sunnyside, Spandauville, Bergendal, Reinet Park, Industria, Kroonvale, Mandela Park 1 & 2, Selfbou, Santaville, Ext. 455, Asherville, Geluksdal, Smartie Town, Riemvasmaak, Adendorp and Wolwas.
- **Willowmore**, including Lovemore, Humesville, Hillview, Die Erwe, Blinkdakkies and Mandela Square
- Jansenville, including Mauritius, Phumlani, 7de Laan, Die Kloof, Borges, Die Draai, Holland and Bricksfield
- Aberdeen, including Lotusville and Thembalesizwe
- Steytlerville, including Volstruis Valley and Golden Valley
- Klipplaat, including Scheepersstraat, Prinsvale, Dan Sandi, Dube, Greenpoint, Zakhele.
- Rietbron, including Vaalblok, Manenza Square, Bron Marais Park and New Extension
- Nieu-Bethesda, including Pienaarsig

There are a number of small and remote settlements, such as Waterford, Wolwefontein, Vondeling, Fullarton, Miller, Mount Stewart and those situated in the Baviaanskloof – these are in the rural areas, and do not have access to Municipal services.

## SPATIAL DEVELOPMENT FRAMEWORK (SDF)

After experiencing delays, mainly due to lack of funding, the development of an SDF for BNLM commenced in 2020. Essentially the Municipality's SDF should be anchored in the criteria used to describe "development potential" in the NSDP :

- Natural resource potential : agricultural potential, environmental sensitivity and the availability of water,
- > Human resource potential : levels of skills and human density,
- Infrastructure resource potential : existing and proposed road and rail infrastructure and the main electricity grid,
- > Human need : spread of poverty and the size of the poverty gap,
- > Existing economic activity.

The SDF forms an integral part of the Municipality's strategic and forward planning; basically "mapping" the development trajectory of the IDP. Tables on the next page summarize key considerations.

- → The Spatial Planning and Land Use Management Act 16/2013 is of great significance to the Municipality's Spatial and Land Use Planning. Some Officials did attend sessions hosted by SALGA and the Dept of Rural Development and the implementation of SPLUMA was phased in, along with the development of SPLUMA By-laws, which were promulgated in March 2018. A Municipal Planning Tribunal has been established and gazetted, with the Director of Infrastructure Services assigned as Authorised Officer. The Zoning Scheme Regulations and By-laws are available on the Municipal website.
- → The Town & Spatial Planning Section of Dr Beyers Naudé Municipality issued notice in February 2020, of its intention to develop an SDF. A basic spatial map of the region was developed as a forerunner to the process, which has now been initiated, and is included on the next page. The consolidation and updating of the Municipality's Land Use Scheme will follow the SDF process, which was unfortunately delayed as a result of the COVID-19 Lockdown regulations. However, the Draft SDF is now available for inspection and comment.
- → A qualified Town Planner is in the employ of the Municipality. Provision has been made on the new Organogram for the expansion of the Unit and a dedicated GIS Official. Early in 2019, MISA submitted a report, recommending substantial restructuring of the Department.
- → Ward Maps, identifying the localities of Ward Development Priorities, which include infrastructure needs (for both social and economic development) have been developed and are included in the CBP Report attached to the IDP as Annexure (E). These were taken into account, during the development of the Municipality's SDF.

# **GROWTH & DEVELOPMENT**

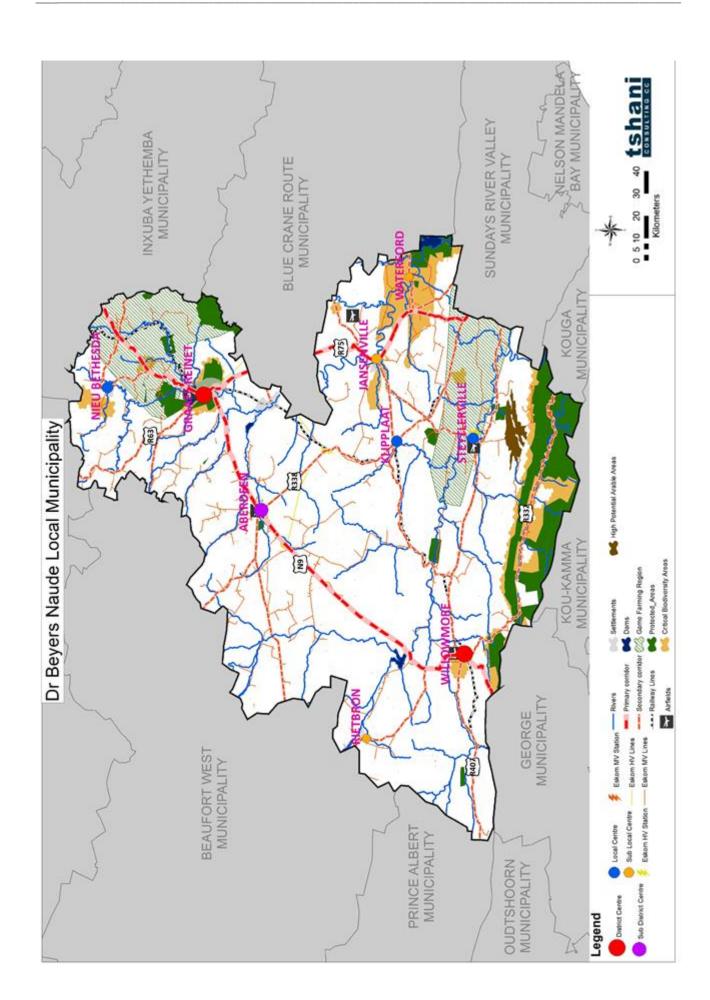

Graaff-Reinet and Willowmore are known to be the two largest growth centres in the Dr Beyers Naudé LM. They are both situated on the N9, which is a major transportation route and also the one used most by tourists visiting the region, either approaching from the north on the N1 via Colesberg and Middelburg or from Cradock on the N10; or from the south – George and other parts of the Garden Route on the N2. Graaff-Reinet has the added advantage of the R75 as another major transportation route to Port Elizabeth, and the R61 to Beaufort West, where it links up with the N1 to Cape Town. There has been an indication that the railway line running from Middelburg through Graaff-Reinet to Port Elizabeth will soon be in operation again and this will be another transportation benefit for the area.

A more recent indication in the Draft PSDF is that Graaff-Reinet was identified as one of the 61 towns countrywide that will receive more focussed attention and investment for improved roads infrastructure, thereby supporting LED priorities and the principles of IUDF – by giving effect to coherent development and stimulating socio-economic growth.

The other towns have limited growth potential, even though they are situated on or close to major routes. This is mentioned in relation to spatial planning and human settlement development, as no growth equates a dwindling economy and resultant lack of sustainable employment opportunities.

Basic services provision and upgrading of infrastructure should be the key focus areas in the smaller and more remote non-growth nodes or settlements.

There is a shortage of land in some areas for residential and agricultural development, and assistance should be sought from the Department of Rural Development & Land Reform to address this issue. Another aspect that requires investigation is the establishment of a Rural Economic Development Zone in the new Municipal area, with focus on agriculture and tourism.

# **HUMAN SETTLEMENT PLANNING : HOUSING**

"The need for shelter is the most basic need, and a fundamental right."

The Department of Human Settlements needs to assist Dr Beyers Naudé LM in developing a new Human Settlement Sector Plan (HSSP). We do not have the capacity to do it in-house. Critical aspects that were not previously addressed, must be incorporated in the Plan :

- Social Cohesion in Human Settlement Planning
- Informal Settlement Policy
- Land Invasion Strategy
- Migration Plan

#### Some of the Housing Delivery challenges facing Dr Beyers Naudé Municipality are :

- The tremendous delay in completing geotechnical investigations, surveys and EIAs, processing of transfers and issuing of Title Deeds,
- Delays in the release of funds for top structure and bulk services,
- Subdivisions and illegal encroachments that need to be rectified,
- There is no dedicated Housing Unit in the Municipality,
- There is a growing backlog that cannot be met or addressed as a result of the above,
- No provision in design for fencing, internal electrical points, gutters and rainwater tanks,
- Misuse of RDP houses e.g. operating as spazas or shebeens; some are not even occupied by the beneficiaries and are sold out of hand, without due process followed.

The table below reflects Housing Delivery programmes implemented and planned for the periods indicated :

| AREA & WARD   |           | RDP UNITS<br>DELIVERED<br>POST-1994 | BACKLOG<br>APPLIED<br>FOR PRE-<br>2016 | RDP UNITS<br>APPROVED<br>PRE-2016 | BUILT POST-<br>2016 | RDP UNITS<br>STILL TO BE<br>BUILT | NO. OF<br>FALLEN<br>HOUSES TO<br>BE REBUILT |

Informal Settlements with temporary dwelling structures exist in the following areas :

Qualifying families will eventually be moved to new RDP units, once completed. There are no blocked projects. An Assessment of 900 houses identified under the Rectification Programme was conducted a few years ago; some areas with fallen houses still require urgent attention. There are no outstanding Land Claims that might negatively affect socio-economic development in the area and illegal Land Invasions are controlled by Municipal By-laws and the Prevention of Illegal Squatting Act, Act No. 52 of 1951.

The SDFs of the former Municipalities determined that large areas of land were required to provide for all the housing needs in the region. A new SDF is being developed for Dr Beyers Naudé LM. A Land Audit was conducted by former Camdeboo Municipality in 2013 for the purpose of updating its Land Asset Register, but another one needs to be conducted for the whole region that will ensure that records on the locality and ownership of vacant land suitable for human settlement planning and land restitution are kept current and are available to inform the SDF and other developmental plans. The new HSSP must align itself with this updated situation.

| YEAR | GRT   | ABD   | NB  | WM    | RB | sv  | JV  | KP  | TOTAL<br>RDP UNITS |
|------|-------|-------|-----|-------|----|-----|-----|-----|--------------------|

| 2021 | 6,780 | 1,551 | 376 | 1,495 | -  | 551 | 847 | 178 | 11,778             |

The Municipality's RDP Housing Waiting List has shown the following growth in applications :

**<u>NB</u>** The National Housing Needs Register is kept current by the Department of Human Settlements.

The Municipality makes provision annually for bulk services infrastructure requirements for new housing projects, but the implementation of these projects is subject to the release of funding by the Department of Human Settlements for the activation of specific Housing Delivery Programmes. The Department of Energy Affairs will only release its funds (for electrification of new Housing Developments) once 80% of the project's housing units have been built. Generally the land identified in the SDF as suitable for Housing Development is unserviced.

Additional funding and stepped-up delivery by the Department of Human Settlements is urgently required to address Dr Beyers Naudé's low-cost housing backlogs and rectifications.

- The Municipality at present does not have the institutional capacity for Housing Delivery. It is also not a Local Government function.
- Consideration should be paid to the inclusion of internal finishing, such as the provision of additional electrical points, and external finishing, such as the provision of solar geysers, boundary fences, rain-water tanks and gutters – as part of the RDP Unit's design.
- Policy amendment is also required in terms of the point at which funds are released for the electrification of new RDP houses.

During 2008, a proposal to invest in Social Housing (rental schemes aimed at low to middle income sector) was made by Winterswijk Municipality in Holland as part of a Twinning Agreement reached with former Camdeboo LM. This type of scheme was not very successful in the past, but Winterswijk has submitted detailed plans of the various structures that should be in place to effectively administer and manage Social Housing Complexes. The design plan incorporates a total of 850 housing units, consisting of :

- 300 CRU rental units (200 for Phase 1)
- 200 Middle income rental units
- 175 Middle income rental & serviced units
- 175 Middle/higher income rental & serviced units

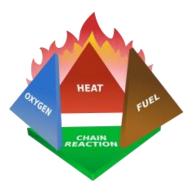

The Urban Vision and Development Plan for the **Umnyama Park** scheme, aims to integrate and empower Communities through a well-designed, sustainable and socially cohesive approach. The EIA and other processes are underway.

A further proposal made during 2009 by Elemental Africa embraces the concept of Sustainable Communities, which will incorporate a housing development using modern technology for alternative energy and optimal utilization of available natural resources and its recycling. It is envisaged that a development of this nature will be implemented in terms of a partnership agreement and managed by a Housing Co-operative. Elemental Africa has already embarked on the first phase of its proposal; the construction of a bio-digester system. Investigations into suitable tracts of land for the implementation of the rest of the scheme are in progress.

#### **DISASTER MANAGEMENT & FIRE SERVICES**

The Municipality's Protection Services Department is responsible for Disaster Management and the rendering of Firefighting Services. The Department is in the process of expanding the Firefighting Service and the necessary provisions have been made in the Municipality's new Staff Establishment; including that of Chief Fire Officer and Disaster Management Officer.

The building housing the Fire-fighting Service is not suitable to accommodate the required staff, equipment and vehicles. The Municipality's IDP has reflected on the need for a building for some time and plans are in place for the construction of one in Graaff-Reinet and in other towns within the Municipal area. Sarah Baartman DM has been approached for assistance in this regard. In the meantime, COGTA has committed to assist all amalgamated LMs by conducting a Fire Safety & Prevention Capacity Assessment in March 2018, and SBDM did appoint a Service Provider to conduct the necessary research and assessments, which will result in a report that will provide an indication of how the affected authorities will implement Section 84 (1)(j) of the Municipal Structures Act 117/1998 in dealing with Fire Services.

New Disaster Management Plans are being developed for the amalgamated Municipalities, through the assistance of SBDM, who appointed a Service Provider in 2016. Part of their brief was to conduct a comprehensive assessment, with broad-based Stakeholder involvement, in all of the towns. The Analysis Phase included a Hazard Identification Analysis, a Risk Profiling Assessment and a Risk Prioritization for the Municipality, with high risk developments and vulnerable areas being a focal point in the spatial analysis. The report, still to be adopted by SBDM, will serve to inform the Disaster Management Plan of Dr Beyers Naudé LM and the Plan must also address the following critical areas, classified as "Potential Disaster Events" :

- Drought
- Fire
- Flood
- Storms
- Hazmat (hazardous materials)
- Emergency SCM procurement measures are in place for Disaster expenditure;
- Sarah Baartman DM has appointed a Service Provider to develop Disaster Management Plans for the amalgamated Municipalities.

Emergency procurement measures, as well as other specified requirements, are to be incorporated in the new Disaster Management Plan. The development of Disaster Management By-laws has been included in the agreement between SBDM and their Service Provider.

SBDM appointed a Disaster Management Satellite Officer a few years ago, who is based in Jansenville and is working closely with the Fire Services based in the various towns of BNLM, in developing and implementing strategies and programmes that will address Community risks and vulnerabilities, for which assessments have already been conducted in partnership with SBDM & Working-on-Fire teams.

A new SDF (dealt with elsewhere in this chapter) is being developed for BNLM and it will have to be informed by, inter alia, the Disaster Vulnerability and Risk Assessment Report, which is still to be adopted and released by SBDM.

In terms of National guidelines (refer Chapter 5 of the Disaster Management Act 57 of 2002). Disaster Management should be based on the following nine important principles :

- 0 Disaster management is the responsibility of all spheres of government.
- 0 Disaster management should use resources that exist for a day-to-day purpose.
- ₿ Organisations should function as an extension of their core business.
- 4 Individuals are responsible for their own safety.
- 6 Disaster management planning should focus on large-scale events.
- 6 Disaster management planning should recognise the difference between incidents and disasters.
- 0 Disaster management operational arrangements are additional to and do not replace incident management and operational arrangements.
- 8 Disaster management planning must take account of the type of physical environment and the structure of the population.
- 0 Disaster management arrangements must recognise the involvement and potential role of non-government agencies.

Provision is made in the Municipality's annual Budget for tariff adjustments, and improving operational and infrastructural systems for the more effective rendering of Disaster Management & Fire-fighting Services. Provision for maintenance and repairs of this infrastructure is catered for in the Operating Budget.

This Municipality is a signatory to the District Cross-border Agreement and a BNLM Fire Protection Association has been established with farmers for the implementation of the National Veld and Forest Fire Act. The NRTA legislation makes provision for long haulers to submit their monthly tables for reporting on transportation of hazmat in our area and the Municipality's Contingency Plans include mechanisms to deal with flooding.

Section 3.3.10 of this chapter deals with Community Safety and Security.

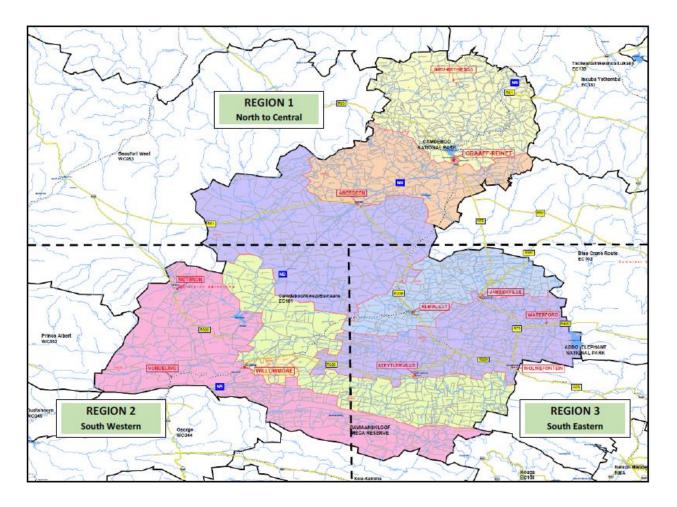

# ENVIRONMENTAL ANALYSIS

Information for this section was obtained from the previous SDFs of Camdeboo, Ikwezi and Baviaans, as well as the State of the Environment Report for the Sarah Baartman District, compiled by The Centre of Environmental Management, University of the Free State.

The Environmental Analysis will touch on the climate, topography, drainage, vegetation and geology of the Dr Beyers Naudé Municipal Local Municipality. Due to the vast spatial spread of the Municipal area, the analysis will be dealt with in accordance with three regions, as displayed on the map below.

### **REGION 1**

Graaff-Reinet as the main centre, with Aberdeen to the south and Nieu-Bethesda to the north.

#### **REGION 2**

Willowmore as the main centre, with Rietbron to the north, Vondeling to the west and Baviaanskloof to the south.

#### **REGION 3**

Jansenville as the main centre, with Klipplaat to the west, Steytlerville and lower section of Baviaanskloof further south, Waterford and Wolwefontein to the east.

### Climate

#### Region 1

Fairly harsh conditions prevail in this area, which is generally characterised by hot summers and very cold winters. In winter, cold fronts sweeping in from the south-west result in snow on the high-lying ground. In summer, very high temperatures sometimes exceeding 40°C occur when berg wind conditions prevail, usually during January and February. Summer temperatures vary from an average maximum of about 32°C to an average minimum of about 16°C, whilst winter maximums and minimums are about 20°C and 6°C respectively. The prevailing wind direction is from west and north-west, with an easterly and south-easterly component during summer months.

Statistics suggest that rainfall varies between 300mm and 400mm per annum, although dryer spells have produced less than 200mm per annum.

#### Region 2

The highest average maximum summer temperatures are between 32 and 33 °C and are found in the area surrounding Rietbron. Cooler summer temperatures are found on the higher lying areas. The lowest average winter temperatures of below 0°C are found to the south of Rietbron, while average temperatures between 2, 8 and 4 °C are found in the central areas through to Willowmore and Vondeling. The higher lying areas have more moderate minimum temperatures.

Approximately 56% of the rain falls in summer (October to March). There is a drop in rainfall during mid-summer (January). The average annual rainfall in the western part is between 77 and 250mm per year, while the eastern part has an average of between 260 and 500mm per year. Small patches on the higher lying mountains of the Baviaanskloof have higher averages of between 510mm and 750mm per year

#### Region 3

The area falls above the Winterberg Escarpment and the Karoo that is characterised by hot summers and cold winters. The average maximum daily temperatures range from 20°C in June to 32°C in January with an average of 18°C. A maximum temperature of 47°C has been recorded to date. The average daily minimum temperatures range from 0°C in May, June and July to 11°C in January. Several sub-zero temperatures are likely between middle May and the beginning of September. A minimum temperature of -4.5°C has been recorded to date. Winter cold is mainly the result of cold nights when radiation cooling of the dry air results in widespread frost.

Maximum rainfall is experienced in summer. The annual rainfall ranges between 163mm to 522mm with a 29-year average of 280mm per annum. Rain falls mainly in the summer months between October and April and monthly averages range from 9mm in June/July to 42mm in March.

#### Climate Change : the concept explained by WeatherSA

The climate of the world varies from one decade to another, and a changing climate is natural and expected. However, there is a concern that the human industrial and development activities of the past two centuries have caused changes over and above natural variation...

#### What is climate change?

Climate change is the natural cycle through which the earth and its atmosphere are going to accommodate the change in the amount of energy received from the sun. The climate goes through warm and cold periods, taking hundreds of years to complete one cycle.

Changes in temperature also influence the rainfall, but the biosphere is able to adapt to a changing climate if these changes take place over centuries. Unfortunately, human intervention is currently causing the climate to change too fast. (Climate models predict that the mean air temperature over South Africa will increase by an estimated 2°C over the next century.) Plants and animals may not be able to adapt as quickly to this rapid climate change as humans can, and therefore the whole ecosystem is in danger.

#### What causes climate change?

The global climate system is driven by energy from the sun. Several gases in the atmosphere act to trap the energy from the sun, thus warming the earth. These gases are called greenhouse gases and the process is the greenhouse effect. Without this there would be no life on earth. Human activities over the last 200 years, particularly the burning of fossil fuels (oil, coal, natural gas) and the clearing of forests, have increased the concentration of greenhouse gases in the atmosphere. This is likely to lead to more solar radiation being trapped, which in turn will lead to the earth's surface warming up - called the enhanced greenhouse effect.

#### How does a changing climate influence South Africa?

Higher temperatures will influence the rainfall, but it is still uncertain how the annual rainfall will change. It could increase in some parts of the country, and decrease in other parts. It can impact on :

 $\odot$ 

Biodiversity; Water resources; Human and animal health; Maize & wheat; Grazing livestock; & Forestry; The coastal zone; Fisheries. &

#### What can we do to slow the process down?

The enhanced greenhouse effect can be slowed down by following two guidelines: (1) Increase sinks and (2) decrease sources of greenhouse gases. A sink is a process which removes greenhouse gases from the atmosphere. For example: growing a tree where one did not previously exist provides a sink for carbon dioxide, because the tree extracts carbon dioxide for photosynthesis. A source is a place or activity from which greenhouse gases are emitted. This can be a process such as coal burning or a location such as cultivated fields.

**The Kyoto Protocol** is a legal instrument that is separate from, but related to the Climate Change Convention. Countries ratifying the Protocol have mainly the following obligations:

- (1) Developed countries are obliged to ensure that their greenhouse gas emissions do not exceed the amounts assigned to them.
- (2) Climate change policies must be implemented.
- (3) Energy efficiency must be enhanced.
- (4) Emissions in the waste and transport sectors must be limited and/or reduced.
- (5) Sinks for greenhouse gases must be protected.
- (6) Market instruments that are counter-productive to the aims of the Protocol should be phased out.
- (7) Sustainable forms of agriculture and relevant research must be promoted. All these activities must be undertaken in such a way that potentially adverse effects on developing countries are minimised.

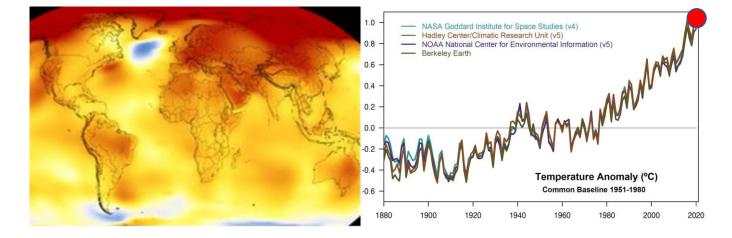

The future of climate change issues in South Africa are at the moment mainly in the Government's hands.

#### Dr. Beyers Naudé MUNICIPALITY | MUNISIPALITEIT | UMASIPALA

## **Climate Change in the Global context**

For the last 50 years or so, rumblings about Global Warming have become louder and more urgent; as a result the past decade has seen a more concerted effort in researching the effects of Global Warming and the signs that have been associated with an increase in the earth's temperature and melting of the ice caps. Some researchers maintain that Global Warming has been with us since the end of the last Ice Age, some 18,000 – 21,000 years ago. The increase in sea levels apparently peaked about 6,000 years ago, but have continued their gradual rise, albeit at a much slower pace; research puts the sea-level rise at about 120 metres since the end of the Ice Age. Atolls and small islands are already beginning to disappear, and according to reports, oceans are becoming warmer, killing off some sensitive species of marine life.

While each year shows up- and downward trends, the overall trend has been a gradual upward one, as can be seen from the graphs above, depicting temperature anomalies from 1880 to 2020. Notwithstanting the data released by NASA, indicating an upward rise of 0.8°C over a period of almost 140 years, some scientists are of the opinion that there will be a further rise of between 1.1 and 6.4°C in this century, depending on whether we are able to curb the increase in greenhouse gases, or not. As can be seen, this prediction has turned into reality, with the highest global temperature recorded in decades in 2016, and with the second highest in 2020.

Because scientific research has found that different parts of the world are experiencing different impacts ascribed to Global Warming, and not necessarily warmer conditions or droughts, the term has more appropriately been adjusted to that of Climate Change. Another important feature in the bigger scheme of things, often overlooked, is the natural cycles and occurrences in our weather patterns, such as El Niño (the hot one) and La Niña (the cool one), and the impacts they have on weather conditions over months or even years throughout the world!

Extreme temperatures recorded in the Dr Beyers Naudé Municipal area over recent years have been up to 48°C in mid-summer and as low as -7°C in mid-winter, although pockets within the regions have been subjected to even higher or lower temperatures, according to individual reports. Heatwaves appear to be lasting longer, stretching over several days and even weeks, with windier conditions, causing accellerated evaporation of surface water.

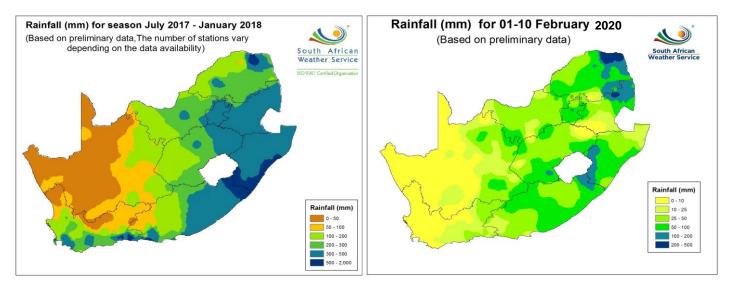

## Climate Change and the Karoo

So how precisely is Climate Change affecting the Karoo? Have there really been drastic weather changes, a shift in seasons and increased or decreased rainfall, to the extent that a clear trend has been established? Graaff-Reinet resident Marina Cloete has religiously been recording Graaff-Reinet's rainfall figures over several decades. She reported an average rainfall of 325mm per calendar year from 1979 – 2010 and then a sudden upward swing with 724mm recorded for 2011, 655mm for 2012 and then dropping to 474mm for 2013.

Dr. Beyers Naudé MUNICIPALITY | MUNISIPALITEIT | UMASIPALA

From 2014 the central to western parts of South Africa started experiencing much lower annual rainfalls and this eventually led to a prolonged drought, which had devastating effects in especially the more arid areas of the country; a State of Disaster was declared as a result. The Dr Beyers Naudé Municipal area was severely affected, with many farmers having to rely on assistance from elsewhere to keep their game and livestock alive; there was no water and no food. Severe losses in crops, livestock and game were reported in the region. Nqweba Dam, that provides water to the greater Graaff-Reinet for domestic consumption, dried up completely during 2019 and stringent water restrictions were implemented. In January 2020, the rains came and much of the veld, crops and pastures have been restored with lush regrowth, but much more rain is needed to replenish large dams and acquifers.

The former Camdeboo Municipality included a Drought Framework Plan and Strategy in its WC/WDM Strategy and put measures in place, which BNLM has continued with, to mitigate the potential negative impact of Climate Change :

- → All boreholes situated on the Municipality's well field just north of Graaff-Reinet are being rehabilitated as part of the Emergency Water Supply Programme and the storage capacity of Municipal water reservoirs is being increased;
- → An agreement was entered into with DWS to take over the Nqweba Dam for a fixed term, in order to rehabilitate the dam wall and upgrade all equipment situated there;
- → Water Awareness campaigns were launched in the region and are ongoing;
- → Alien vegetation is in the process of being eradicated (SANParks/BSP/NRM/EPWP partners).
- $\rightarrow$  In 2019/20, Gift of the Givers funded the drilling & equipping of several boreholes in the area.

Early in 2019, the Department of Water Services & Sanitation made an allocation of R30,020,000 available for drought relief in the Dr Beyers Naudé Municipal area. The funds are being utilized towards developing or upgrading water provision, reticulation and storage systems. In addition, a high level and cross-boundary Water Summit was held in Graaff-Reinet on 10 December 2019, for the purpose of developing strategies that will assist in mitigating the impact of drought and to more effectively harvest, store and use water. DRDAR is busy installing early warning weather stations in the region, that will collect data on climatic conditions for response planning & action.

## Topography and drainage

The topography in the area comprises of three landscapes, i.e. mountainous terrain, valleys and flat plains. High lying areas are found towards the north where Nieu-Bethesda is situated. One of the unique topographical features of the area is the Valley of Desolation close to Graaff-Reinet and Baviaanskloof to the south of Willowmore.

The drainage system of Dr Beyers Naudé Municipality is through the Sunday's River and tributaries, as well as the Pienaar's and Gats Rivers, which drain into the Nqweba Dam.

During February 2011 heavy rainfall to the north of Graaff-Reinet caused severe flooding in areas such as Nieu-Bethesda, where the village and surrounding farms were cut off and farm dams simply disintegrated in the deluge of water. Graaff-Reinet's Nqweba dam overflowed for the 3<sup>rd</sup> time in about 37 years, whereas low water levels (> 50%) had been recorded for the preceding months, forcing the Municipality to consider implementing water restrictions.

Nqweba Dam overflowing on 11/02/2011

## Vegetation and Biodiversity

Vegetation throughout the study area is typical of the sub-tropical Thicket Biome, which is characteristic of the Eastern Cape. Large portions of the area are severely impacted and replaced by intensive agricultural farming. The following vegetation classifications can be found in the area:

◆ Central Lower Nama Karoo ◆ Eastern Mixed Nama Karoo ◆ Spekboom
 Succulent Thicket ◆ South-Eastern Mountain Grassland ◆ Valley Thicket ◆

Habitat change is regarded as the key driver of biodiversity change in the Eastern Cape. Habitat change relates to activities such as cultivation, grazing, urban developments, deforestation, mining and alien plant invasions. The percentage habitat that has been changed is very little inland. According to the State of the Environment Report (p. 40), Dr Beyers Naudé is considered to have a 5 - 10% transformed land or percentage of habitat change in the Municipal area.

The Report recommended that the District Municipality undertake a SEA (Strategic Environmental Assessment) to enable Local Municipalities to consider cumulative impacts such as added pressure on existing water resources, land degradation etc.; also, that an Environmental Management Strategy should be developed for the SBDM.

The following extracts were made from Professors Doreen Atkinson & Lochner Marais' "The Arid Areas Programme", Volume 2 : Provincial Development Policies and Plans :

"A rather gloomy conclusion reached by the Sarah Baartman State of the Environment Report is that the local municipalities in Sarah Baartman show less commitment to environmental issues than does the provincial government. Where municipalities do show an interest in environmental management, it is mainly concerned with issues which are directly related to human needs (water, sanitation, waste removal)." ~ (p. 83)

"Soil degradation in arid areas is referred to as "desertification". Arid and semi-arid areas in the Sarah Baartman District are indeed threatened with desertification. Soil degradation is most severe in the western parts of the district (Graaff-Reinet, Aberdeen & Jansenville areas) with the rest being moderate to insignificant." ~ (p. 37)

### Geology

Geology is characterised by sparse distributions of dolerite rock throughout, with the majority of the study area covered in mudstone. A small portion is characterised by sedimentary rock. The study area is under alluvium with mudstone and sandstone of Middleton Formation at shallow to moderate depth. The sedimentary rocks of Middleton formation dip gently towards the north in the Graaff-Reinet area. The Middleton Formation, which forms part of the Adelaide Subgroup, Beaufort Group of the Karoo Super group, generally comprises a greenish or bluish-grey mudstone with sub-ordinate grey sandstone. This formation is up to 2,000 meters thick in parts of the Eastern Cape Province and thins northwards.

Middleton formation bedrock generally occurs at very shallow depths throughout most of the Dr Beyers Naudé Municipal area. The lower lying areas are often characterised by colluvial cover material. Fluvial sediments associated with Sundays River and its tributaries occur in broad zone either side of the river. This alluvial material is usually highly variable, both laterally and vertically. The nature of the alluvium deposited by the river depends on the type of parent material.

# **ENVIRONMENTAL IMPACTS, MANAGEMENT & CONSERVATION**

The Municipality has received criticism for not paying enough attention to its environment. Concerns have been raised that inappropriate development is spoiling the area's rich cultural heritage and that our natural resources are being over-exploited; inadequate consideration is being given to environmental impacts... Historical buildings have shown signs of deterioration and are taking strain due to lack of maintenance and upkeep, or undesirable elements impacting on their structure and appearance ~ this needs to be investigated and attended to urgently. The uncurbed spread of alien and invasive vegetation has reached crisis proportions in the region and, although in the process of being addressed in Camdeboo National Park, surrounding property owners, such as the Municipality, also need to come on board.

The Community Services Directorate of BNLM will be making provision for an Environmental Management Officer within its Organizational Structure for 2021/22, although it is not a Municipal function according to Schedule 4 & 5 of the SA Constitution, however, Local Government has a duty to monitor the use of its natural resources as well as the impact of development and human activity on its environment; mechanisms to control, regulate and protect should be in place. During the course of 2007, at the request of concerned Interest Groups, an Environmental Committee was established in Graaff-Reinet; the Municipality was to be represented by an Official and a Councillor, however, this structure failed to become fully functional. Furthermore, documentation on the Eastern Cape Biodiversity Conservation Plan and the Subtropical Thicket Ecosystem Programme (STEP) serves to further inform the Municipality about its responsibility.

The Municipality needs to put more effort into Environmental Management, Protection and Conservation. A step in the right direction was the creation of a post for a Facilities & Commonage Management Officer within the Property and Land Use Management Section, and the inclusion of a short presentation on environmental matters during the IDP's Public Participation meetings and Mayoral Outreaches. A Commonage Management Policy is in place.

٢

A submission made a few years ago by Mr Peter Burdett of the then Department of Economic Affairs, Environment and Tourism (Graaff-Reinet), proposed the following :

**OBJECTIVE**  $\rightarrow$  To provide the community with a sustainable environment ...

#### **IDENTIFIED STRATEGIES / PROJECTS**

- Establish legal waste disposal sites where a policy of waste differentiation is applied,
- Promote and pursue the recycling of waste as far as is practical or responsible. Explore the opportunities for job creation,
- Develop a plan for open/green space in Graaff-Reinet and establish these areas accordingly,
- Develop the recreation potential of the Nqweba Dam as well as within residential areas,
- Limit the environmental impact of residential development by establishing a contour limit [urban edge] for development,
- Integrate the management of the town with the Karoo Nature Reserve [now Camdeboo National Park] in order to build maximum tourist potential,
- Ensure a dust free environment for citizens by the responsible management of grazing commonage around the town,
- Promote awareness of the community of the monkey problem in town and strategies to limit the problem,
- Promote the use of the Camdeboo NP Environmental Education Centre by all local schools and develop a means of overcoming logistical problems in this regard,
- Ensure the control of invasive alien plants on all commonage land.

- Submissions received during past Community-Based Planning workshops and meetings, underpin Environmental concerns :
  - Trees and birds ought to be protected.
  - Nieu-Bethesda's natural position, rural aspect and plantings over the years add to its beauty and charm; environmental issues of tree planting and woodlots need to be urgently undertaken.
  - The Environmental portfolio must include all issues relating to both the built and the natural environments; Environmental and economic issues are tightly interlinked; Our economy ~ both in the short- and long-term ~ depends on how we manage our unique set of environmental assets.
- In May 2012 there was a submission by Mr Peter Whitlock, of Moffat Whitlock Architects, based in Graaff-Reinet :

#### <u>Grade 1 Conservation Landscape Status in terms of the National Heritage Resources Act,</u> <u>No. 25 of 1999</u>

The idea for the proclamation of Grade 1 (Nationally Significant) Conservation Landscape status was borne from the Heritage Society's attempts to obtain provisional protection in terms of the Act for Umasizakhe and Church Street as both environments were under imminent threat.

The possibility of Conservation Landscape status was mooted by officials at the proclamations unit of SAHRA (SA Heritage Resources Agency) on the basis that Graaff-Reinet quite clearly had a wealth of Natural Heritage, Living Heritage, Cultural Heritage and Architectural Heritage and was in their view worthy of Grade 1 status. The process would entail the submission of an application with supporting documents (dossier) for the consideration of the SAHRA Council. A positive decision by the Council would lead to a proclamation being passed in the Government Gazette which would confer Grade 1 Conservation Landscape status on greater Graaff-Reinet for a period of two years. The two-year period would allow time for an extensive consultation process with the broader community and for undertaking an inventory of Heritage Resources and putting in place a comprehensive conservation management plan and structures (incl. a local permitting authority).

A sub-committee / steering committee was formed from members of the Heritage Society and other interested community organizations and a dossier was submitted to SAHRA. SAHRA Council passed a resolution in favour of the application in March 2011. A draft gazette notice was compiled by SAHRA in early April 2011 and forwarded to the Heritage Society for consideration and correction. A duly corrected notice was returned to SAHRA shortly thereafter.

The publication of the notice subsequently became an issue of contention between SAHRA and Eastern Cape PHRA (Provincial Heritage Resources Agency) and nothing further has transpired with the process notwithstanding repeated appeals for action from the Heritage Society the most recent of which was forwarded to PHRA and SAHRA on 13 April 2012. Their response is awaited.

[PS : Above initiative was introduced to the former Camdeboo Municipal Council during 2009, and supported in principle at a Council Meeting on 08/09/2009, subject to the proposal being taken to the communities through a Public Participation process.]

The region's landscapes are very special and need to be protected.

Graaff-Reinet, being the 4<sup>th</sup> oldest town in South Africa, is a very popular tourist destination because of its well-preserved historical buildings and museums. The heritage core of the town is a big attraction and draws visitors from far and wide. In general, these buildings are well-maintained and create very attractive streetscapes. Many have been declared National Monuments / Heritage Sites and proudly display their plaques.

In the early 1990s both Aberdeen and Nieu-Bethesda had Conservation Impact Studies conducted. Buildings were graded, in terms of age, appearance and conservation-worthiness. Sadly, however, much insensitive development has taken place in these towns over the years and there is a real threat that their unique character will be destroyed, should town-planning and land-use not be applied and regulated, with due sensitivity and consideration of these fragile environments, especially Nieu-Bethesda that draws about 15,000 visitors – many of them from overseas – each year, where the main attraction is undoubtedly the Owl House, but also the unique setting and quaint character of the town.

During their visit to Nieu-Bethesda in December 2015, two Officials from SAHRA expressed their concern at what was happening in the village and proposed that urgent attention be paid to reviving an earlier application to have Nieu-Bethesda declared a Protected Heritage Site, with the Owl House pivotal to such a consideration, as well as the Gats River with its rich and very ancient fossil deposits. In a more recent communiqué, the Manager of the Built Environment Unit at SAHRA stated as follows :

"(We) have been discussing the way forward regarding the Owl House and the protection of Nieu-Bethesda as a whole. At this stage we recommend that we use the provision of a Protected Area to deal with the village. We will discuss and see if we can find a way forward to place it under national protection."

In the meantime, a nomination to have the Owl House and its Camel Yard declared a Grade 1 National Heritage Site received favourable consideration by SAHRA, who issued a Section 27 Notice early in 2017 and promulgated the declaration in Government Gazette No. 41141 of 29 September 2017.

Herewith some relevant extracts from Prof Albrecht Heroldt's Conservation Impact Study of Nieu-Bethesda, dated September 1991 :

Nieu Bethesda is a town meritous of a proper conservation strategy. With plus /minus 80% of the existing building stock being of historical and architectural merit, the harmonius character is worth preserving.

The large number of open erven available for infill buildings alone is cause for guidelines regarding appearance, size, material, form etc. for any future development. Although the tourist potential of Nieu Bethesda depends to a large degree on the fame of the Owl House and its contents, the town does make an important contribution to its setting and the overall picture. More importantly, however, for the inhabitants it will - if properly preserved, maintained and sensitively developed - add further to the quality of their lives.

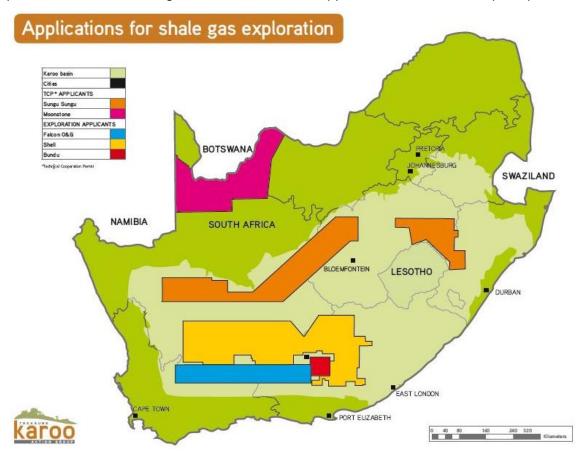

The whole town should therefore be seen as an area for sensitive development and should possibly be declared a conservation area.

It is of utmost importance that planning and development in these areas are thought through carefully, sensibly and with due sensitivity. Unfortunately, large parts of the Karoo appear to be under siege at present, with shale gas exploration and uranium mining being feared as potentially the most destructive and dangerous in terms of the impacts they could have on the area's scarce water resources, fragile environment, road networks, pristine landscapes, human and animal health.

# **ALTERNATIVE & RENEWABLE ENERGY PROPOSALS**

There is widespread concern over the proposed shale-gas drilling explorations (fracking) in the Karoo Basin, as well as the impact that this and the proposed Wind Farms close to Aberdeen will have on our fragile environment and wildlife. Tracts of land earmarked for Solar Energy facilities are in different stages of investigation, i.e. Feasibility and/or EIA. Parts of Dr Beyers Naudé are considered to be highly sensitive and the locality of such developments is therefore of crucial importance, notwithstanding the fact that Council supports these initiatives in principle.

**ROYAL DUTCH SHELL** (yellow demarcation), have applied for an exploration area consisting of Western, Central & Eastern Precincts ~ each approximately 30,000 km<sup>2</sup> ~ in total almost 95,000 km<sup>2</sup>. Parts of the Dr Beyers Naudé fall within the Central and Eastern Precincts and a number of farms could potentially be affected.

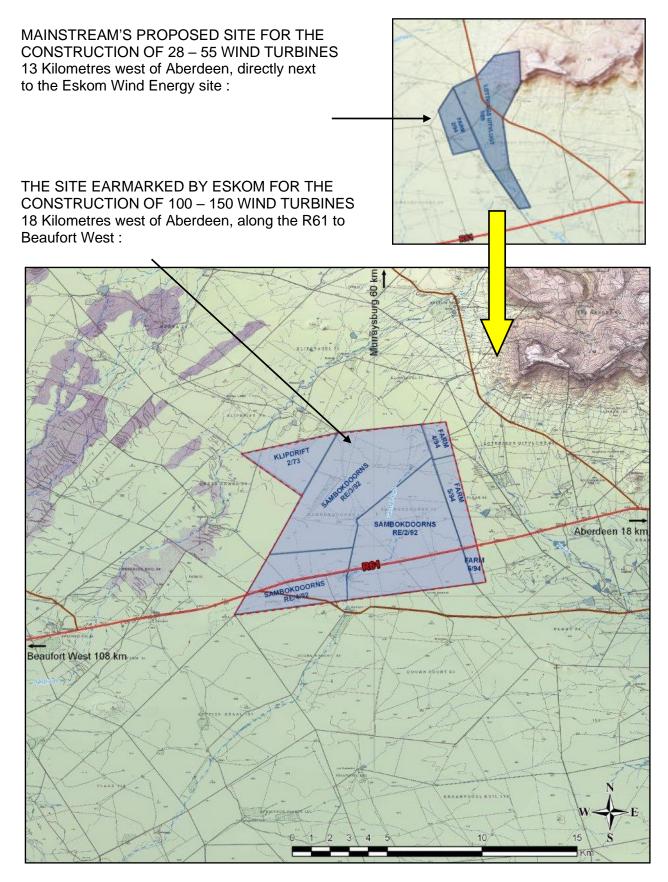

**BUNDU OIL & GAS** (red demarcation) is a subsidiary of Challenger Energy Ltd, an Australian company formerly known as Sunset Ltd. They are interested in a 4,200 km<sup>2</sup> area straddling Dr Beyers Naudé, Blue Crane Route and Inxuba Yethemba Municipalities. This application is referred to as the Cranemere project; the name of a beautiful farm situated between Pearston and Graaff-Reinet, an area that features in the book Plains of the Camdeboo, by Eve Palmer.

**FALCON OIL & GAS** (blue demarcation) is interested in an area of 30,000 km<sup>2</sup>, stretching from Klipplaat (Ikwezi Municipality) in a band all the way across to Ceres in the Western Cape. This band includes a section of the Dr Beyers Naudé, in what is known as the Karoo Basin.

**SASOL CONSORTIUM** and its member companies were looking at an area of approximately 88,000 km<sup>2</sup>, which was demarcated as starting in the south of Kwa-Zulu Natal, down into the Eastern Cape and across parts of the Orange Free State. However, they withdrew their application in 2011 due to public objections.

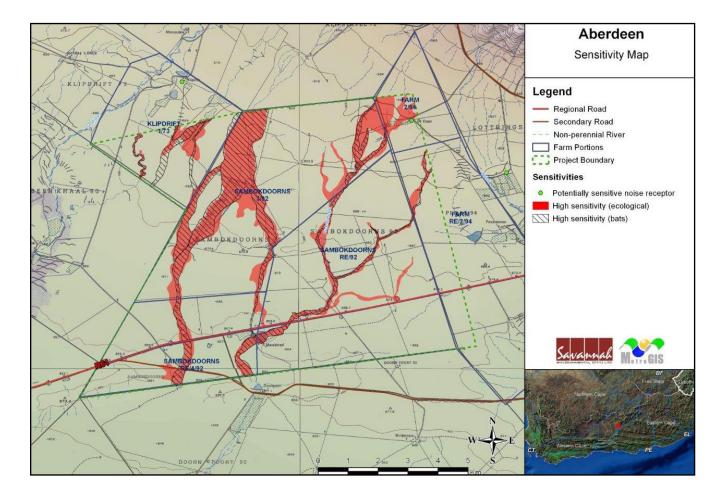

### WIND ENERGY PROPOSALS / EIA IN PROGRESS (both situated in Ward 1, Aberdeen)

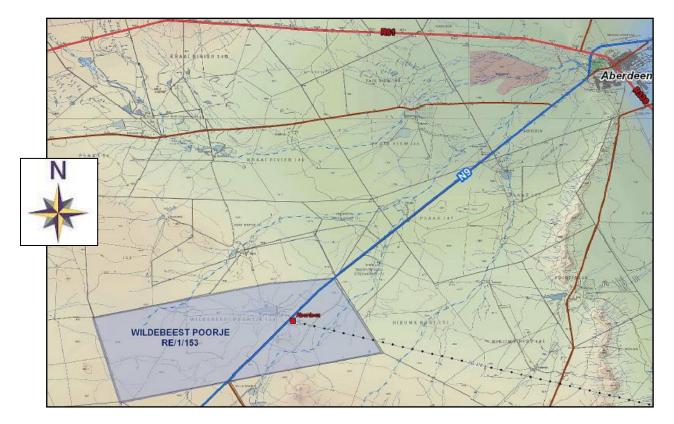

[Maps sourced from Savannah Environmental (Pty) Ltd brochures]

BIOTHERM (PTY) LTD'S PROPOSED SITE FOR THE CONSTRUCTION OF A PHOTO-VOLTAIC SOLAR ENERGY FACILITY GENERATING UP TO 20 MW OF POWER : Situated on Portion 1 of the farm Wildebeest Poorje ~ approx.. 70ha in extent ~ Aberdeen (Ward 1) :

### GIANT FLAG PROPOSAL, INCORPORATING A SOLAR ENERGY FACILITY

An initiative presented to the former Camdeboo Municipal Council by the Giant Flag Trust, was designed to include a Solar Energy Farm with a capacity to generate about 4 MW of power, that can potentially provide electricity for 4,000 homes.

The site allocated for the project is an area of approximately 100 ha in extent, situated south of Graaff-Reinet and accessible from the R63 / R75 to Port Elizabeth. The project is underway.

### **BADUGEN SOLAR PROJECT : PORTION 2 OF 471**

The site for the proposed solar project is 450 ha in extent and straddles the R63 just below Dr Beyers Naudé Local Municipality's eastern boundary.

This portion of land is situated close to private game reserves and falls within a sensitive area known as the Plains of the Camdeboo.

It is foreseen that this facility will contribute approximately 250 MW of energy towards Eskom's electricity grid.

#### Dr. Beyers Naudé MUNICIPALITY | MUNISIPALITEIT | UMASIPALA rising together for development

# ECOSUN VILLAGE AND BIODIGESTION CENTRE

This initiative was presented to the former Camdeboo Local Municipality a few years ago and more recently there has been an indication that the funding application is being considered. Various studies have been conducted and an EIA will also be required.

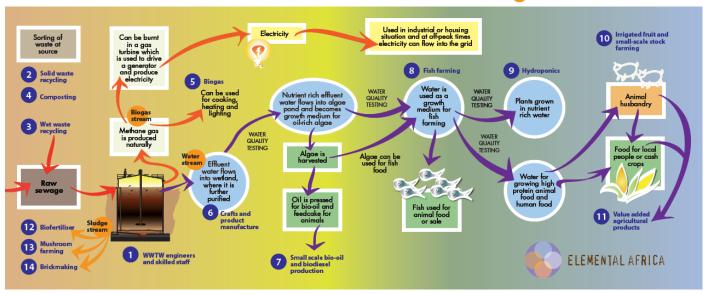

The Municipality is actively seeking ways and means to play a meaningful role in alleviating the country's energy crisis, by partnering with or supporting initiatives for alternative and renewable energy – on condition that they will not harm the environment or impact negatively on the health and the livelihoods of its communities. The Municipality supports Green Technology.

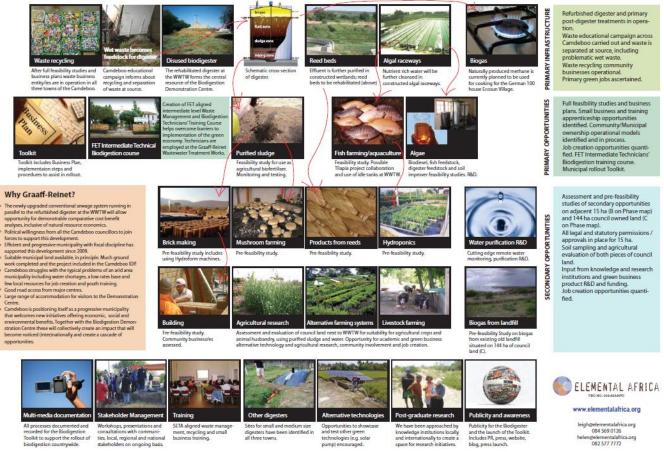

Resource streams

# Biodigestion process and potentials

Possible Biodigestion related job opportunities

### Graaff-Reinet Biodigestion Demonstration Centre: Green Fund Deliverables

In a more recent development, Dr Beyers Naudé Local Municipality is also investigating the feasibility of investing in Small Scale Embedded Generation (SSEG) which involves the installation of Photovoltaic (PV) Solar Systems that allows households to generate energy and feed back into the grid.

# **OTHER PROPOSALS WITH ENVIRONMENTAL CONSIDERATIONS**

Large tracts of land in the Municipal area have been zoned for agricultural purposes. However, applications for other use, such as mining, human settlements, industrial and other types of development are on the increase. Not all of these initiatives are properly investigated or conceptualised, and neither are formal proposals submitted for inclusion in the Municipality's IDP, which is a cause for concern, as some of these developments will require bulk services and other infrastructure to be provided by the Municipality.

One such development, consisting of a Private Hospital and approximately 200 residential units, is apparently being planned on Erf 1823 – situated in Graaff-Reinet (Ward 4) and approximately 17 ha in extent. This erf was previously earmarked for a Solar Energy facility, which was eventually scrapped. The initiative will most certainly require an EIA and other studies, as well as rezoning and subdivision; being an agricultural erf, there may be additional requirements.

Another, more recent proposal has been referred to the Municipality for consideration – that of a Private School in Wolwas, just south of Graaff-Reinet. From initial discussions, it would appear that this will be quite a large development, and will require an EIA and other studies.

The Municipality must be vigilant and ensure that proper monitoring and control of land use is applied; that illegal and insensitive developments are not allowed, as such activities could have severe and lasting negative impacts on the environment and the communities living in close proximity.

### MISCELLANEOUS MINING APPLICATIONS

In recent years there has been an increase in sand, stone and other minerals' mining permit and license applications. Some of the existing or proposed sites are quite large and are situated in or close to sensitive environments. There is also illegal mining of sand and stone taking place in some areas and not all sites are properly rehabilitated, once mining has stopped. The Council of Dr Beyers Naudé Local Municipality is concerned about the criteria being applied during the consideration of such applications, and has requested the Department of Mineral Resources to meet with the Municipality – specifically to discuss this and related matters.

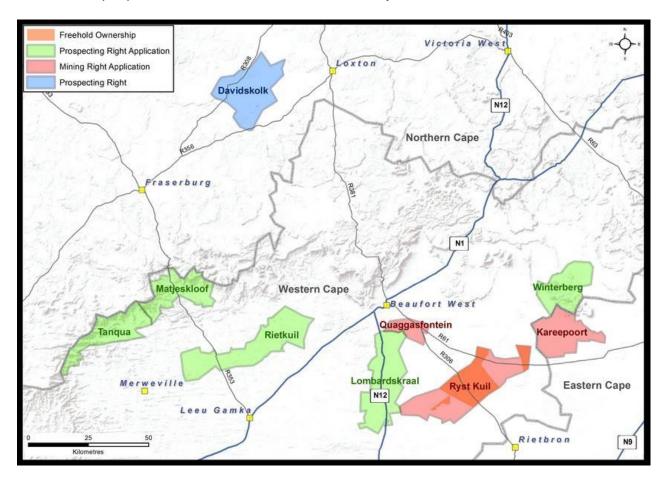

### URANIUM MINING APPLICATIONS BY TASMAN RSA MINES AND LUKISA JV CO.

Until quite recently, above companies jointly held 40 prospecting rights covering an area of 7,800 km<sup>2</sup> in the Karoo Basin. Their parent company is Peninsula Energy Ltd, who has freehold ownership over an area of 322 km<sup>2</sup> – as depicted in the updated map below, sourced from their website. One of the blocks, KAREEPOORT, falls within the Dr Beyers Naudé Municipal boundary and another, WINTERBERG (previously Vogelfontein), lies against the boundary directly above. The RYST KUIL and LOMBARDSKRAAL blocks are situated very close to Dr Beyers Naudé's western boundary – not far from the small town of Rietbron.

During 2016 Peninsula Energy indicated that it intended to divest a large percentage of its Karoo Projects and to reduce their tenement holding to 3,669 km<sup>2</sup>, with a residual 26% interest still in the hands of their BEE partners. In October 2017 the company announced that it was pulling out and would be selling its interests in the Karoo.

Uranium mining is an aggressive & invasive procedure, associated with hazardous radio-active waste, posing serious threats to the environment and the health of people and animals on site and in the vicinity.

As previously stated, the Municipality does not have an Environmental Management & Protection Section, and only dealt with Environmental Health (a different function) on an agency basis, on behalf of the Sarah Baartman District Municipality, for many years. The function was taken back by the District during 2020/21 and includes inspection of premises by the appointed Environmental Health Inspectors and taking samples of water at various points within the Municipal area, as well as the issuing of Compliance Certificates. The District Municipality is the licensing authority in terms of Air Quality Management. BNLM is currently planning for the development of an Air Quality Management Plan and Environmental By-laws.

# KPA 3 LOCAL ECONOMIC DEVELOPMENT

# UNDERSTANDING LED

The concept of LED is also often misunderstood and it is extremely difficult for Local Government to create the environment conducive for economic growth with such limited capacity and resources. LED is oftentimes referred to as a Municipality's "unfunded mandate".

Dr Beyers Naudé Local Municipality must promote LED by creating an enabling environment through investing in good infrastructure (new as well as maintaining and upgrading the old), ensuring that a high standard of basic services is rendered to all its citizens and that sufficient land is allocated for enterprise and industrial development.

Confusion exists between activities that have an economic advantage and those that have a social benefit to the community ~ both are cross-cutting dimensions and are the spin-offs of strategic development planning. Terms such as poverty relief, job creation and local economic development appear to have the same meaning for some. For the purpose of clarity and in order to distinguish between economic and social interventions during the preparation of Dr Beyers Naudé's IDP, the following table can be consulted:

| SOCIAL DEVELOPMENT   | LOCAL ECONOMIC DEVELOPMENT (LED)  |
|--|---|
| Provision of social benefits (pensions & grants);<br>food security; sport, recreation & cultural facilities<br>and programmes; housing and basic services. | Creating an environment conducive to economic development through the provision of economic and other infrastructure and investment incentives, through optimal use of local capital and resources. |
| Poverty relief / alleviation through short to medium term Job Creation programmes.   | Poverty eradication through long term, sustainable Job Creation, SMME establishment, Industrial and Sector Growth & Investment.   |
| Basic Education & Training (ABET, skills development courses).   | Further and Higher Education & Training (Internships, Learnerships, Apprenticeships).   |

The main constraint facing economic growth in the Dr Beyers Naudé is the shortage of water : this problem needs to be addressed as a matter of urgency. Other constraints are the lack of public road & rail transport and skills (advanced and entrepreneurial). Given the right climate and resources, economic growth and development can take place and decrease the levels of poverty and unemployment within the Dr Beyers Naudé Municipal area.

# A DEVELOPMENTAL LOCAL GOVERNMENT

The role of Municipalities has changed from primarily providing basic services to the community and providing, as a "secondary function", some social infrastructure, such as clinics, libraries and community halls. In terms of our Constitution, Local Government now also has a role to play in the social and economic development of its communities.

The Sarah Baartman District Municipality undertook a District – Wide Economic Growth and Development Strategy (EGDS : prepared by Urban-Econ, April 2006). The objectives for the Economic Growth and Development Strategy were as follows:

• To grow the district economy to achieve a 3% year-on-year growth rate between 2006 and 2009 and a 5% growth rate from 2010 onwards.

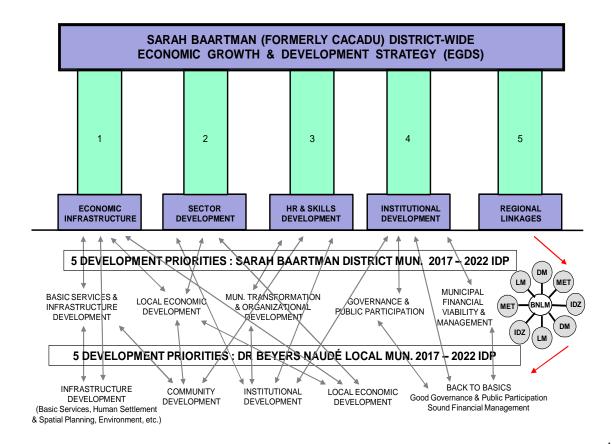

- Dr. Beyers Naudé MUNICIPALITY | MUNISIPALITEIT | UMASIPALA
- To reduce the existing number of unemployed persons in the district from 20.5% to 15% by 2014.
- To halve the number of households living below the poverty line to 22% by 2014.
- To grow the agricultural sector to achieve a 1% year-on-year growth rate between 2006 and 2009 and a 1.6% year-on-year growth rate from 2010 onwards.
- To transform the agricultural sector, thereby ensuring that 35% of agricultural enterprises are black owned by 2014.
- To transform the tourism sector, thereby ensuring that 35% of the tourism enterprises are black-owned by 2014.
- To grow the contribution of tourism to the district overall economy & employment creation.

Five main strategic pillars were identified for stimulating sustainable economic growth and development in the SBDM, namely:

- Economic infrastructure (includes land, utilities and transport infrastructure)
- **2** Sector development (includes investment, marketing, branding and diversification)
- B Human Resources and Skills (includes loss of skilled workers, HIV/AIDS, entrepreneurship, gender equity)
- Institutional development (includes capacity building, the clarification of roles between District and Local Municipalities, communication and service delivery)
- Regional linkages (with IDZ's, Metro's and markets)

Local IDPs must be aligned with the District's IDP and its EGDS. The schematic illustration below shows the measure of alignment between Dr Beyers Naudé's IDP Development Priorities and those of the District, and how this extends to the District EGDS, which requires a review :

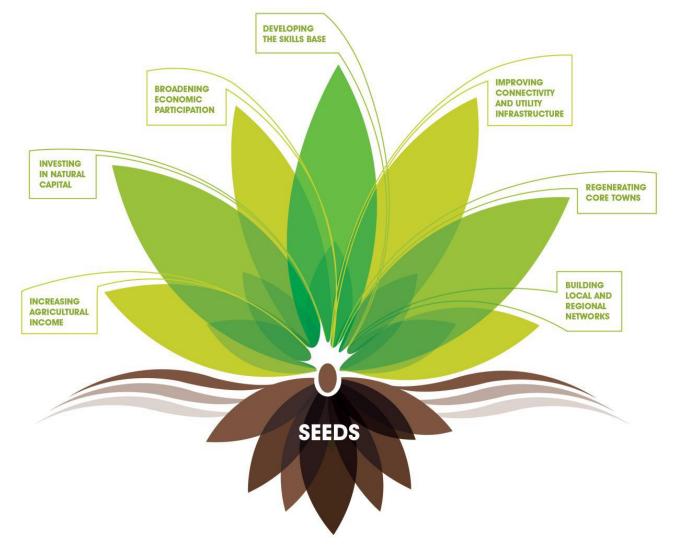

The National Spatial Development Perspective (NSDP) provides a planning framework for Local Government and indicates, for example, that we should invest in infrastructure and services in places with high need and high potential; provide basic services to communities in places with low development potential whilst also equipping these communities with the necessary skills that will improve their mobility to areas where employment opportunities exist.

Surveys done throughout the district has enabled Sarah Baartman to classify nodal points in categories according to the principles of the NSDP; the Sarah Baartman IDP and SDF gives guidance to the Local Municipalities as to the type of development which should be taking place in the different towns. The intervention logic that must prevail is to "Invest in people, not places".

In 2012 Sarah Baartman DM developed a Socio-Economic and Enterprise Development Strategy (SEEDS), to augment its EGDS of 2006. It has seven strategic pillars, as illustrated below :

# **DEVELOPMENT OF LED STRATEGY PLAN**

# A new LED Strategic Plan is being developed for the Municipality, focussing on its institutional arrangement and growing the Agriculture and Tourism sectors – the region's two main economic drivers – and their multiplier effects.

It is proposed that the process of developing a new LED Strategic Plan, should result in the following outcomes :

- LED Strategic Plan, with implementable Action Plan linked to timeframes,
- Comprehensive Socio-economic survey,
- Establishment of Socio-economic Database and Economic Barometer,
- LED Institutional Framework, and
- LED Vision and Mission Statement.

In conjunction with the above, the following activities should also be taking place :

- Development of a Responsible Tourism Sector Plan,
- Development of a Marketing Plan,
- Development of Investment Attraction and Retention Strategies, etc.

Another important consideration, would be the Radical Economic Transformation Strategy, adopted by Government, which includes the application of Preferential Procurement for small enterprise (entitled to 30% of all implemented projects) – a point of emphasis in the 2017 SONA. This gives effect to assisting and safeguarding businesses.

# **PROPOSED LED PRIORITIES, OBJECTIVES AND STRATEGIES**

The activities below serve as a guideline for the development of LED Priorities, Objectives and Strategies. There should be thorough consultation and public participation in the process.

| PRIORITY<br>NUMBER | FOCUS AREA   | OBJECTIVE  |   | STRATEGY   |  |
|--------------------|--|--|---|--|--|
| 1                  | LED<br>STRATEGIC<br>PLAN   | ➔ To create an enabling environ-<br>ment that will attract investment<br>and stimulate economic growth<br>and development. | *   | Implement and apply the<br>principles of the Dr Beyers<br>Naudé's LED Strategy<br>Plan.                                      |  |

# B. COMMUNITY NEEDS ANALYSIS TO BE CONDUCTED

| 2. | Tourism   |   |  |  |  |
|----|---|---|--|--|--|
|    | This is the area's second-largest economic driver, with excellent tourism infrastructure throughout the region, situated in urban and non-urban areas. The Municipality's Tourism function is partially outsourced to Community Tourism Organizations, who do the area's marketing & tourism development under the umbrella of the Camdeboo Local Tourism Organization. The LTO requires more support to improve its institutional capacity & operational functioning. There is huge potential in the development or expansion of : | YES, in most cases. However,<br>in some instances the idea still<br>needs to be properly concept-<br>ualized and feasibility studies<br>conducted. Investment oppor-<br>tunities should be identified |  |  |  |
|    | National Liberation & Khoisan Heritage Routes   | and further investigated.   |  |  |  |
|    | Royal Block Heritage Precinct & Cultural / Township Tours   |   |  |  |  |
|    | Rail-based Tourism  |   |  |  |  |
|    | Infrastructure  |   |  |  |  |
|    | Arts & Crafts (Creative products)   | Possible Constraints  |  |  |  |
|    | Eco-tourism & Hiking Trails   | <ul> <li>Sustainable water supply</li> <li>Suitable land or sites</li> </ul>  |  |  |  |
|    | Accommodation & eating establishments   | Funding   |  |  |  |
|    | Training Programmes : Tour Guides & Employees     Development of and passible linkages with the Comdebase   |   |  |  |  |
|    | <ul> <li>Development of and possible linkages with the Camdeboo<br/>National Park (SANParks)</li> </ul>   |   |  |  |  |
|    | Development of Aberdeen Fonteinbos Nature Reserve   |   |  |  |  |
|    | <ul> <li>Development of a Nature Reserve in Nieu-Bethesda (refer<br/>Koeikamp application of a few years ago)</li> </ul>  | Tourism is the area's second largest economic driver and  |  |  |  |
|    | <ul> <li>Development of products identified in the Dr Beyers Naudé<br/>Responsible Tourism Sector Plan – still to be developed.</li> </ul>  | should be dealt with in more<br>detail in the Municipality's LED<br>Strategic Plan (containing  |  |  |  |
|    | • <b>Built Environment</b><br>Tourist Attractions : Buildings & sites of historical and<br>archaeological value or significance to be protected and<br>conserved, e.g. monuments, museums, old human<br>settlements, Graaff-Reinet heritage area, etc.  | more specific economic data<br>and recommendations linked<br>to an Action Plan), as well as<br>the Tourism Sector Plan.   |  |  |  |
|    | • Natural Environment<br>Tourist Attractions : Areas to be protected and conserved,<br>e.g. Valley of Desolation, other sensitive landscapes &<br>viewsheds, flora & fauna, riverbeds, fossil sites and areas of<br>palaeontological and geological significance.   |   |  |  |  |
| 3. | Manufacturing   | YES, to a small degree.<br>Requires more focussed   |  |  |  |
|    | • Setting up small factories for production of wooden items, e.g. furniture, coffins, doors, cabinets, etc.   | attention. Investment oppor-<br>tunities exist and should be<br>identified and investigated.  |  |  |  |
|    | • Production of building materials, such as bricks, slabs, pavers, etc.   | Possible Constraints  |  |  |  |
|    | Components (mechanical, IT, electrical appliances, etc)   | Sustainable water supply  |  |  |  |
|    | • Renewable energy and green technology; recycling plants.  | <ul><li>Suitable land or sites</li><li>Funding</li></ul>  |  |  |  |
| 4. | <ul> <li>Mining</li> <li>Sand, stone, clay and other minerals (within regulated parameters and with due consideration to the environment and</li> </ul>   | YES, however, attention must<br>be paid to possible over-<br>exploitation of our natural<br>resources and lack of proper<br>rehabilitation of these sites, as   |  |  |  |
|    | with rehabilitation programmes in place).   | well as environmental damage,<br>including air pollution.   |  |  |  |

| 5. | Other   | YES, to some extent.<br>Requires more focussed               |
|----|---|--|
|    | <ul> <li>Clothing &amp; Fabrics (manufacture, wholesale, retail)</li> <li>Processed Foods (manufacture, wholesale, retail)</li> </ul> | attention. Investment oppor-<br>tunities exist and should be |
|    | Consumables, cleaning materials, toilet paper, etc.     (manufacture, wholesale, retail)  | identified and investigated.<br>Possible Constraints         |
|    | <ul> <li>Information &amp; Communication (e.g. media, call centres, IT,<br/>Film &amp; Video, etc.)</li> </ul>                        | Sustainable water supply                                     |
|    | • Services : Car Wash, Carpet Cleaning, Recycling, etc.   | <ul> <li>Suitable land or sites</li> </ul>                   |
|    | Building & Construction   | • Funding  |

- Other potential could be identified during surveys still to be conducted and above proposals should therefore not be seen as being exclusive of any other products or activities.
- Attempts should be made to encourage the Informal Sector in legalizing their activities / business
  operations in order to become part of the Formal Sector ~ to move into the mainstream.
- The ideal situation would be for big business to provide mentorships to emerging contractors, small business owners and emerging entrepreneurs. Established businesses can play a valuable role in providing support to small enterprises trying to find a niche in the market.
- Organizations providing business advice and support can play a vital role in LED, by collaborating
  with the Municipality and assisting the community in realizing their dreams.
- Where possible, infrastructure projects should be linked to EPWP, CWP & SR Programmes.
- Training Programmes in all of the above Sectors should be provided and must be supported.
- A project must develop into a business and be run according to business principles, or it will fail.
- → Agriculture and Tourism are Dr Beyers Naudé's two main economic drivers and respectively provide comparative and competitive advantages. Dr Beyers Naudé produces some of the best mohair in the world and has some unique tourism attractions, such as the Camdeboo National Park with the Valley of Desolation situated in it; the Owl House Museum (a National Heritage Site) in Nieu-Bethesda; Baviaanskloof Mega Reserve (a World Heritage Site) and many more, as mentioned in the Executive Summary of this IDP.
- → The Manufacturing industry has expanded during the past few years and has created several new permanent employment opportunities; a good example is Montego, a major pet food producer that has set up all of its manufacturing operations in Graaff-Reinet, where it is the 2<sup>nd</sup> largest employer, after the Municipality.
- → The LED Unit is assisting in the establishment of Business Chambers in other Towns.
- → Some key economic indicators released by ECSECC in 2017, appear on page 159.
- BNLM is actively and progressively supporting EPWP and CWP programmes as a means to create employment, promote socio-economic development and alleviate poverty. The CWP is closely linked to the Municipality's LED function.
- The EPWP, its principles and objectives are institutionalized the PMU Manager is also the driver of the Municipality's EPWP programmes. An EPWP Policy was developed for Dr Beyers Naudé LM and workshopped with Council early in 2018. The Policy was approved by Council on 27/03/2018, Res. COUNCIL-011.1/18; EXCO Item 008.2/18 on 26/02/2018.
- The Municipality is also a participant in the National Job Fund's Apprenticeship Programme.
- It is a condition in tender specifications that local labour, service providers and contractors be given preference if they qualify in terms of the tender criteria. The Municipality also applies a rotational system when engaging the services of local SMMEs, for instance to do the catering at special events and functions.

# LED STRATEGY IMPLEMENTATION

The Municipality's LED Department or Section must co-ordinate and facilitate the various LEDrelated programmes and initiatives in the Dr Beyers Naudé region, and also ensure the implementation of the Municipality's LED Strategies, once a Plan is in place.

Early in 2009 the Graaff-Reinet Business Association was revitalized and launched its new image under the name of the Graaff-Reinet Chamber of Commerce, an affiliate of the Afrikaanse Handelsinstituut (AHI). After an introductory meeting with the LED Committee on 6<sup>th</sup> April 2009, followed by further discussions and negotiations, a Memorandum of Understanding was drawn up between the Graaff-Reinet Chamber of Commerce and the former Camdeboo Municipality. On 23<sup>rd</sup> July 2010 a high-level delegation, made up of representatives from the AHI, GTZ, DLGTA, Sarah Baartman DM and the Chamber, met with the former Camdeboo Council, with the view of entering into dialogue about the future of economic development in the area. Some catalytic projects were jointly proposed by the Municipality and the Chamber and appropriate partners that could possibly contribute towards the realization of these projects were identified. Unfortunately not much progress was made in this regard. The Graaff-Reinet Chamber of Commerce is desirous of re-establishing and strengthening its relationship with the Dr Beyers Naudé Council. A more recent private initiative was the establishment of an Economic Development Forum.

# "Dialogue for Change"

This all forms part of the **Small Towns Development Initiative** and Graaff-Reinet was one of 6 towns chosen countrywide to benefit from this unique venture, also referred to as the Small Towns Revitalization Project, focusing on the growth and transformation of Graaff-Reinet and supported by the specialist collaboration between the AHI, IDASA, COGTA, GIZ and Sarah Baartman DM. The GIZ (formerly GTZ) was commissioned to do some surveys in Graaff-Reinet and presented their findings to the Municipality in February 2011.

In 2016, the **Karoo Small Town Regeneration Initiative** was presented at a Conference by the Karoo Development Foundation, and a declaration was signed by various parties – including the former Camdeboo, Baviaans and Ikwezi Municipalities – all neighbouring Municipalities at the time, with the view of establishing cross-boundary partnerships. SALGA referred the declaration to Dr Beyers Naudé Local Municipality for tabling, consideration and adoption by Council.

An Urban Design Plan was developed. Once implemented, we hope to successfully link economic development potential – specifically aimed at tourism – in Umasizakhe with the CBD of Graaff-Reinet, whilst also addressing the issue of an alternative route for heavy vehicles (i.e. rerouting freight traffic) and improving road infrastructure through the area. Another area investigated for further development was Goedhals Square, where a bus terminal is being constructed as part of a phased initiative to improve trade and transport.

Training in Citizen Leadership and strengthening links with the Regional Development Agency are other initiatives are receiving attention. Local structures supporting LED in the Municipality are NAFCOC and the Dr Beyers Naudé United Business Forum – consisting of business representatives from across-the-board, providing a valuable platform for information-sharing and public participation – with the view of creating a vibrant People's Economy (formal & informal).

Some catalytic projects that have kicked off, or are in the pipeline, are :

### → Giant Flag

- ➔ Karoo Catch Aquaculture
- → Land Release to Small Farmers
- → Small Craft Initiative and Co-operatives Training

Capital projects are mostly funded by Private Investors; Training & other programmes are linked to the Municipality's annual Operating Budget.

### > The two largest economic drivers in the region are Agriculture and Tourism

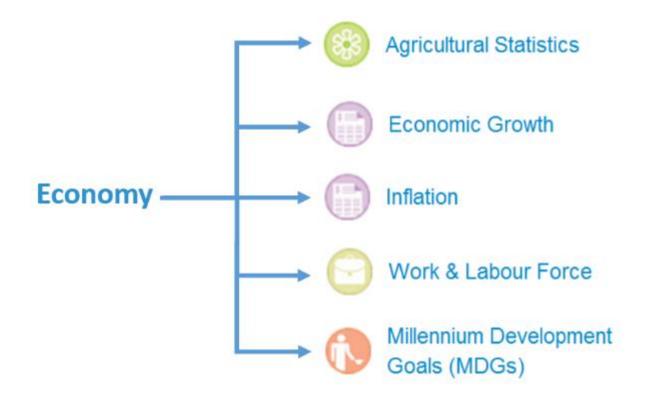

# AGRICULTURE AS AN ECONOMIC DRIVER

As can be seen from the schematic illustration below, Agriculture forms a vital part of the country's economy and is the main economic driver in all three of the former Municipalities. Some agricultural data that was made available quite recently on the StatsSA website, is provided on the next few pages. There is uncertainty, however, about the accuracy of the data.

Progress has been made in recent years with the acquisition of land for the purpose of releasing it to emerging farmers. However, many of the beneficiaries lack the requisite skills and experience to successfully farm and generate an income from the land in a sustainable manner. There are many examples in the country of farms being abandoned as a result of soil degradation (over-grazing and erosion), non-production or a total collapse of infrastructure. Too many beneficiaries per farm has also been cited as being problematic. The step from subsistence to commercial farming is a big one.

It is crucial for these beneficiaries to be provided with the necessary training and capacity to properly manage their land, livestock, crops, staff and finances, as well as be adequately equipped with the knowledge and resources required to maintain their infrastructure. Failure to do so will result in an economic crisis in the area and seriously affect our food security and people's livelihoods.

The region is renowned for its word-class production of mohair (from the Angora goat), wool and of course redmeat, including the famous Karoo Lamb brand. Game-farming has become a very lucrative industry and many conventional stock farms have been converted into game farms. Crop-farming is restricted to areas that have access to water, and where the climate is not so harsh.

#### Table 1.1: Number of households by Local municipality

| Local municipality | Households<br>involved in<br>agricultural<br>activities | Households not<br>involved in<br>agricultural<br>activities | Total Households<br>per Municipality |  |

### TOURISM AS AN ECONOMIC DRIVER

There are many top-class tourist attractions in the Dr Beyers Naudé Municipal area, such as :

- Camdeboo National Park, with its spectacular Valley of Desolation,
- The Owl House, an international icon, situated in the small village of Nieu-Bethesda, and
- Baviaanskloof Wilderness Heritage Site, the ultimate 4x4 adventure and nature experience.

Above attractions have created tremendous opportunities in the hospitality industry by way of overnight accommodation (farm stays are very popular) and eateries. Numerous small art & craft enterprise benefit from the thousands of tourists (local and overseas) that visit the region each year. In addition, there are many interesting museums, monuments and other places of interest to enjoy. Although a section of the Addo National Elephant Park is situated within the Municipal boundary, and can be accessed from a route close to Waterford on the R400, the majority of visitors enter the Park at the main gate close to Addo.

The region has beautiful landscapes and a rich heritage; it is important that its natural and built environment be protected for generations to come.

# OTHER ECONOMIC DRIVERS

The Karoo does not lend itself to industrialization. Most of the region's small to medium-sized industries are situated in Graaff-Reinet, and some of the main manufacturers (and biggest employers) have only established their business in the industrial area in recent years. The former Camdeboo Municipality realized the importance of attracting such investors and released some more land for further expansion and development a few years ago. A relatively new industry, aquaculture, is gaining momentum and is set to construct a processing plant soon. There is positive scope for this new enterprise to set up satellite plants throughout the region.

Government Services generate good employment opportunities in the region; the Municipality being one of the biggest employers, while a number of Sector Departments have offices in the larger towns, especially Graaff-Reinet, which is considered to be the main economic hub of the Dr Beyers Naudé LM. There is also a relatively strong presence of commercial and retail enterprise in Graaff-Reinet and Willowmore, and to a lesser degree in the smaller towns of Aberdeen, Steytlerville and Jansenville. SMMEs are finding it quite hard to survive in the current poor economic climate. Lack of a sustainable water supply, affordable and regular transportation, skills and expertise are some of the challenges curtailing economic growth in the region.

Mining of minerals such as sand, stone and clay also provides employment opportunities in the region, but there is concern about natural resources being over-exploited and causing irreversible damage to the environment.

Some key economic indicators for 2016, released by ECSECC in 2017, are provided below :

GDP-R Gross Domestic Product by Region representing the value of all goods and services produced within a region, over a period of one year, plus taxes and minus subsidies.

GVA-R Gross Value Added by Region is the measure of output (total production) in terms of the value that was created within that region. GVA can be broken down into various production sectors.

TOTAL PERSONAL INCOME = The sum of the total annual personal income for all households in a specific region.

PER CAPITA INCOME = The annual income per person (total personal income divided equally among the population).

GINI CO-EFFICIENT = A summary statistic of income inequality, measured from 0 to 1.

POVERTY GAP = An indicator that measures the depth of poverty

# KPA 4

# FINANCIAL VIABILITY

All three of the former Municipalities were experiencing financial problems before the elections and subsequent amalgamation. Ikwezi's situation was particularly severe, followed by Baviaans and Camdeboo – all had serious to critical cashflow problems and many creditors were put on hold as their accounts simply could not be paid. Enormous debt is owed to the Municipality and a concerted effort will have to be made to get the outstanding debtors to pay their arrears, especially the Government Departments who owe millions to the Municipality. It is expected that the new Dr Beyers Naudé Local Municipality's cashflow will remain under pressure for some time.

# IMPORTANT

- Council's Credit Control Policy must be applied strictly and consistently, without political interference. The Municipality must regularly update its Indigent Support database and conduct an audit to ensure that all *qualifying* households are receiving the benefit of these subsidies.
- Municipal Officials and Councillors must adopt a very cost-conscious culture and not incur wasteful, fruitless and unnecessary expenditure. We cannot afford to be extravagant. Guidelines and directives issued by National Treasury must be taken seriously and adhered to.

# FINANCIAL PLANNING : OVERVIEW OF 2021/22 MTREF BUDGET

The key service delivery priorities, as outlined in the IDP, informed the development of the Budget, including the need to maintain and improve the Municipality's financial sustainability. Furthermore, cost containment measures are being implemented to curb costs and to improve operational efficiency.

National Treasury's MFMA Circulars No. 48, 51, 54, 55, 58, 59, 66, 67, 70, 72, 74, 75, 78, 79, 85, 86, 89, 91, 93, 94, 98, 99, 107 and 108 were used to guide the compilation of the 2021/22 Medium Term Revenue and Expenditure Framework (MTREF).

The Municipality faced the following significant challenges during the compilation of the 2021/22 MTREF:

- Maintaining revenue collection rates at the targeted levels;
- Maintaining electricity and water losses at acceptable levels;
- Fully implementing cost containment measures;
- Allocation of the required budget provision for the rehabilitation and maintenance of infrastructure;
- Maintaining an acceptable cost coverage ratio;
- Drought conditions currently faced by the Municipality and surrounding areas; and
- The impact of COVID-19 regulations, circulars and guidelines issued by Government.

The following budgeting principles and guidelines directly informed the compilation of the 2021/22 MTREF:

• The priorities and targets, relating to the key strategic focus areas, as outlined in the IDP.

- The level of property rates and tariff increases to take into account the need to address maintenance and infrastructural backlogs.
- The level of property rates and tariff increases to ensure the delivery of municipal services on a financially sustainable basis.
- The need to enhance the municipality's revenue base.
- The implementation of cost containment regulations.
- No loan funding has been taken out to support the Capital Budget, in view of financial affordability considerations. A Borrowing Policy is in place.

In view of the aforementioned, the following table represents an overview of the 2021/22 Mediumterm Revenue and Expenditure Framework :

|                                | Current Year                    | 2020/21 Mediu               | m Term Revenue ai              | nd Expenditure                 |

Total operating revenue has decreased by 14.5% or R96.6 million for the 2021/22 financial year, compared to the 2020/21 Adjustments Budget. The decrease is as a result of the decrease in anticipated proceeds from sale of land in comparison to the prior year. There is a general increase in revenue, with exception to the above-mentioned sale of land, as result of tariff increases and continued implementation of cost reflective tariffs.

The municipality completed investigations into cost of supply and a baseline tariff was established for each service in 2019. Thorough investigations were also concluded on electricity tariffs, the effect of the wheeling agreement with Eskom and management has completed physical verification of bulk consumer meters. The intention of the physical verification was to ensure that all possible tampering is identified for these users, correct meters are installed and are functional and to ensure that each user is linked to the correct tariff. This process is anticipated to be completed by end of 2021/2022.

For the two outer years, operational revenue increases by 4.2% and 5.3% respectively.

Total operating expenditure for the 2021/22 financial year amounts to R498.4 million, resulting in a budgeted surplus of R72.9 million. Compared to the 2020/21 Adjustments Budget, operational expenditure increased by 2.3% in the 2021/22 Budget. The major operating expenditure items for 2021/22 are employee related costs (34%), bulk electricity purchases (26%), depreciation (9%), Repairs and Maintenance (7%) and other expenditure (24%). The municipality is currently struggling financially and cost containment measures are implemented. Cost containment measures include a monthly curb on overtime, acting allowances and travel expenses. It also includes the stopping of non-essential procurement.

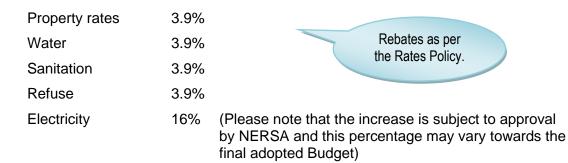

For the two outer years, operational expenditure increases by 1.9% and 2.5% respectively. The 2022/23 and 2023/24 budgets reflect operating surpluses of R80 million and R103 million respectively.

Funding for the 2021/22 Operating Budget is funded from various sources, the major sources being service charges such as electricity, water, sanitation and refuse collection (47%), property rates (9%), grants and subsidies received from National and Provincial Governments (33%).

Funding for the 2020/21 Operating Budget is obtained from various sources, the major sources being service charges such as electricity, water, sanitation and refuse collection (50%), property rates (10%), grants and subsidies received from National and Provincial Governments (33%).

In order to fund the 2021/22 Operating Budget, the following increases in property rates and service charges will take effect from 1 July 2021 :

The municipality has conducted a cost of supply study on all tariffs in 2019. The study revealed that almost all the services are currently being rendered at below cost which puts enormous strain on the cash flow of the municipality. It was therefore imperative that these tariffs be changed to include baseline tariffs. Due to the poor economic conditions and covid-19 revenue and tariffs could not be increased with more than the proposed 3.9% by National Treasury.

The original capital budget of R71.8 million for 2021/22 is R21.9 million or 44% higher than the 2020/21 Adjustments Budget, this is due to more capital allocations from national government for 2021/22. The Capital Budget over the MTREF will be mainly funded from government grants and subsidies, as limited internal funding is available. Capital expenditure for 2022/23 will amount to R80.5 million.

The budget provides for assistance to the poor and includes the following social package:

- Water 6 kl free per month
- Electricity 50 kWh free per month
- Refuse 100% of monthly cost free
- Sanitation 100% of monthly cost free
- Property Rates 100% of assessed rates

All budget related policies have been reviewed and will be workshopped with Councillors and top management. The policies will also be subjected to public participation.

The 2021/22 Budget Summaries & Capital Schedules are attached as ANNEXURE C.

# **OPERATING REVENUE FRAMEWORK**

The continued provision and expansion of municipal services, is largely dependent on the Municipality generating sufficient revenues. Efficient and effective revenue management is thus of vital importance in ensuring the ongoing financial sustainability of the Municipality. Furthermore, in accordance with the MFMA, expenditure has to be limited to the realistically anticipated revenues.

The Municipality's Revenue Management Strategy includes the following key components:

- $\rightarrow$  National Treasury's guidelines in this regard;
- ➔ Tariff Policies;
- ➔ Property Rates Policy;
- → Indigent Policy and provision of free basic services;
- → The level of property rates and tariff increases must ensure financially sustainable service delivery.
- → The level of property rates and tariff increases to take into account the maintenance and replacement of infrastructure, including the expansion of services;
- → Determining fully cost reflective tariffs for trading services;
- → Electricity bulk tariff increases as approved by the National Electricity Regulator of South Africa (NERSA);
- → Efficient revenue management, targeting a 95% annual collection rate for property rates and service charges; and

The following A4 table is a summary of the 2021/22 MTREF (classified by main revenue source):

In the 2020/21 financial year, rates and service charges amounted to R292.9 million. This increases to R317.7 million in 2021/22 and increases to R338.3 million and R360.8 million in the 2022/23 and 2023/24 financial years, respectively.

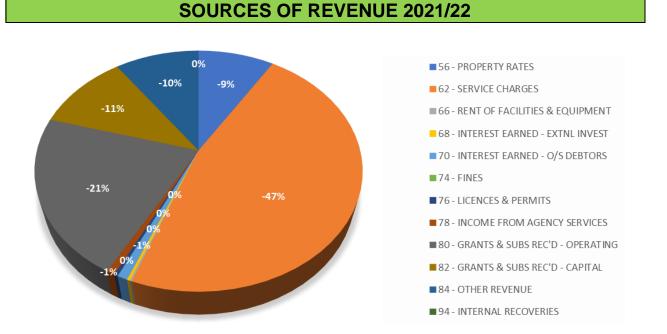

The following continued efforts to increase the revenue base were introduced in 2019:

- Implementation of a new valuation roll with increased market values,
- Implementation of cost reflective tariffs after a cost of supply study was conducted,
- Implementation of drought tariff, and
- Introduction of environmental levy.

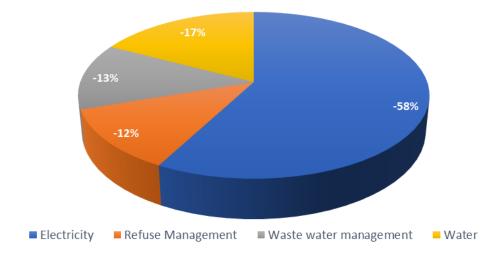

The service charges as stated above are main source of funding for the municipality with a contribution of R317.7 million or 47% of the total budget.

The individual service contribution to service charges is as follows :

- Electricity 58%
- Water 17%
- Refuse 12%
- Sanitation 13%

# 2021/22 BUDGET INCOME RATIO FROM SERVICE CHARGES

### GENERAL INFORMATION ON PROCEDURES, SYSTEMS AND CONTROLS

- → There is a Help Desk at the Treasury Department where customers are assisted with their account queries and also aided with Indigent Support applications.
- → Water and Electricity meters are being maintained and are read on a monthly basis.

- Dr. Beyers Naudé MUNICIPALITY | MUNISIPALITEIT | UMASIPALA
- → A GRAP compliant Infrastructure Register is in place and is being updated regularly.
- → The Debtor's Database is updated regularly, in order to reflect current and accurate information. Debtor Accounts are generated and issued monthly. Overdue accounts are handed over in line with the Municipality's Credit Control Policy. Qualifying households do receive Indigent support.
- → The Municipality has a dedicated FBS Unit within the Budget & Treasury Department. The Indigent Register is reviewed annually and is being updated as applications are approved. Awareness campaigns were conducted during February and March 2021 so that the register can be populated with current information and represents a true reflection of the major sections of the impoverished communities that we serve.
- → The IGG Forum and Steering Committee are in place and functioning. The IGG allocation for FBS is approximately 7.4% of the annual Budget; representing R42 310 329 for 2021/22, R43 250 793 for 2022/23 and R44 275 528 for 2023/24.
- → The Debtors' turnover rate for 2019/20 was 2.07 times and average collection period 360 days was 33 days. At present it is 1.84, with an average collection period of 167 days. As can be seen from the ratios, much has been done to improve the collection rate by encouraging residents, businesses and Government Departments to pay their accounts timeously and in full. A Credit Control Policy is being applied.
- → The Municipality's biggest Debtor is Alliances International in Graaff-Reinet (R1.7 million).
- → The Treasury Department's IT systems are being maintained per contract with Konica Minolta. The Municipality uses the Sebata/R-Data Promun Financial Information System, which generates accounts, payments and payroll etc. on a monthly basis. All correspondence is managed electronically on the Muncomp / MunAdmin System (in accordance with an approved File Plan), with hard copies on file. Record-keeping is centralized in the Registration Office (Corporate Services).
- → Studies to determine the cost-of-service provision vs cost reflective tariffs have been completed and baseline tariffs are now being implemented. Seasonal drought tariffs are now also being implemented. A new environmental levy is also being implemented to ensure maintenance of municipal landfill sites.
- → Annual adjustments in rates and tariffs and their revised policies are advertised and gazetted before implementation. They are also placed, along with the Budget, on the Municipal website.
- → In accordance with the Municipality's Project Plan, a new Municipal Valuation Roll was budgeted for and put out on tender early in 2018, where after a Service Provider was appointed. The Draft Valuation Roll was subsequently prepared, advertised and lay for public inspection from 8 April to 10 May 2019. It was implemented as from 1 July 2019. Interim valuations are conducted if and when necessary. Valuation Rolls are available on the Municipal website.
- → Budget Income is reported on monthly, quarterly and annually, in the prescribed format MFMA Section 52(d), 71, 72 and yearly Reports.

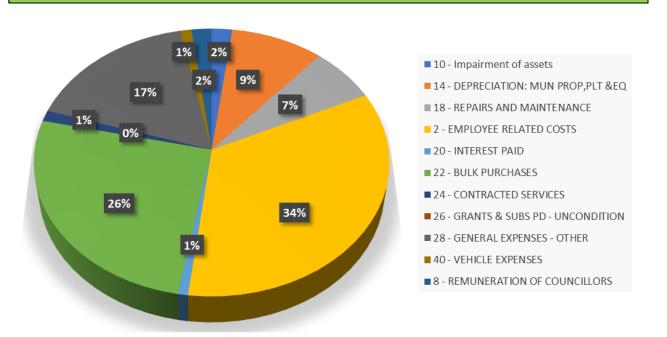

# **OPERATING EXPENDITURE FRAMEWORK**

The Municipality's expenditure framework for the 2021/22 budget and MTREF is informed by the following:

• The funding of the budget over the medium-term is informed by the requirements of Section 18 and 19 of the MFMA;

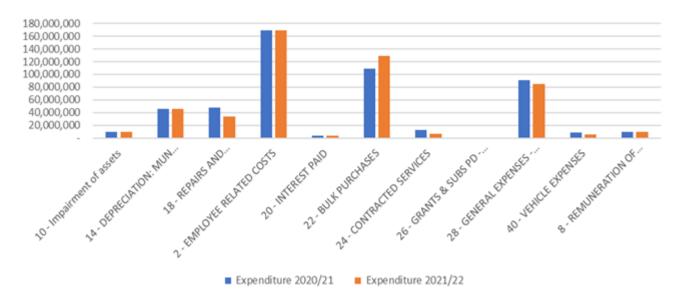

- Dr. Beyers Naudé MUNICIPALITY | MUNISIPALITEIT | UMASIPALA rising together for development
- A balanced budget approach by limiting operating expenditure to the operating revenue;
- In terms of Other Expenditure, priority has been given to provision for Repairs & Maintenance and FBS / Indigent Support.

# **EXPENDITURE BY TYPE 2021/22**

# **BUDGET EXPENDITURE RATIO YEAR-ON-YEAR**

### GENERAL INFORMATION ON PROCEDURES, SYSTEMS AND CONTROLS

→ Tight controls are in place to ensure proper management of expenditure votes and to avoid fruitless and wasteful expenditure.

- → The Creditor's turnover rate is currently an average of 287 days; this is cause for concern.
- → Our **Supply Chain Management Policy** is based on the principles of being fair, equitable, transparent, competent, cost effective and in compliance with the Municipal SCM regulations.
- → Special votes are created for Conditional Grants (such as those received for the implementation of Capital Projects, provision of Indigent Support, etc.) and expenditure against these votes is properly recorded, monitored and reported on.
- → Strict Austerity Measures have been implemented. No form of expenditure may be incurred without the necessary authorization being granted. This includes overtime and S & T (by both Councillors and Officials). A Cost Containment Policy has been developed and will be workshopped to council and management in April 2021.
- → Budget Expenditure is reported on monthly, quarterly and annually, in the prescribed format MFMA Section 52(d), 71, 72 and yearly Reports.

→ Monthly reporting is done on grant spending. These reports are submitted to Council.

→ The amalgamation of Camdeboo, Ikwezi & Baviaans LMs created severe challenges, that included the effective management of capital projects and spending of MIG Grants.

→ Conditional Grants are deposited into a Call Account and managed as separate accounts on the Municipality's system (dedicated votes are allocated for each project's funds).

# KPA 5

# GOOD GOVERNANCE & PUBLIC PARTICIPATION

# **IDP STRUCTURES FOR CONSULTATION & PARTICIPATION**

Dr Beyers Naudé Municipality uses various mechanisms and platforms for more effective communication and public participation. Structures in place and functioning, include the following:

- IGR Forum
- LED Forum
- Ward Committees
- IDP Steering Committee
- IDP Representative Forum and other Stakeholder Forums
- SPU Forums (Youth, Disabled, HIV/AIDS, Sport and other)
- Free Basic Services (FBS), IGG and Housing Committees or Forums

Records – such as reports, minutes and attendance registers – of the various meetings are kept on file. A Year Planner / Calendar of Events is produced annually, in which the meetings of Council, EXCO, MPAC, Audit & Standing Committees, as well as the various other structures (e.g. Steering committees and Fora), are listed. It is updated and distributed on a monthly basis.

A Communication & Public Participation Policy (containing Strategies and Action Plan) was developed and adopted for Dr Beyers Naudé LM in 2017. The Municipality's Communication & Media Liaison Officers use the local media, social media, websites, e-Newsletters and printed newsletters to keep the general public informed about the various Municipal processes, and regular press releases are issued. In addition, loudhailing of meetings and special events is done in the Wards whenever required. The Municipality is making a concerted effort to improve its communications and public participation programmes.

At the time of developing its new 5-year IDP, the Council was also in the process of engaging with the public on a new logo for the Municipality. There was an extended period of public participation and the logo that received the most votes, was adopted by Council. A new website was introduced (still work in progress) and BNLM has launched a formal branding campaign.

The IDP Steering Committee and the IDP Representative Forum were established in August 2016, along with the adoption of a Process Plan with Terms of Reference containing a **Public Participation & Stakeholder Mobilization Strategy.** These two structures were actively involved with the development of the new 5-year Integrated Development Plan for 2017 – 2022; they are reactivated annually with the commencement of the IDP Review Process, which again includes extensive and broad-based Stakeholder participation. In order to ensure maximum efficacy, all 14 Ward Councillors, with the addition of some key Officials, serve on the IDP Steering Committee. This composition serves to improve the flow of information and open up the channels of communication between the Councillors and their respective Constituencies.

### The composition of the IDP Steering Committee, chaired by the Municipal Manager

- Municipal Manager, Mayor (ex officio) and all 14 Ward Councillors
- Directors, Assistant Director, COO, HODs & Area Office Co-ordinators
- IDP, PMS, LED, SPU, ICT, HR, Town Planning, Tourism, Communication and Housing Officials

### The composition of the IDP Representative Forum, chaired by the Mayor

Over the past number of years great effort was put into the establishment of sound relationships with all of Municipality's Stakeholders. The IDP Stakeholder Databases were consolidated and updated, and all major roleplayers have been listed. The Forum consists of the IDP Steering Committee, PR Councillors, Public & Private Sector, District Municipality, parastatals, organised labour, training institutions, tourism organisations, large civic organisations / regional NGOs and the CDW Co-ordinator for the region.

Diverse aspects of the IDP are interrogated at the IDP Representative Forum meetings and inputs from the members are recorded and submitted to the relevant internal structures for further attention. The IDP Manager also consults on a one-on-one basis with officials at Sector Departments, in order to obtain information for inclusion in the IDP and to improve alignment of programmes and projects. Issues that do not fall within the functional scope of the Municipality are referred to the relevant Sector Departments. (There is a separate Mayoral IGR Forum in place to deal with this and other inter-governmental issues.)

It would appear that most (if not all) Municipalities have been experiencing poor attendance of IDP and IGR meetings by Sector Departments – this has been raised at several District meetings and would have received high-level intervention, but no real positive result was seen. It would therefore assist if the Municipality's Communications Officers made contact with the relevant senior Officials at these Departments to encourage their attendance and participation in these important meetings.

Refer to Annexure D. for a comprehensive, updated IDP Stakeholders' List.

### Ward Committees, War Rooms and Community Development Workers

A Ward Committee Policy was adopted by Council on 10/01/2017 (Res. COUNCIL-015/16); all 14 Ward Committees were established in 2017. Committee members fill specific portfolios and it is important that they possess the necessary knowledge, skills and resources to perform their function efficiently. The Committees are chaired by their Ward Councillors, who also headed the War Room structures that were established late in 2016. However, the War Rooms are no longer functional. The War Room teams were meant to support and strengthen the role of the Ward Committees, by bringing Government closer to the people – the main thrust of the Integrated Service Delivery Model.

The CDWs serve ex officio on the Ward Committees. A Ward Operational Framework and individual Ward Operational Plans are in place. Ward Committees are meant to meet on a monthly basis and hold regular constituency meetings, to keep the Communities informed about Municipal and Government affairs, progress with projects and IDP implementation, and also to receive public input on matters of service delivery and general concern. Issues pertinent to the IDP and/or Ward-based Plans are referred from these structures through the Ward Councillor to the IDP Manager (or relevant Sector Department) for attention – and *vice versa*.

A Community Development Worker (CDW) is based in some of the Wards and works closely with the Committee and the War Room team. There are a number of vacant CDW positions and these must be filled as a matter of urgency – a COGTA competency.

Similar to the IDP Representative Forum Stakeholder database, a comprehensive list was compiled of all Ward-based Organizations that need to link up with the Ward Councillors, their Committees and War Room structures. It is incumbent upon the Ward Councillor to ensure that the interests of these smaller organizations are represented at the Ward's meetings, and elevated or referred to the relevant structures for the necessary attention.

In addition, the Municipality has LED & SPU structures that feed into the Integrated Development Planning processes.

# COMMUNITY-BASED PLANNING (CBP)

The Ward-based public participation programme for developing the 2017 – 2022 IDP commenced in October 2016 and consisted of focus-group workshops that were held in each of the 14 Wards. It was an extensive programme, that required rigorous interrogation of the Ward's situation and issues. A thorough SWOT Analysis was conducted, that resulted in the identification of key issues and Ward Development Priorities, that were rated in accordance with their level of importance by the workshop participants, that were representing various sectors of the Community. The only missing segment is a complete and updated Ward Profile (containing more recent demographics and other statistical info), that could not be produced as no post-2016 ward-based data is available. This gap will be closed once data is released by StatsSA or the MDB.

A comprehensive CBP Report, containing extensive data for each Ward, was the outcome of the workshops. This in turn informed Municipal and Sector Departments as to the Development Needs & Priorities of the Communities and assisted them in their project planning & design for the forthcoming fiscal and outer years. Community consultation & participation will be taken further with regular Ward Meetings by Ward Councillors and their Ward Committees, as well as the Mayoral Outreaches and other events. The Ward Development Priorities of all 14 Wards are subjected to an annual progress review, involving Communities and Ward Committees. Ward Committees are closely involved with the CBP programme, as were the War Rooms when they were still operating.

The CBP Report with Ward Development Priorities and SWOTs is attached as ANNEXURE E.

# **INTER-GOVERNMENTAL RELATIONS**

The Honourable Mayor has established an Inter-Governmental Relations Forum and a local IGR Charter was adopted, to ensure its efficient and effective functioning and also clarifying the aims & objectives, as well as the roles and responsibilities of the IGR and its various Stakeholders. This structure also serves to co-ordinate the planning of projects and implementation of programmes stemming from the IDP process, Ward-based Plans, etc. The IGR will play a pivotal role in the new District Development Model (DDM), which is in the process of being rolled out.

# **BACK TO BASICS (B2B) IMPLEMENTATION & REPORTING**

Throughout this IDP, the Dr Beyers Naudé Municipality has indicated the extent to which it embraces the B2B principles and how its Development Priorities are aligned to the 5 pillars of B2B. The reporting function was placed within the Communications Officer's scope of duties. Due to the post becoming vacant early in 2018, reporting fell behind schedule, however, this was addressed with the appointment of an Acting Communications Officer, until the vacancy is filled.

# AUDITS

### INTERNAL

Dr Beyers Naudé LM has a fully-fledged Internal Audit & Risk Management Office, reporting directly to the Municipal Manager. An Audit Committee was established soon after the Municipal Elections in August 2016. The Audit Committee holds regular meetings and performs its function in terms of the Municipality's Audit Committee Charter, which is scheduled for a review in 2021.

The following independent persons (with relevant experience) currently serve on the Committee, however, their contracts will be expiring during the course of 2021 :

- Dr Ngwadi Mzamo (Chairperson)
- Mr Nevel Smith
- Mr Danie de Lange

Other parties in attendance are :

- Dr Beyers Naudé Municipality : The Mayor, Municipal Manager, Director of Budget & Treasury, Chief Accountant, Chief Audit Executive & Scribe.
- Representatives from the Auditor-General, Provincial Treasury and COGTA.

#### EXTERNAL

All **Audit Reports** by the Auditor-General with Council's responses and undertakings are on file. An AFS Preparation Plan is in place; the **Audit File** is kept current and is available upon request. Recurring issues, such as HR, internal control, pre-determined objectives and other PMS-related issues are being attended to. Audits are up to date and preparations are already underway for the 2020/21 audit and documentation requested by the Auditor General has been made available.

| FISCAL  | AUDIT FINDING   | ACTION  |
|---------|---|---|
| 2015/16 | <b>Unqualified</b><br>Former Camdeboo and Baviaans LMs.<br><b>Disclaimer</b><br>Former Ikwezi LM – unable to submit AFS.                          | Findings and recurring issues were attended or responded to in accordance with the 2015/16 Audit Action Plan, which was attached to the 2017/18 IDP. The Budgets of the three disestablished LMs were consolidated for 2016/17. |
| 2016/17 | <b>Disclaimer</b><br>Main issues related to the usefulness of<br>Predetermined Objectives (unqualified finding),<br>and a slow creditor turnover. | Findings and recurring issues were attended or responded to in accordance with the 2016/17 Audit Action Plan, which was attached to 2018/19 IDP.  |
| 2017/18 | <b>Disclaimer</b><br>Main issues related to limitations on AFS;<br>usefulness and reliability of info in SDBIP.                                   | Findings and recurring issues were attended or responded to in accordance with the 2017/18 Audit Action Plan, which was attached to 2019/20 IDP.  |
| 2018/19 | <b>Disclaimer</b><br>Main issues related to limitations on AFS.   | Findings and recurring issues were attended or responded to in accordance with the 2018/19 Audit Action Plan, which was attached to 2020/21 IDP.  |
| 2019/20 | (This will only be received at end of March 2021)   | The 2019/20 Audit Action Plan will be compiled as soon as AG Report becomes available and will be attached to final IDP as ANNEXURE F.  |

# LITIGATION & PETITIONS

Dr Beyers Naudé Municipality has retained the former Camdeboo LM By-laws, and these will remain in place until new ones have been promulgated. The Municipality has appointed a Service Provider, who is currently attending to the revision of all By-laws. Unfortunately, mainly due to a staff shortage, effective law-enforcement by the Municipality continues to be problematic and proper steps are not taken against transgressors as a result.

Contract Management (including leases) and general litigation is dealt with by the Corporate Services Directorate (Auxiliary Services). Supply Chain contracts are dealt with by Finance Dept.

A Litigation Register is maintained, with status of all cases recorded. More complex cases are referred to Council's legal representative, based in Graaff-Reinet. There have been a number of labour disputes and actions against the Municipality in recent years, stemming mostly from the former Ikwezi and Baviaans LMs.

Petitions are normally received by the Mayor and then delivered to the Municipal Manager, who refers them to the Top Management, for consideration. The issues at hand are referred to the relevant Directorates for urgent attention and response. A report is then submitted to EXCO, indicating how the matters have been dealt with and for the Speaker to provide feedback to the petitioners and the Community. Internal petitions will be dealt with by the Municipal Manager and Top Management, from where it will also be referred to the LLF for feedback.

### SOCIAL COHESION IN MUNICIPAL PLANNING

There are a number of definitions for and concepts of what constitutes Social Cohesion. One such approach is that it is inextricably linked to *Ubuntu*. According to Cloete and Kotze (cf 2009: 7), and based on Jensen's 1998 study, Social Cohesion consists of five dimensions:

- Belonging: To be part of and to experience a sense of affiliation to the community and the larger society. It involves processes of identification and acceptance within a community and larger society. In a diverse society such as South Africa, it requires identification with and acceptance of groups.
- Inclusion: To be included on an equal basis in all social activities and rights and to have equal access to all life opportunities.
- **Participation:** This, unhindered, means active involvement in community and social activities, programmes and events.
- **Recognition:** To recognise, acknowledge and value differences without discrimination.
- Legitimacy: Refers to the integrity and social legitimacy of public bodies and leaders representing community members and citizens.

At a National Social Cohesion Summit hosted by the Department of Arts & Culture in 2012, the Department announced the four key pillars of Social Cohesion as :

- Diversity
- Inclusiveness
- Access
- Values

During the past few years, much effort has been put into emphasizing the importance of Social Cohesion in the various levels of Municipal planning and service delivery. Extensive Social Cohesion Workshops were held by former Camdeboo LM during 2010, as part of the Community-Based Planning meetings and the concept was further embraced with the request that the Municipality's Human Settlement Sector Plan be aligned with the principles of Social Cohesion (community integration) in Human Settlement Planning and that it also be brought into consideration during the review of the Municipality's Public Participation Strategy.

During the development of this IDP, Dr Beyers Naudé Municipality aligned its Vision & Mission Statements to those of its Wards wherein they expressed a strong desire to co-exist as united and integrated Communities in a safe, healthy and well-managed environment. Social Cohesion must therefore play an integral role in Municipal planning and service delivery.

## **DIMENSIONS AND CROSS-CUTTING ISSUES : SPU**

Municipal planning is influenced by a number of dimensions and cross-cutting issues. The main dimensions being:

- Social
- Spatial
- economic
- Institutional
- Natural Environment

The impact that projects can and will have on the above must always be borne in mind, hence the importance of designing strategies that will incorporate these considerations, as well as address issues such as Poverty Relief, HIV/AIDS and SPUs. Special Programmes Units (SPUs) are meant to be in place in every Municipality. The Special Programmes Unit of the Dr Beyers Naudé Local Municipality is responsible for the following categories :

- → People living with disabilities
- ➔ Youth
- → Women
- → Gender
- → Children
- ➔ Older persons
- → HIV/AIDS
- ➔ Sports & Recreation
- → Moral Regeneration
- → Skills development for the vulnerable groups

SPU Programmes are linked to the Municipality's annual Operating Budget.

The SPU Officer, in collaboration with her colleagues in some of the other towns, is holding monthly meetings and has already successfully activated a number of Special Events, such as Youth Festivals, HIV/AIDS testing & awareness programmes, etc. Programmes have also been submitted for inclusion in the Municipality's Operating Budget – with special focus on the Disabled sector, whilst some projects of capital nature have been identified. ABET and computer skills training programmes have been initiated for the disabled and will be expanded to include the other vulnerable groups.

The Municipality's Special Programmes Unit is actively engaging with training institutions and more recently entered into a partnership Agreement with Nelson Mandela University (PE) and other agencies. Some facilities have been made available for these programmes.

HIV/AIDS is a matter of such importance that it should feature as a cross-cutting issue in every area of development. An HIV/AIDS Policy must still be developed for the Municipality, aimed at the mainstreaming of HIV/AIDS in the workplace and society, combatting discrimination and with a clear link to the work of the SPU. All contracts, whether formulated by the Municipality or Consultants, must feature an HIV/AIDS chapter or strategy as part of the project's Social Responsibility. Awareness of HIV/AIDS, how to manage it within the workplace and curb the spread of it, must be advocated during all project training and employment orientation sessions.

Other matters relating to KPA 1 : Good Governance have been dealt with in previous chapters of the IDP.

## 4.1 Vision Statement

## 4.2 Mission Statement

Dr Beyers Naudé Local Municipality will give credence and effect to its Vision Statement through the following Outcomes-based commitments :

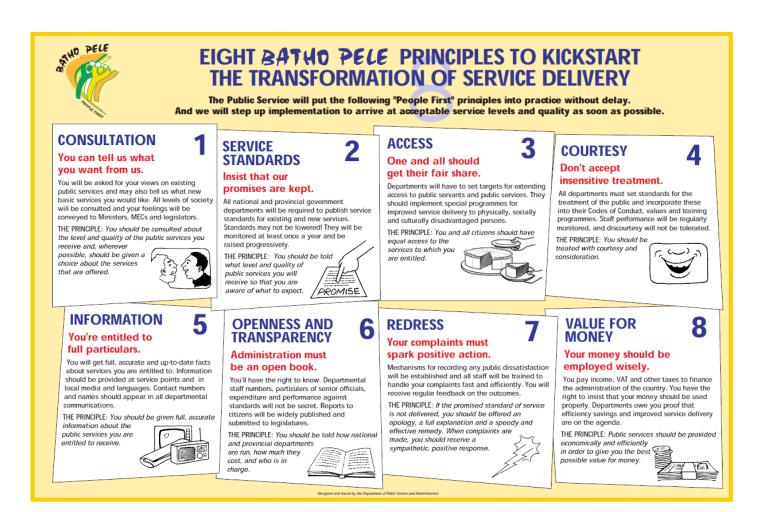

- ✓ Fully institutionalise and apply the Back-to-Basics principles,
- Deliver quality services and ensure that all households have access to basic services,
- Create an environment that is safe, healthy and conducive to socioeconomic growth and development,
- Effectively manage and protect our human capital and natural resources,
- Manage our finances and administration effectively and transparently,
- Keep the public informed and involved through efficient communication and public participation programmes,
- Address service backlogs, whilst diligently maintaining Municipal assets and infrastructure,
- Be instrumental in improving the quality of life and livelihoods of our people by building cohesive and flourishing societies.

## 4.3 Core Values

The Municipality will honour its Vision and Mission by adhering to a stringent Value System :

- Strive for innovative Service Excellence,
- Maintain a high level of Work Pride and Ethics,
- Always put the Client first and diligently apply the Batho Pele Principles,
- Work together as a Team, respectful of each other, in unity and harmony.

In general, all Municipal Councillors and Employees are bound to comply with and conduct themselves in the manner prescribed by the Codes of Conduct contained within the Municipal Systems Act 32/2000, which stipulates:

#### Section 54

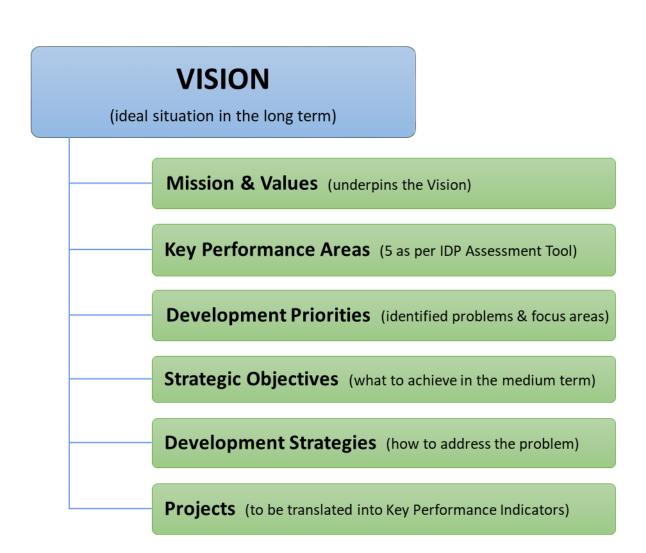

The Code of Conduct contained in Schedule 1 applies to every member of a Municipal Council;

#### Section 69

The Code of Conduct contained in Schedule 2 applies to every staff member of a Municipality.

# UNPACKING THE MUNICIPALITY'S VISION

## 4.4 Key Performance Areas & Development Priorities

All planned development within the Municipality must be structured in accordance with the 5 Key Performance Areas also referenced in Section 1.4 of Chapter 1 of this IDP. Each KPA consists of one or more Development Priorities, identified during the public participation process as well as consultations with internal Roleplayers. These Development Priorities are to be addressed through either the Municipality's Capital Budget Programme, or form part of its day-to-day operational activities.

| KPA 1 | Organizational Transformation & Institutional Development   |
|-------|---|
|       | (including Institutional Plan, HR Strategies & Policies, OPMS)  |
|       |   |
|       | Complete Delivery & Infractions Discussion  |
| KPA 2 | Service Delivery & Infrastructure Planning  |
|       | (including FBS, Human Settlement & Spatial Planning, SDF, LUMS, Biodiversity,<br>Disaster Management) |
|       |   |
| KPA 3 | Local Economic Development  |
|       | (including LED Strategy & Action Plans, SLED)   |
|       |   |
| KPA 4 | Financial Viability   |
|       | (including MTREF Budget, Financial Plan, Audit Reports, Systems & Policies)                           |
|       |   |
| KPA 5 | Good Governance & Public Participation  |
|       | (including Communication, IGR, Social Cohesion, Special Programmes)                                   |

High Level Development Priorities (mainly Capital Programmes) can be categorized as follows, each with a cluster of Focus Areas :

| PRIORITY | 1 INFRASTRUCTURE DEVELOPMENT                 | KPA 2 & 3 |
|----------|--|-----------|
|          |  |           |
|          | - Human Settlements                          |           |
|          | <ul> <li>Streets &amp; Stormwater</li> </ul> |           |
|          | - Water (FBS, Bulk & Reticulation)           |           |
|          | - Electrification (FBS, Bulk & Reticulation) |           |

- Sanitation (Sewerage & Solid Waste Disposal)
- Sector Plans, O & M Plans, Service Delivery Master Plans
- SDF, Town Planning and Land Audits
- Biodiversity & Environmental Oversight
- LUMS, SPLUMA & GIS systems and by-laws in place

**Functional Requirements** 

## PRIORITY 2 COMMUNITY DEVELOPMENT

- Social Cohesion
- Community Facilities
- Disaster Management
- Special Programmes (SPU)
- Community Safety & Security
- Strategies, Frameworks, Policies & Plans

#### PRIORITY 3 INSTITUTIONAL DEVELOPMENT

- Land & Buildings
- Vehicles & Plant
- Furniture & Fittings
- Tools, Equipment & Machinery
- Staff : Capacity Building & Training
- Performance Management System / OPMS
- Organizational Restructuring & Transformation
- Information & Communications Technology (ICT)
- LLF, Institutional Plan, HR Strategies, Frameworks & Policies

### PRIORITY 4 LOCAL ECONOMIC DEVELOPMENT KPA 3

- SMMEs
- Business Hubs
- Enabling environment
- Implementation of LED Strategies
- Skills & entrepreneurial development
- Investment Attraction & Business Retention
- Land release; Commercial & Industrial Infrastructure
- Growth of established and emerging Economic Sectors, such as tourism, agriculture, manufacturing, creative industries, etc.

#### Institutional Performance (mainly of operational nature) with a cluster of Focus Areas

#### PRIORITY 5 BACK TO BASICS

Good Governance

- Batho Pele
- IGG Indigent Support
- Ward Committees and CDWs
- Inter-Governmental Relations (IGR)
- By-laws; fair and consistent Law Enforcement
- Credible Integrated Development Planning (IDP)
- Functional Council, Standing Committees and Fora
- Functional systems, proper record-keeping and archiving
- Communication, Public Participation & promoting Socio-Economic Dev.

#### Sound Financial Management

- Clean Audits
- Annual Budget
- Sustainable Cash Flow
- Financial Plan & Strategies
- Annual Financial Statements
- Systems, Structures & Policies
- GRAP, MFMA & mSCOA compliance

KPA 4 & 5

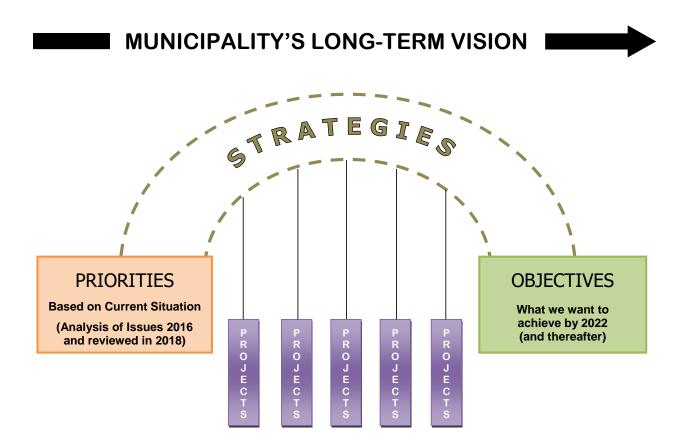

KPA 1

KPA 2 & 5

## 4.5 Strategic Objectives and Development Strategies

The next step was to determine **what** must be done (Objective) to address the Priority Issue and **how** (Strategy) this will be achieved. This process is illustrated below :

The logical flow of Objectives and Strategies from each Development Priority's Problem Statement (Situation) and the resultant unpacking of Projects are comprehensively illustrated in Chapter 6, which contains the IDP's Project Registers and SDBIP.

The overall Objectives and Strategies of the top four Priority areas within the Municipality's Capital Programme are **summarized** on the next page.

"However beautiful the strategy, you should occasionally look at the results."

Quote : Winston Churchill

| PRIORITY NO. 1 INFRASTRUCTURE DEVELOPMENT   |   |   |   |   |  |

## OPERATIONAL STRATEGIES AND SECTOR PLANS

The core components of the IDP required in terms of Section 26 of the Municipal Systems Act 32 of 2000 are reflected below, with an indication of the status of these components, investigations or policies, and where the information can be accessed.

|     | CORE COMPONENT  | YES / NO  | STATUS  |
|-----|---|-----------|---|
| 1.  | Municipal Council's Vision  | Yes       | Refer to Executive Summary & Chapter 4.   |
| 2.  | Assessment of existing level of<br>development  | Yes       | Refer to Chapter 3 in IDP : Situation Analysis, KPA 1 - 5.  |
| 3.  | Development Priorities and Objectives   | Yes       | Refer to Chapter 4 in IDP & Project Register.   |
| 4.  | Development Strategies  | Yes       | Refer to Chapter 4 in IDP & Project Register. Revised.  |
| 5.  | Spatial Development Framework (SDF) &<br>Spatial Planning & Land Use Management<br>(SPLUMA) | No        | A new SDF is being developed for Dr Beyers Naudé LM.<br>Some groundwork has already been done, with MISA<br>assistance. To follow will be the consolidation of Zoning<br>Schemes to be SPLUMA compliant, by 2021. GIS not<br>operational; being assisted by SBDM.                             |
| 6.  | Operational Strategies  | Yes       | Addressed in this Chapter of the IDP.   |
| 7.  | Disaster Management Plan  | No        | A draft Disaster Management Plan has been developed<br>and now needs to be finalised for adoption by Council.<br>Risk Assessments to be conducted annually.<br>(The Nqweba Dam Emergency Preparedness Plan was<br>adopted 2007/08 and must be reviewed.)                                      |
| 8.  | Financial Plan (Budget, MTREF, SDBIP)   | Partially | The Draft 2021/22 MTREF Budget was tabled and adopted 29/03/2021; the Final 2021/22 Budget was approved on The Draft 2021/22 SDBIP is in progress.  |
| 9.  | Key Performance Indicators (KPIs)   | Yes       | Automated Performance Management System (PMS) still<br>to be rolled out and cascaded to lower levels. Upper level<br>Performance Contracts & Scorecards in place. SDBIP in<br>place and addressing the gaps between the IDP & Budget<br>with better formulated KPIs & outcomes-based Targets. |
| 10. | Institutional Organogram  | Yes       | A new Staff Establishment was developed for Dr Beyers<br>Naudé LM and revised in 2018 and will undergo another<br>review in 2021. Placements are in the process of being<br>concluded; job descriptions almost complete; job evalua-<br>tions to follow (including phasing in of pay parity). |
| 11. | Investment / Development Initiatives  | Yes       | See proposals on Activities, Projects or Programmes to be<br>supported : Chapter 4, KPA 3 on LED, and Project<br>Registers.   |

In addition to the core components, a number of Sector Plans and Operational Programmes are also required for each Municipality. The purpose of establishing various integrated programmes and plans is to synthesize various cross-cutting issues. Due to the voluminous nature of most of these Plans, only their Executive Summaries will be included, once they have been developed. **The Municipality is urgently seeking assistance in this regard.** 

The following few pages reflect on the status of some of the Municipality's most important Operational Strategies, Sector and Management Plans.

### 5.1 SPATIAL DEVELOPMENT FRAMEWORK (SDF) & LUMS

 Status : A new SPLUMA-compliant SDF has been developed for Dr Beyers Naudé LM with MISA and SBDM assistance. Draft has been advertised for Public Inspection & Comments. SPLUMA by-laws were promulgated in 2018. Integration of LUMS and zoning schemes to follow, and GIS training for officials. Municipal Tribunal established & functioning. Financial & technical support is required for some processes.

### 5.2 LOCAL ECONOMIC DEVELOPMENT PLAN

• Status : A new LED Strategic Plan is being developed for Dr Beyers Naudé LM, with Action Plan, applicable policies and by-laws. COGTA is assisting with the process.

### 5.3 DISASTER MANAGEMENT PLAN (DMP)

- Status: A draft has been developed for Dr Beyers Naudé LM; in the process of being finalised, with Risk Assessment, applicable policies and by-laws with the assistance of SBDM.
- 5.4 INSTITUTIONAL PLAN (incorporating Organogram, Human Resource Strategies & Policies, Communication & Skills Development Plans, etc.)
  - Status : A draft HR/Institutional Plan has been developed for Dr Beyers Naudé LM, but must still be finalized. Some policies already in place; others are in progress.

### 5.5 HUMAN SETTLEMENT SECTOR PLAN (HSSP)

• Status : A new Human Settlement Sector Plan must be developed for Dr Beyers Naudé LM. Dept of Human Settlements to assist. Must contain the strategies referenced in IDP.

### 5.6 WATER SERVICES DEVELOPMENT PLAN (WSDP)

• Status : A new WSDP must be developed for Dr Beyers Naudé LM, with applicable policies and by-laws. SBDM has appointed a Service Provider to assist with this. The WSA Audit Report is already available.

### 5.7 INTEGRATED WASTE MANAGEMENT PLAN (IWMP)

• Status : A new NEMA-compliant IWMP, with applicable policies & environmental by-laws, must be developed for BNLM. COGTA has been approached for assistance.

## 5.8 **PERFORMANCE MANAGEMENT SYSTEM (PMS)** - linked to Service Delivery and Budget Implementation Plan (SDBIP)

- PMS Status : PMS Policy Framework was developed and adopted in 2017. Revised in 2019. Manual PMS is in place; still to be cascaded down to all tiers of Management and eventually other levels. The Municipality is working towards implementing an automated system.
- SDBIP Status : In place; revised and updated annually. Draft for 2021/22 is in progress.

### 5.9 FINANCIAL PLAN, BUDGET & POLICIES

(Financial Standing, long-term financial strategies, Medium Term Revenue & Expenditure Framework Budget & Policies)

Financial Plan

Policies

• Status : Most have been developed, as listed under KPA 4 and are reviewed annually.

### 5.10 RESPONSIBLE TOURISM SECTOR PLAN (RTSP)

• Status : A new RTSP must be developed for Dr Beyers Naudé LM. Financial and technical assistance is required.

### 5.11 LAND REDISTRIBUTION SECTOR PLAN (Land Reform and Area Based Planning)

• Status : A new LRSP must be developed for Dr Beyers Naudé LM and land audits are to be conducted. Financial and technical assistance is required.

### 5.12 COMPREHENSIVE INFRASTRUCTURE PLAN (CIP) (Human Settlements & Basic Services)

• Status : A new CIP must still be developed for Dr Beyers Naudé LM. Financial and technical assistance will be required.

### 5.13 INTEGRATED TRANSPORT PLAN (ITP)

• Status : The District ITP was adopted by former Municipalities. SBDM has recently indicated that it is reviewing its ITP and will make it available to LMs for adoption and implementation. It is advisable for Local Municipalities to develop their own ITPs.

### 5.14 INFRASTRUCTURE MASTER & MAINTENANCE PLANS

- Status : A Water Services Master Plan was developed for BNLM in 2018. Master Plans for the other services must be still be developed. Financial and technical assistance is required.
- Status : New Maintenance Plans for electricity, water, roads, stormwater and sanitation have been developed. A Maintenance Plan for Waste Management is still outstanding. Financial and technical assistance is required.

Once all of the Plans have been developed, their cover pages will be attached as evidence, under ANNEXURE G.

"I don't work on a project unless I believe it will dramatically improve life for a bunch of people."

Quote : Dean Kamen

## 6.1 Funded Project Register : Municipal Capital Budget

The Project Register appearing in new 2017 – 2022 IDP was prepared as a result of a situation analysis, public participation and the identification of capital needs. This Register informed the Municipality's 2021/22 Capital Budget and there has been proper alignment. It will be updated and amended during the subsequent annual IDP Reviews. The Project Register includes :

- unique numbering for each project to assist with the identification of projects,
- inclusion of the responsible department / project manager in the register,
- indicating all the services being rendered by the Municipality, either by virtue of its Constitutional mandate, or on an Agency or assigned basis,
- indicating the IDP's Development Priorities, with linkage to Objectives and Strategies,
- separating the capital and operational expenses with classification of projects,
- separating funded and unfunded projects\*,
- additional columns were included to reflect short- to medium-term planning, extended to a 5-year implementation period, as well as phased and ongoing projects.

Where possible, projects are being linked to EPWP, CWP and similar Job Creation, Skills Development & Poverty Relief programmes. HODs and other Capital Project Drivers are expected to report on the implementation and progress of their Capital Programmes. Copies of the quarterly SDBIP Reports for each financial year have been included under ANNEXURE H.

\* The Funded component is separated from the Unfunded projects by a meshed gridline and colour-coded for ease of reference.

### 6.2 Unfunded Project Register : Municipal Capital Budget

This component consists of a list of proposed projects that the Municipality would like to implement during the term of this IDP, as and when funding becomes available.

### 6.3 Service Delivery and Budget Implementation Plan (SDBIP)

The SDBIP forms a critical link between the Municipality's IDP and Budget, reflecting financial and non-financial Key Performance Indicators and Performance Targets in the areas of Service Delivery and Budget Implementation. Capital Projects being funded from the Municipal Budget are listed under their applicable Development Priorities and are referenced against their dedicated IDP numbers. (Progress is monitored by way of monthly SDBIP Reports.)

# 6.4 External Project Register (Sector Departments, other Institutions & Private Sector)

Several non-Municipal programmes and projects are being implemented that can influence socioeconomic development within the Dr Beyers Naudé Municipal area.

## ALIGNMENT : MEDIUM TERM STRATEGIC FRAMEWORK (MTSF)

The MTSF is issued by the Minister in the Presidency (Planning) and is a Framework that will guide the Government's programme in its Electoral Mandate Period from 2019 to 2024. Its aim is to ensure policy coherence, alignment and co-ordination across Government Plans, as well as alignment with budgeting processes. It forms part of the first five-year implementation phase of the National Development Plan and consists of 7 Strategic Priorities, based on the development challenges identified in South Africa, and all spheres of Government are required to align themselves with the MTSF in terms of their planning and resource allocation, more specifically to address the challenges of unemployment, inequality and poverty. In addition, there are a total of 81 Outcomes, 337 Interventions and 561 Indicators. Whilst not all of the MTSF's Strategic Priorities fall within the scope of Local Government, the table below attempts to illustrate how Dr Beyers Naudé Municipality has followed Sarah Baartman District Municipality's lead in aligning with the applicable priorities of the MTSF.

| F | MEDIUM TERM STRATEGIC FRAMEWORK (MTSF) P                                   | RIORITIES | DR BEYERS NAUDÉ LM<br>DEVELOPMENT PRIORITIES   | SARAH BAARTMAN DM<br>DEVELOPMENT PRIORITIES                |
|---|--|-----------|--|--|
| 1 | Consolidating the social wage through reliable and quality basic services. |           | INFRASTRUCTURE DEVELOPMENT<br>(incl. Basic Services, Biodiversity, Human<br>Settlement & Spatial Planning) | Basic Service and Infrastructure<br>Development            |
| 2 | Education, skills and health.  |           | COMMUNITY DEVELOPMENT  | Municipal Financial Viability                              |
| 3 | Social cohesion and safe communities                                       |           |  | and Management   |
| 4 | A capable, ethical and developmental state.                                |           | INSTITUTIONAL DEVELOPMENT  | Municipal Transformation and<br>Organizational Development |
| 5 | Spatial integration, human settlements and local government.               |           | LOCAL ECONOMIC DEVELOPMENT   | Local Economic Development                                 |
| 6 | Economic Transformation and Job Creation                                   |           |  |  |
| 7 | A better Africa and a better world.  |           | BACK TO BASICS - Good Governance & Public Participation - Sound Financial Management                       | Governance and Public Participation                        |

## ALIGNMENT : GOVERNMENT'S MTSF OUTCOMES-BASED DELIVERY AGREEMENTS

During 2010, Government drew up 12 Outcomes-based Delivery Agreements that, combined, reflected its Delivery & Implementation Plans for the top priorities that had to be addressed by 2014. They were revised in 2013 and another two Outcomes were added for the 2014 – 2019 MTSF. Each Outcome has a specific number of measurable outputs with targets. Thirteen out of the twelve Agreements are to be driven by National or Provincial Sector Departments, but these Outcomes can only be achieved with the combined effort (input) of the identified Delivery Partners. See summary below.

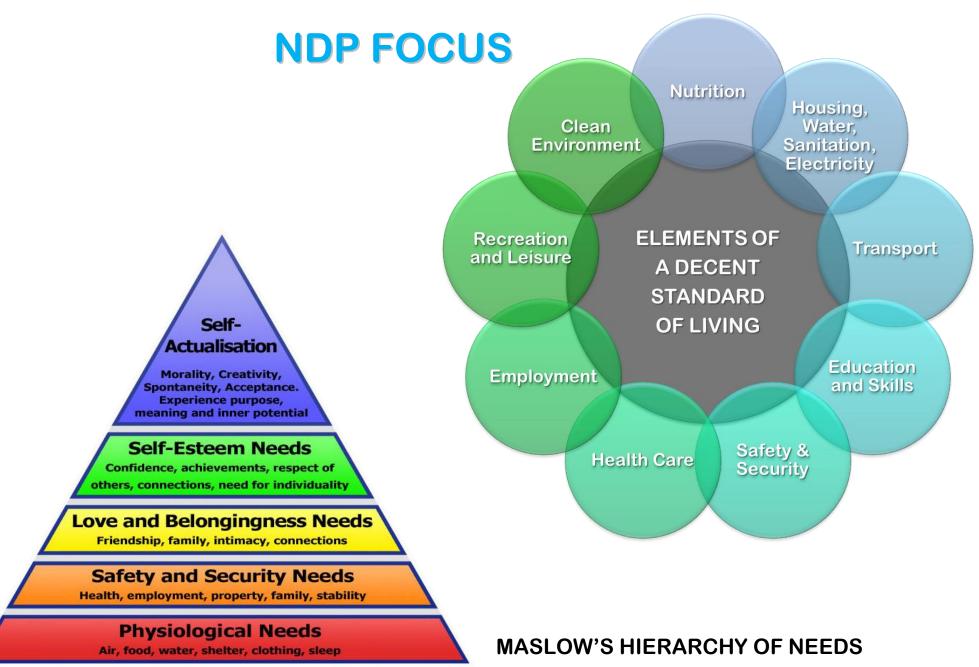

|    | THE 14 OUTCOMES  | THE DRIVERS  |  |  |  |
|----|--|--|--|--|--|
| 1  | Quality basic education.   | Department of Basic Education, with various Delivery Partners.   |  |  |  |
| 2  | A long and healthy life for all South Africans.  | National Health Council, Department of Health and various Delivery Partners.                                     |  |  |  |
| 3  | All people in South Africa are and feel safe.  | Justice Crime Prevention & Security (JCPS) Cluster, with various Delivery Partners.                              |  |  |  |
| 4  | Decent employment through inclusive economic growth.                                     | Minister of Trade & Industry, with various Delivery Partners.  |  |  |  |
| 5  | A skilled and capable workforce to support an inclusive growth path.                     | Department of Higher Education & Training, with various Delivery Partners.                                       |  |  |  |
| 6  | An efficient, competitive and responsive economic infrastructure network.                | Presidential Infrastructure Co-ordinating Commission (PICC), with various Delivery Partners.                     |  |  |  |
| 7  | Comprehensive rural development and land reform.   | Department of Rural Development & Land Reform, with various Delivery Partners.                                   |  |  |  |
| 8  | Sustainable human settlements and improved quality of household life.                    | Department of Human Settlements, with various Delivery Partners.   |  |  |  |
| 9  | A responsive, accountable, effective and efficient development local government system.  | Municipalities, LG MINMEC, higher spheres of Government and other<br>Delivery Partners working closely together. |  |  |  |
| 10 | Protect and enhance our environmental assets and natural resources.                      | Department of Environmental Affairs, with various Delivery Partners.   |  |  |  |
| 11 | Create a better South Africa, contribute to a better and safer Africa in a better world. | Department of International Relations & Co-operation (DIRCO), with various Delivery Partners.                    |  |  |  |
| 12 | An efficient, effective and development-orientated public service.                       | Governance & Administration Cluster, with various National & Provincial Delivery Partners.                       |  |  |  |
| 13 | An inclusive and responsive social protection system.                                    | Minister of Social Development, with various Delivery Partners & NGOs.   |  |  |  |
| 14 | Nation Building & Social Cohesion  | Minister of Department of Arts & Culture, with various Delivery Partners.  |  |  |  |

**Development Priority 1** 

## INFRASTRUCTURE DEVELOPMENT

Key Performance Area 2

## (A) HUMAN SETTLEMENT, SPATIAL & TOWN PLANNING

| FOCUS AREA        | <ul> <li>(1) RDP / LOW COST HOUSING BACKLOG (HIGH PRIORITY)<br/>(Provincial function being performed in part by the Municipality)</li> <li>(2) MIDDLE TO HIGH INCOME HOUSING NEEDS (LOW TO MEDIUM PRIORITY)<br/>(Investigations, Land Release &amp; Surveys by the Municipality)</li> <li>(3) SPATIAL, ENVIRONMENTAL AND LAND-USE CONSIDERATIONS<br/>(For all developments, e.g. land, environmental impacts, zonings, sustainability)</li> </ul>  |
|-------------------|--|
| PROBLEM STATEMENT | Housing BacklogCritical shortage of RDP Housing, the delivery of which is not a Municipal function. The Municipality's Housing Needs Register indicates that there are almost<br>9,000 applicants in need of shelter. Growing informal settlements because of the housing backlog, are a growing concern.Middle to High Income Housing Needs<br>During recent years there has been a growing demand for middle to high income housing and the Municipality does not have adequate and suitable land<br>available for these developments.Expansion of urban areas<br>With expanding human settlements (as a result of population growth and the main influx caused by farm workers moving into the urban areas), there is an<br>increasing need for bulk services & infrastructure, land for housing and other use (e.g. agricultural, commercial, industrial or recreational); this in turn impacts<br>on the fragile environment, limited natural resources and the Municipality's ability to avail sufficient land and basic services for these developments.  |
| OBJECTIVE         | <ol> <li>An updated Housing Needs Register that reflects the different type of housing requirements in the entire Municipal area.</li> <li>Harmonious, sustainable and inclusive land development, within a protected environment.</li> <li>Appropriate response to climate change and sensible utilization of natural resources.</li> <li>An effective Land-Use Management System and Zoning Scheme that responds to the developmental needs of the Community.</li> <li>Sufficient land suitable for low, middle and high-income housing developments.</li> <li>Adequate Bulk Services for new settlements and their amenities.</li> </ol>  |
| STRATEGY          | <ol> <li>Conduct a Housing Audit for the new Dr Beyers Naudé Local Municipality; consolidate Housing Needs Register.</li> <li>Regularly update the Housing Needs Register to ensure that the National Housing Register is kept current.</li> <li>Conduct a Land Audit for the new Dr Beyers Naudé LM and identify areas that are suitable for Human Settlement and other development.</li> <li>Conduct / commission the necessary investigations (incl. EIAs) and surveys; zone, register and systematically release land for its intended development.</li> <li>Ensure that the Department of Human Settlements develops a new Housing Sector Plan for Dr Beyers Naudé LM and regularly reviews it, taking into consideration the social and economic needs of the new settlements being planned.</li> <li>Develop a new Spatial Development Framework that coherently maps the desired state within the Municipal area, as informed by the IDP and other plans.</li> <li>Align these plans with the changing situation and needs of our Communities, whilst sensibly utilizing our natural resources; protecting and preserving our built and natural environment, as well as our cultural heritage.</li> <li>Consolidate and upgrade our Spatial Planning and Land Use Management systems by installing the necessary electronic equipment and software with</li> </ol> |

 which to effectively monitor and record land use and do our spatial and town planning in the most efficient and cost-effective manner (planning for sustainable human settlements).

 9. Developing strategies for pro-actively addressing the challenges of climate change (drought, flooding, etc.).

 10. Provide the necessary biodiversity and environmental oversight by applying and enforcing environmental by-laws & regulations, conducting EIAs and having the required plans, by-laws and systems in place.

 11. Ensure that housing delivery takes place ~ either by the Department of Human Settlements or Private Developers ~ through regular monitoring.

 12. Identify suitable projects, such as making provision for the installation and connection of bulk services on the sites.

## (B) INFRASTRUCTURE & BASIC SERVICES DELIVERY

THE 2<sup>nd</sup> PILLAR OF BACK TO BASICS : Supporting the delivery of Municipal Services to the right quality and standard. Creating conditions for decent living by consistently delivering municipal services to the right quality and standard. This includes planning for and delivery of infrastructure and amenities, maintenance and upkeep, including the budgeting to do this. Ensure no failures in services and where there are, restore services with urgency.

| FOCUS AREA        | WATER (Bulk & Reticulation)   |
|-------------------|---|
| PROBLEM STATEMENT | <ol> <li>With the installation of water-borne flush toilet sewerage systems, water consumption has increased throughout the Dr Beyers Naudé LM. A growing population and economy have increased demand, but water supplies are dwindling and during dry seasons have dried up completely in some areas. The fact that there is not a sustainable water supply is stifling economic development.</li> <li>Storage facilities in some areas are inadequate and pressure too low as a result. A few small settlements in remote areas outside of the Municipality's urbanized areas of service delivery are experiencing problems with access to potable water and in some towns, water quality is a big concern.</li> <li>Reticulation systems in some urban areas were installed decades ago and are deteriorating at a rapid rate. This is causing pipes to burst, leaving affected areas without water at times. In some instances, poor maintenance of systems is leading to their deterioration.</li> <li>There are also unaccounted-for water losses, unnecessary wastage and a number of households that are not being billed for water usage, causing a loss in revenue.</li> </ol> |
| OBJECTIVE         | <ol> <li>For all households to have uninterrupted access to good quality, potable water.</li> <li>To adequately increase bulk water storage, upgrade reticulation systems, secure permanent water supply and properly maintain all infrastructure.</li> <li>To have all Municipal water-supply consumers connected to a metering system and registered on the Debtor's database for monthly billing purposes.</li> </ol>  |

|          | 1. Conduct a water meter audit throughout the Municipal area, to determine whether all users are connected to a working metering system and are on the Municipality's database. |
|----------|---|
|          | 2. Develop a new WSDP for Dr Beyers Naudé LM that is aligned with the IDP and other relevant plans.   |
| STRATEGY | 3. Implement Action Plans contained in WSDP; ensure that proper controls and monitoring measures are in place.  |
|          | 4. Increase water storage and supply through the construction of reservoirs and installation of rainwater tanks.  |
|          | 5. Upgrade reticulation system by systematically replacing old installations.   |
|          | 6. Identify and implement suitable projects.  |
| PROJECTS | The following projects are proposed for implementation during the term of this IDP and beyond :   |

|                     |  |                        |   | TOTAL  | FUNDED                      | 47,500,000             | 56,916,600            | 42,451,200            | 0                     | 0                     |                  |   |         |                      |             |               |  |           |

Additional Drought Relief funding of R6.4 million was made available by COGTA during 2019/20 fiscal for drilling and equipping of more boreholes. This support continued in 2020/21.

Measures were taken during 2019/20 and budget provision was made for 2020/21, to accommodate critical basic services requirements in the wake of the Coronavirus / COVID-19 pandemic, thereby ensuring that all citizens have access to clean, potable water and proper sanitation facilities.

| FOCUS AREA        | SANITATION (WWTW and reticulation)  |
|-------------------|---|
| PROBLEM STATEMENT | <ol> <li>All bucket toilets have been eradicated but there are still households in some of the remote areas of Dr Beyers Naudé LM that are using pit latrines, and<br/>not all meet the minimum standard of VIP systems. These settlements fall outside of the urban areas of Municipal service delivery.</li> <li>Some households are not connected to the Municipal sewerage network and still depend on having their septic tanks emptied by the Municipality, which<br/>is not always a reliable service.</li> <li>Leakages and blockages are being experienced where systems are not being maintained properly, or mistreated by residents.</li> </ol> |

| OBJECTIVE          |  | To adequately upgrade and/or construct Waste Water Treatment Works and maintain them on a regular basis.   |                                  |                                       |  |                        |                                      |                       |                       |                       |                          |

| FOCUS AREA        | ELECTRIFICATION (Bulk & Reticulation)   |
|-------------------|---|
| PROBLEM STATEMENT | <ul> <li>Bulk electricity capacity has been reached in some of the towns and electrical systems in other urban areas are old and need to be upgraded. A few areas still have inadequate street lighting and high mast lights have been requested to reduce criminal activities in densely populated areas.</li> <li>There are still households in some of the remote areas of Dr Beyers Naudé LM that do not have access to basic energy; these settlements fall outside of the urban areas of Municipal service delivery.</li> </ul>   |
| OBJECTIVE         | 1. To adequately upgrade the electrical supply and install the necessary electrical infrastructure, as well as regular maintenance thereof.   |
| STRATEGY          | <ol> <li>Conduct an electricity meter audit throughout the Municipal area, to determine whether all users are connected to a working metering system and are on<br/>the Municipality's database.</li> <li>Conduct an audit of electrification needs and infrastructure in the Dr Beyers Naudé LM.</li> <li>Develop an Electricity Master Plan and register projects identified in it.</li> <li>Develop an Electricity Maintenance Plan and make adequate provision for maintenance expenditure in the annual Operating Budget.</li> <li>Be more supportive of alternative &amp; renewable energy initiatives.</li> <li>Identify and implement suitable Electrification Projects.</li> </ol> |
| PROJECTS          | The following projects are proposed for implementation during the term of this IDP and beyond :   |

| FOCUS AREA           | COMMUNITY SAFETY AND SECURITY  |
|----------------------|--|
| PROBLEM<br>STATEMENT | During the Public Consultations, many complaints were received about the lack of proper and clear road traffic signs, road markings and speed control measures. Fire-fighting measures in certain Wards were deemed to be inadequate. Concerns about Disaster Management were raised. People are very unhappy about the apparent lack of law enforcement by the Municipality, citing examples of stray animals, reckless driving, illegal land use, etc.   |
| OBJECTIVE            | <ol> <li>A functional and effective Community Safety Forum, Local Transport Forum and Local Disaster Management Advisory Forum.</li> <li>To create a platform for co-ordination, integration and implementation of multi-sectoral crime prevention and community initiatives for joint collaboration towards local crime prevention strategies.</li> <li>To provide initiatives and reporting strategies to achieve the necessary objectives for a safe transport system.</li> <li>To significantly reduce and mitigate the negative impact of disasters and to upgrade road traffic and pedestrian safety, with regular maintenance on installations and infrastructure as an ongoing concern.</li> </ol> |

- Above serves to illustrate that provision is being made for the repair and maintenance of capital acquisitions / assets.
- Provision for above Repairs & Maintenance was increased by 16% from R2,634,460 in 2020/21 to R3,053,860 for 2020/21.

## LOCAL ECONOMIC DEVELOPMENT

## Key Performance Area 3

| FOCUS AREA        | LED STRATEGIC PLANNING & FACILITATION : ECONOMIC INFRASTRUCTURE DEVELOPMENT<br>AND CREATING ENVIRONMENTS AND CONDITIONS CONDUCIVE TO ECONOMIC GROWTH   |
|-------------------|--|
| PROBLEM STATEMENT | During the Public Consultations, some of the communities indicated that they felt not enough was being done by the Municipality in terms of Job Creation Skills<br>Development and Poverty Alleviation. They wanted to see better support (technical and financial) for SMME growth & establishment, Skills Development,<br>Sector Development (specifically Tourism & Agriculture), Industrial Development (dependent on Water supply); emphasis on BEE with focus on PDI / HDI /<br>PPP initiatives; attention being paid to the rendering of quality services and installation / maintenance of good infrastructure and the preservation of culture and<br>heritage. There was a need for investment incentives, review of policies & by-laws so that that they support LED and, of course, strategic direction for LED and<br>its Institutional arrangement.   |
|                   | TO GIVE EFFECT TO OUR CONSTITUTIONAL MANDATE OF PROMOTING ECONOMIC DEVELOPMENT   |
| OBJECTIVE         | <ol> <li>Creating an enabling environment to attract investment that generates economic growth and job creation.</li> <li>Strengthening and sustaining good stakeholder relationships.</li> <li>Maximise the use of available funding and programmes for training and skills development.</li> <li>Provide and maintain economic and social infrastructure to ensure infrastructure – led economic growth and development.</li> <li>Leverage the municipality's assets to drive economic growth and sustainable development.</li> <li>Organizing ourselves institutionally so that we have the necessary capacity and resources with which to promote, co-ordinate and facilitate LED activities &amp; initiatives with focus on :         <ul> <li>SUSTAINABLE JOB CREATION + BEE &amp; PARTNERSHIPS + SMME, INDUSTRIAL AND SECTOR DEVELOPMENT + SKILLS DEVELOPMENT + MAINSTREAMING OF 2<sup>ND</sup> ECONOMY, YOUTH, DISABLED &amp; WOMEN +</li> </ul> </li> </ol>   |
| STRATEGY          | <ol> <li>Develop an LED Strategic Plan with an economic Vision for the Municipality.</li> <li>Improve economic intelligence and related systems.</li> <li>Review and amend current Institutional arrangements in order to improve the LED function.</li> <li>Develop or review all other Plans, Policies &amp; Strategies linked to the Municipality's LED Programme.</li> <li>Establish a Vibrant LED Forum / Think Tank for the region.</li> <li>Establish a sound relationship with Business Chambers and form partnerships with economic growth-orientated agencies.</li> <li>Implement strategic LED Actions and Interventions, with the aim of creating networks, linkages, referral &amp; support systems, appropriate policies, by-laws, incentives, services and infrastructure that will stimulate and facilitate LED, attract investment, encourage establishment and growth of business and industry in the Dr Beyers Naudé LM.</li> <li>Support, encourage and facilitate value-adding initiatives, programmes and projects.</li> </ol> |
| PROJECTS          | The following projects are proposed for implementation during the term of this IDP and beyond :  |

#### **BACK TO BASICS**

#### Key Performance Area 4 & 5

THE 3<sup>rd</sup> PILLAR OF BACK TO BASICS : Promoting good governance, transparency and accountability. To be a well-governed institution that demonstrates good governance and administration – by cutting wastage, spending public funds prudently, hiring competent staff, ensuring transparency and accountability and effective public participation.

THE 4<sup>th</sup> PILLAR OF BACK TO BASICS : Ensuring sound financial management and accounting, by prudently managing resources so as to sustainably deliver services and bring development to communities.

NB : An amount of R30,020,000 Drought Relief Funding was allocated by DWS during the 2018/19 fiscal - to be utilized by end of June 2019 - as follows :

- R 345,000 Graaff-Reinet : Improve performance of filters at WTW
- R 517,500 Jansenville : Replace water mains which can no longer be repaired
- R17,250,000 Graaff-Reinet : Emergency Water Supply Scheme
- R 2,765,060 Steytlerville : Refurbishment of boreholes
- R 1,725,000 Rietbron : Future groundwater development
- R 6,957,500 BNLM : Installation of water meters
- R 460,000 Graaff-Reinet Aquifer system : Incremental groundwater development

CAMDEBOO NATIONAL PARK CONTINUES TO PLAY A PIVOTAL ROLE IN POVERTY ALLEVIATION WITH ITS JOB CREATION PROGRAMMES

The following submission was received from Bronwyn Botha, Buffer Zone Coordinator for SANParks :

### POSSIBLE COLLABORATIVE PROJECTS FOR INCLUSION INTO THE DR BEYERS NAUDÉ LOCAL MUNICIPALITY IDP

The Mountain Zebra National Park / Camdeboo National Park Protected Environment was formally declared on the 1 April 2016 and has recently submitted their management plan to the Minister of Environmental Affairs for approval. A number of exciting collaborative projects and programmes exist within the management plan.

 Degradation and Rehabilitation Programme, Alien and Invasive Species Programme and the Freshwater Ecosystems Programme. The programmes above looks at land degradation in terms of soil erosion, alien species and wetland degradation. Biodiversity Social Projects have already committed themselves to aiding the programme in priority areas. As the protected environment is 275,082 ha, many other opportunities exist for new teams under the municipal banner to become involved.

#### Fire Risk Management

The members of the Protected Environment aim to reduce the risk of unplanned fires in the area. The ultimate goal would be to create the opportunity for two fire teams that could assist with fire fighting in the fire season and fire risk infrastructure maintenance (e.g. fire breaks and access roads) out of season. One fire team would hopefully be based in Cradock with the other in Graaff-Reinet.

#### Sustainable Tourism

This programme is looking at creating an inventory of the tourism ventures currently operating within the Protected Environment and also investigating new tourism possibilities. There are a number of tourism projects on the development framework already with the first one launched in March 2017, the Roof de Karoo Mountain Bike Challenge. An ultimate goal would be to create a tourism route for the area enabling multiple possibilities for community participation.

#### Local Socio-economic development

The programmes of the management plan all have potential to create jobs. Unfortunately many of the jobs on offer would be contractual and mostly short term. With that being said, the Protected Environment would like to create more skills based training opportunities with an agricultural or nature base. An opportunity has already been identified to work with the "Work for a Living" programme allowing students to be trained in nature based skills to open access for them within the game industry.

#### Stakeholder Relationship Programme

This programme focusses on building working relationships with relevant organisations to achieve common goals. The Protected Environment regards the municipalities as an important partner in attempts to contribute to the area.
