WATER-QUALITY & SUPPLY

5 OCTOBER 2023

ADENDORP & ASHERVILLE

BNLM has been made aware of concerns from residents in the affected areas, mentioned above, about the discomfort of residents due to the unusual smell in the water.

We are aware of the concerns, and we are constantly attending to the concerns.

We hereby wish to assure residents that the water has been tested, as per the prescribed standards, and are conforming to the water-quality standard, Sans 241.

The water is safe to drink and poses no health risk. The smell in the water is due to the content of sulphur, which is more noticeable during the summer period.

The affected areas are: Adendorp & Asherville.

We apologise for the inconvenience that this may cause.
